DAA-75 Series
Digital Audio Amplifiers

NOTIFIER®
by Honeywell

Voice Control Systems

General

The DAA-75 Series Amplifiers provide more than 75 watts of audio for applications that are too large for the DAA-50 series amplifiers. Up to 32 DAA series amplifiers, can be connected to the DAL (digital audio loop) on one DVC Digital Voice Command unit. DAA-75 series amplifiers can be mixed with DAA-50 series amplifiers on the same DAL.

Each DAA-75 is capable of accessing and processing one of up to eight audio channels on the DVC audio loop, amplifying the signal, and distributing it via four Class B or two Class A outputs at 75 watts. DAA-75 amplifiers can store backup alarm and trouble messages, and provide an adjustable background music input. An optional Firefighter's telephone riser on the DAA-75 supports FFT communications with the controlling DVC. Each DAA incorporates a powerful digital signal processor, a 75 watt amplifier, built-in audio NAC outputs, and a chassis which mounts in a single row of either CAB-4 or EQ Series cabinets.

The DAA-75 does not charge batteries; therefore a separate listed charging power supply must be used in conjunction with the backup batteries.

Features

- Listed to UL Standard 864, 9th edition.
- 75 W total output power at 25 VRMS
- Multiple versions provide connection options for twisted-pair wire, single-mode fiber, and multi-mode fiber media
- Two Class A high-level audio outputs; or alternately, four Class B outputs supported. Outputs dynamically share the 75 W - the total power can be dedicated to a single output if required.
- FireFighter's Telephone Riser supports 7 active firefighter telephones. Release 3.0 and higher supports optional configurations: direct connection for up to 7 firefighter telephones, or connection to multiple FTM-1 modules.
- Audio output activation via network control-by-event equations resident within the DVC
- Two digital audio ports support Style 4 or 7 configurations.
- Auxiliary input for 12 Vp-p analog low-level audio.
- Auxiliary input for 1 VRMS, to be used for background music input, an interface with a telephone paging source, or other compatible audio sources. Audio levels can be adjusted by end user. Continuous supervision for active DAA output circuits.
- Programmable through VeriFire® Tools
- Up to two minutes of standard quality backup digital message storage (from a VeriFire Tools message library, or created by the installer) for use in the event of communication loss.
- Multiple DAA-75 can share batteries supported by a single charging power supply
- Isolated alarm bus input, to be used for backup activation of alarm messages when normal digital communication is lost
- Relay contacts that will activate on a trouble condition provide an option for redundant annunciation to a local panel

Installation

The DAA-75 arrives from the factory already installed on its chassis. The DAA-75 mounts in one tier of any CAB-4 Series cabinet; the DAA tier can be covered using a DP-1B dress panel, ordered separately. The DAA-75 may also be installed in one tier of an EQ series cabinet. No dress plate is used for EQ cabinet installations. DAA-75 series amplifiers (wire versions) may be installed in adjacent rows of a CAB-4 series cabinet for non-continuous duty applications (background music is a continuous-duty application). The EQ series cabinets supports DAA-75 series amplifiers (wire or fiber) installed in adjacent rows for continuous as well as non continuous duty applications.
