*Orwell in Athens* Wim B. H. J. van de Donk, I. Th. M. Snellen, P. W. Tops, 1995 Informatization is playing an increasingly important role in democratic politics For some time already various applications of Information and Communication Technologies ICT are more or less successfully used by politicians representative bodies political parties and citizens It is however reasonable to believe that informatization will be of paramount interest for existing actors and institutions that are involved in public decision making in a democracy The advent of telecommunication infrastructures that will enable the use of all kinds of interactive facilities is considered to be an important step towards a more participative democratic system Many projects that share a common feature have been set up their ambition to renew democratic decision making structures and practises with the help of ICT Most of these projects can be found at the level of local and or regional government In this book the claim that these projects can reform or strengthen democratic politics is explored and discussed both empirically and theoretically The research that is presented in this book makes clear that as far as the role of informatization regarding the functioning of the democratic polity is concerned it appears that informatization represents both opportunities and threats

Communication Theory and Research Denis McQuail, Peter Golding, Els De Bens, 2005-12-15 This exciting collection of papers represents some of the finest communications research published over the last decade To mark the 20th anniversary of the European Journal of Communication a leading international journal the editors have selected 21 papers all of which make significant and valuable interventions in the field of media and communications The volume is prefaced with an introduction by the editors and will be a central research text for scholars in this field

**Public Administration in an Information Age** I. Th. M. Snellen, Wim B. H. J. van de Donk, 1998 This book is a joint effort of researchers who have been involved in research projects and programmes that have been trying to chart and reflect upon the implications of Information and Communication Technologies ICTs for Public Administration Tilburg Rotterdam Kassel Irvine Nottingham Glasgow Since the fifties computers had largely facilitated and the transformation of the minimal Night Watch state into the modern Welfare state through their contribution to their effectivity productivity and efficiency In most Handbooks of Public Administration computers are seen as neutral instruments and most of the time the role of computer technologies in the transformation of public administration is completely neglected This deafening silence is a great contrast with the way ICT s are actually changing public administration The faster the developments in a field of study are the more difficult it is to let the theories related to that field of study mature In such circumstances most statements will remain provisional and context dependent 25 years of research in Irvine California and Kassel Germany and more than 10 years of research in Tilburg Rotterdam The Netherlands and about seven years of research in Glasgow Nottingham the United Kingdom nonetheless enables the presentation of a modest image of public administration as it is entering the information age Researchers in each of these groups have nevertheless not stopped trying to phrase theories about the implications of informatization for public

administration with a more or less large scope that are robust in different contexts and over longer periods of time. These results and theories covering a broad set of elements of the body of knowledge of public administration are presented in this volume. As the authors try to demonstrate in this book, informatization developments in public administration do not only challenge the existing body of knowledge of the public administration discipline but they are also opening up new perspectives and paradigms for the study of public administration.

**Orwell of Athens?**, 1992 **iGovernment** D. Broeders, H. Griffioen, A. -G. Keizer, E. Keymolen, 2011. The authors of this incisive study explore the problems of the ongoing digitization of government such as the creeping loss of data quality and how citizens and officials must respond to these complications in the coming years. The iGovernment is running full speed on information networks and digitization but it is also seriously out of step with existing bureaucracies. iGovernment offers an accurate picture of how the digital technologies are shaping modern governments and also a powerful corrective for the dissonance between technology and organizational management. This book will be a valuable resource for researchers and scholars seeking to understand the possibilities, dilemmas and challenges of bringing the Internet and related technologies to center stage in government and public services. Helen Margetts, University of Oxford.

**Information and Communication Technology in Organizations** Harry Bouwman, Bart van den Hooff, Lidwien van de Wijngaert, Jan van Dijk, 2005-03-18. How best can we understand why the application of information and communication technology in organizations succeeds or fails? Calling on technical, organisational, social, psychological and economic perspectives, this book provides a fresh and comprehensive framework for answering this question. Consideration is given to how ICT is adopted, implemented and used within organizations. Throughout, special features will help readers clarify their understanding. These features include case studies and vignettes that chart the opportunities and pitfalls created by ICT. Useful chapter introductions. An up-to-date glossary of concepts and abbreviations.

Cyberidentities Alan L. Cobb, International Council for Canadian Studies, University of Ottawa. Institute of Canadian Studies, 1999. This innovative study explores diverse aspects of Canadian and European identity on the information highway and reaches beyond technical issues to confront and explore communication culture and the culture of communication. Published in English.

An Ethical Global Information Society Jacques J. Berleur, Diane Whitehouse, 2013-11-11. Many challenges lie ahead in the development of a global information society. Culture and democracy are two areas which may be under particular threat. The book reflects on today's complex and uncertain cultural and democratic developments arising as a result of an increasingly global technologically connected world. In particular, it focuses on the Internet, examining new metaphors for communication, defining the issues at stake and proposing options, actions and solutions. Among the issues discussed were multi-cultural developments, cultural sensitivities and the involvement of cultural minorities, generation gaps, gender issues, technology access for the elderly and the disabled, technology transfer.

**The Information Ecology of E-government** V. J. J. M. Bekkers, Vincent Homburg, 2005. It seems that only a short time ago numerous academics and

practitioners in the field were somewhat blinded by the successes of the dot com developments in the private sector and some of them enthusiastically claimed that public administration was to be revolutionized But that did not happen and also the dot com soap bubble burst This suggests that there is much yet to be learned about innovation in public administration especially about innovations at the cornerstones of technological and institutional transformations New and more fully developed formulations of theory into practice are needed The goal of the editors of this book is to contribute to some aspects of the understanding of e government In order to understand electronic government one has to scrutinize the various environments and contexts in which e government is developed and implemented As such it builds upon the biological and environmental lines of reasoning that have been suggested by authors like Bonnie Nardi and Vicky O Day and Thomas Davenport and Laurence Prusak
