Nuclear Non Proliferation An Agenda For The 1990s:

Nuclear Non-Proliferation John Simpson, 1987-11-12 Originally published in 1987 this book is concerned with the possible acquisition of nuclear weapons by states not in possession of them and the international concern caused by this. Since 1968 the international arrangements designed to prevent this had been based upon the Nuclear Non Proliferations Treaty which had over 130 states as signatories at the time of publication. The initial period of application of this treaty ended in 1995 and a conference was held then to discuss its extension. This volume was the first public attempt to explore the problems surrounding this conference to examine issues likely to determine its outcome and to analyse the consequences if the conference were to fail to reach any agreement on extension. The international contributors were among the foremost students and practitioners in the area and brought unique knowledge and experience to the subject. The result was a pathbreaking attempt to investigate a critical problem for international security in the 1990s and to identify methods whereby international nuclear non proliferation arrangements could be extended into the next century. *UK Arms Control in the 1990s* Mark Hoffman, 1990 Disarmament Research, Agenda for the 1990s United Nations Institute for

Disarmament Research, 1988 **Historical Dictionary of Arms Control and Disarmament** Jeffrey A. Larsen, James M. Smith, 2005-03-25 Historical Dictionary of Arms Control and Disarmament also provides information that is comprehensible to all readers. Jeffrey A. Larsen and James M. Smith present a context for the broader range of international relations at a given point in time extending the utility of the dictionary beyond just a narrow examination of arms control. **BOOK JACKET**

Networked Nonproliferation Michal Onderco, 2021-10-05 The Treaty on Non Proliferation of Nuclear Weapons NPT had many opponents when in 1995 it came up for extension. The majority of parties opposed extension and experts expected a limited extension as countries sought alternative means to manage nuclear weapons. But against all predictions the treaty was extended indefinitely and without a vote. *Networked Nonproliferation* offers a social network theory explanation of how the NPT was extended giving new insight into why international treaties succeed or fail. The United States was the NPT's main proponent but even a global superpower cannot get its way through coercion or persuasion alone. Michal Onderco draws on unique in depth interviews and newly declassified documents to analyze the networked power at play. Onderco not only gives the richest account yet of the conference looking at key actors like South Africa, Egypt and the EU but also challenges us to reconsider how we think about American power in international relations. With *Networked Nonproliferation* Onderco provides new insight into multilateral diplomacy in general and nuclear nonproliferation in particular with consequences for understanding a changing global system as the US the chief advocate of nonproliferation and a central node in the diplomatic networks around it declines in material power. *The NPT and the Developing Countries* Jita Mishra, 2008 *Yearbook of the United Nations, Volume 44 (1990)* United Nations, 2023-09-20 Fully indexed the 1990 edition of the Yearbook is the single most current comprehensive and authoritative reference publication about the work of
