**Riding the Energy Transition** Reda Cherif,Fuad Hasanov,Aditya Pande,2017-05-22 Recent technological developments and past technology transitions suggest that the world could be on the verge of a profound shift in transportation technology The return of the electric car and its adoption like that of the motor vehicle in place of horses in early 20th century could cut oil consumption substantially in the coming decades Our analysis suggests that oil as the main fuel for transportation could have a much shorter life span left than commonly assumed In the fast adoption scenario oil prices could converge to the level of coal prices about 15 per barrel in 2015 prices by the early 2040s In this possible future oil could become the new coal

**The Political Economy of State Intervention** Gavin Poynter,2020-11-25 Both the exponents and critics of neoliberalism assert the dominance of market forces in western nations The Political Economy of State Intervention calls this into question Through a re examination of state intervention in the USA and Britain over the course of the long depression 1970 to date this book argues that the state has performed an increasingly significant role in conserving capital propping up an economic and social order that has lost its productive dynamism The

specific forms of capital's dependency on the state may vary however the underlying weaknesses of mature western economies have prompted new forms of state intervention narrowly aimed at conserving capital especially in the wake of the financial crisis The chapters consider factors which are usually posited as explanations for the long depression such as oil price shocks domestic conditions and technological innovation The work argues that the consensus view of neoliberalism has served to underplay the significance of the state's role in failing to lift this long depression in several ways it has lent a greater ideological coherence to the policies pursued by successive governments than they deserve the state has been less subordinate to the market than is usually claimed and more often its maker and there has been a significant growth in jobs located in the private sector that are funded by public money The cumulative effect of this is a narrowing of the state's purpose to conserving capital a role which has contributed to its loss of authority as an institution that claims to represent society as a whole It is theorised that this in turn has led to the insecurities of the existing political order and the rise of populism This book will be of great interest to students and scholars of political economy public policy political theory economics and sociology     Self-Censorship in Contexts of Conflict Daniel Bar-Tal,Rafi Nets-Zehngut,Keren

Sharvit,2017-10-30 This groundbreaking volume explores the concept of self censorship as it relates to individuals and societies and functions as a barrier to peace Defining self censorship as the act of intentionally and voluntarily withholding information from others in the absence of formal obstacles the volume introduces self censorship as one of the socio psychological mechanisms that prevent the free flow of information and thus obstruct proper functioning of democratic societies Moreover it analyzes this socio psychological phenomenon specifically in the context of intractable conflict providing much evidence from the Israeli Palestinian conflict Moving from the micro to the macro level the collected chapters put the individual as the focal unit of psychological analysis while embedding the individual in multiple levels of context including families organizations and societies Following a firm conceptual explanation of self censorship a selection of both emerging and prominent scholars describe the ways in which self censorship factors into families organizations education academia and other settings Further chapters discuss self censorship in military contexts narratives of political violence and the media Finally the volume concludes by looking at the ways in which harmful self censorship in societies can be overcome and explores the future of self censorship research In doing so this volume solidifies self censorship as an important phenomenon of social behavior with major individual and collective consequences while stimulating exciting and significant new research possibilities in the social and behavioral sciences Conceptually carving out a new area in peace psychology Self Censorship in Contexts of Peace and Conflict will appeal to psychologists sociologists peace researchers political scientists practitioners and all those with a wish to understand the personal and societal functioning of individuals in the real world

**Global Value Chain** Wilson Kia Onn Wong, 2017-08-09 Today some suppliers have grown increasingly powerful and in certain cases earn revenues that rival or even exceed that of their automaker clients In the pre globalisation period automakers wielded absolute power over their significantly smaller suppliers This book reveals the upending of this relationship with the gradual shift in the balance of power from automakers to their suppliers in this era of globalisation The book examines how suppliers in the global tyres seats constant velocity joints hereafter CVJs braking systems and automotive semiconductor industries have evolved into powerful oligopolies through a mix of acquisition and organic growth strategies It also highlights how joint ventures could be strategically deployed as springboards to acquisition as they enable firms to familiarise themselves with their partners markets and operations Moreover the book analyses the disruption stirred by the entry of well resourced technology titans into this industry and their inevitable clash with the traditional incumbents This book is an invaluable reference for anyone interested in learning more about the automakers and now their suppliers relentless quest to create market dominating intelligent driving systems **Performing Religion on the Secular Stage**

Sharon Aronson-Lehavi, 2023-06-02 This book examines the relations between Western religion secularism and modern theater and performance Sharon Aronson-Lehavi posits that the ongoing cultural power of religious texts icons and ideas on the one hand and the artistic freedom enabled by secularism and avant garde experimentalism on the other has led theatre artists throughout the twentieth century to create a uniquely modern theatrical hybrid theater performances that simultaneously re-inscribe and grapple with religion and religious performativity The book compares this phenomenon with medieval forms of religious theater and offers deep and original analyses of significant contemporary works ranging from plays and performances by August Strindberg Hugo Ball Dada Jerzy Grotowski and Hanoch Levin to those created by Adrienne Kennedy Rina Yerushalmi Deb Margolin Milo Rau and Sarah Ruhl The book analyzes a new and original historiography of a uniquely modern theatrical phenomenon a study that is of high importance considering the reemergence
