Advice on the Department of Energy's Cleanup Technology Roadmap National Research Council,Division on Earth and Life Studies,Nuclear and Radiation Studies Board,Committee on Development and Implementation of a Cleanup Technology Roadmap,2009-06-21 Beginning with the Manhattan Project and continuing through the Cold War the United States government constructed and operated a massive industrial complex to produce and test nuclear weapons and related technologies When the Cold War ended most of this complex was shut down permanently or placed on standby and the United States government began a costly long term effort to clean up the materials wastes and environmental contamination

resulting from its nuclear materials production In 1989 Congress created the Office of Environmental Management EM within the Department of Energy DOE to manage this cleanup effort Although EM has already made substantial progress the scope of EM s future cleanup work is enormous Advice on the Department of Energy s Cleanup Technology Roadmap Gaps and Bridges provides advice to support the development of a cleanup technology roadmap for EM The book identifies existing technology gaps and their priorities strategic opportunities to leverage needed research and development programs with other organizations needed core capabilities and infrastructure at national laboratories and EM sites that should be maintained all of which are necessary to accomplish EM s mission *Radioactive Waste Management* ,1981 **U.S.**
