Removal and Installation

CAUTION:

Because hybrid vehicles contain a high voltage battery, there is the risk of electric shock, electric fire, or other accidents if the high voltage component and vehicle are handled incorrectly. Always follow the correct work procedures when performing inspection and maintenance.

Be sure to remove the service plug in order to shut off the high voltage circuits before performing inspection or maintenance on high voltage system harnesses and parts.

Be sure to put the removed service plug in your pocket and carry it with you so that another person does not accidentally connect it while work is in progress.

Be sure to wear insulating protective equipment consisting of gloves, shoes and glasses/face shield before beginning work on the high voltage system.

INSTALLATION
The DC/DC-UB is removed and installed by following the procedure for removal in the reverse order.

To prevent shock hazards, be sure to put on insulating protective gear before beginning work on the high voltage system.

CAUTION:

Be sure to reinstall high voltage harness clips in their original positions. If a clip is damaged, replace it with a new clip before installing.

Be sure to perform correct air bleeding after adding coolant. Refer to [DC/DC-UB, Drainage and Refill](#).

If DC/DC-UB was replaced, apply high voltage warning label at position (A), with the top facing in the direction of the arrow.

Before applying label, verify that there is no dust or dirt on surface of DC/DC-UB.

Follow the procedure below and connect the 2-step type high voltage harness connector.
