Fundamentals of Multimedia Ze-Nian Li, Mark S. Drew, Jiangchuan Liu, 2014-04-09 This textbook introduces the Fundamentals of Multimedia addressing real issues commonly faced in the workplace The essential concepts are explained in a practical way to enable students to apply their existing skills to address problems in multimedia Fully revised and updated this new edition now includes coverage of such topics as 3D TV social networks high efficiency video compression and conferencing wireless and mobile networks and their attendant technologies Features presents an overview of the key concepts in multimedia including color science reviews lossless and lossy compression methods for image video and audio data examines the demands placed by multimedia communications on wired and wireless networks discusses the impact of social media and cloud computing on information sharing and on multimedia content search and retrieval includes study exercises at the end of each chapter provides supplementary resources for both students and instructors at an associated website

Performance Evaluation of Complex Systems: Techniques and Tools Maria Carla Calzarossa, Salvatore Tucci, 2003-08-02 This book presents the tutorial lectures given by leading experts in the area at the IFIP WG 7.3 International Symposium on Computer Modeling Measurement and Evaluation Performance 2002 held in Rome Italy in September 2002 The survey papers presented are devoted to theoretical and methodological advances in performance and reliability evaluation as well as new perspectives in the major application fields Modeling and verification issues solution methods workload characterization and benchmarking are addressed from the methodological point of view Among the applications dealt with are hardware and software architectures wired and wireless networks grid environments Web services and real time voice and video processing This book is intended to serve as a state of the art survey and reference for students scientists and engineers active in the area of performance and reliability evaluation

Intelligent Multimedia Communication: Techniques and Applications Chang Wen Chen, Zhu Li, Shiguo Lian, 2010-03-12 Multimedia data are used more and more widely in human beings' life e.g. videoconferencing visual telephone IPTV etc Nearly most of the applications need multimedia transmission techniques that send multimedia data from one side to another side and keep the properties of efficiency robustness and security Here the efficiency denotes the time cost of transmission operations the robustness denotes the ability to survive transmission errors or noises and the security denotes the protection of the transmitted media content Recently various intelligent or innovative techniques are invented which bring vast performance improvements to practical applications For example such content transmission techniques as p2p sensor network and ad hoc network are constructed which adaptively use the peers' properties to improve the network's resources Multimedia adaptation techniques can adjust the multimedia data rate in order to be compliant with the network's bandwidth Scalable encryption techniques can generate the data stream that can be correctly decrypted after bit rate conversion Ubiquitous multimedia services make the user share any kind of content anywhere The book includes fourteen chapters highlighting

current concepts issues and emerging technologies Distinguished scholars from many prominent research institutions around the world contribute to the book The book covers various aspects including not only some fundamental knowledge and the latest key techniques but also typical applications and open issues For example the covered topics include the present and future video coding standards stereo and multiview coding techniques free viewpoint TV techniques wireless broadcasting techniques media streaming techniques wireless media transmission techniques and systems and User Generated Content sharing

Passive and Active Measurement Neil Spring, George F. Riley, 2011-03-11 This book constitutes the refereed proceedings of the 12th International Conference on Passive and Active Measurement PAM 2011 held in Atlanta GA USA in March 2011 The 24 revised full papers presented were carefully reviewed and selected from 56 submissions The papers were arranged into seven sessions covering passive measurement wireless models bandwidth automated bots route avoidance interdomain protocols timing and diagnosis

Grid and Cooperative Computing Minglu Li, Xian-He Sun, Qianni Deng, Jun Ni, 2004-04-19 Grid and cooperative computing has emerged as a new frontier of information technology It aims to share and coordinate distributed and heterogeneous network resources

for better performance and functionality that can otherwise not be achieved This volume contains the papers presented at the 2nd International Workshop on Grid and Cooperative Computing GCC 2003 which was held in Shanghai P R China during December 7-10 2003 GCC is designed to serve as a forum to present current and future work as well as to exchange research ideas among researchers developers practitioners and users in Grid computing Webservices and cooperative computing including theory and applications For this workshop we received over 550 paper submissions from 22 countries and regions All the papers were peer reviewed in depth and qualitatively graded on their relevance originality significance presentation and the overall appropriateness of their acceptance Any concerns raised were discussed by the program committee The organizing committee selected 176 papers for conference presentation full papers and 173 submissions for poster presentation short papers The papers included herein represent the forefront of research from China USA UK Canada Switzerland Japan Australia India Korea Singapore Brazil Norway Greece Iran Turkey Oman Pakistan and other countries More than 600

attendees participated in the technical section and the exhibition of the workshop

Cyberspace Safety and Security Sheng Wen, Wei Wu, Aniello Castiglione, 2017-10-20 This book constitutes the proceedings of the 9th International Symposium on Cyberspace Safety and Security CSS 2017 held in Xi'an China in October 2017 The 31 full papers and 10 short papers presented in this volume were carefully reviewed and selected from 120 submissions The papers focus on cyberspace safety and security such as authentication access control availability integrity privacy confidentiality dependability and

sustainability issues of cyberspace

Synthetic Data and Generative AI Vincent Granville, 2024-01-09 Synthetic Data and Generative AI covers the foundations of machine learning with modern approaches to solving complex problems and the systematic generation and use of synthetic data Emphasis is on scalability automation testing optimizing and interpretability

explainable AI For instance regression techniques including logistic and Lasso are presented as a single method without using advanced linear algebra Confidence regions and prediction intervals are built using parametric bootstrap without statistical models or probability distributions Models including generative models and mixtures are mostly used to create rich synthetic data to test and benchmark various methods Emphasizes numerical stability and performance of algorithms computational complexity Focuses on explainable AI interpretable machine learning with heavy use of synthetic data and generative models a new trend in the field Includes new easier construction of confidence regions without statistics a simple alternative to the powerful well known XGBoost technique Covers automation of data cleaning favoring easier solutions when possible Includes chapters dedicated fully to synthetic data applications fractal like terrain generation with the diamond square algorithm and synthetic star clusters evolving over time and bound by gravity **Lightroom 4** Nat

Coalson,2012-04-06 Nat Coalson is passionate about sharing his experience and knowledge on Lightroom 4 to help you professionally organize process and present your images This book has been completely revised and updated to include the newest Lightroom features to make your images look their very best Katrin Eismann Chair Masters in Digital Photography School of Visual Arts New York New York Working with your photos is fast easy and fun with Lightroom 4 Most photographers want to make their photos look good find them easily and protect them from loss And they d rather be out in the field than learning a new software program If this is you you ll love Nat Coalson s step by step task focused approach to Lightroom 4 Designed for new users and those upgrading from an earlier version this book leads you on a straightforward path to great results Learn to Organize your photo library to quickly find what you re looking for Optimize every photo with powerful easy image adjustments Edit videos and publish your finished clips to the web Create beautiful photo books web galleries and slideshows Synchronize your collections with photo sharing and social media websites Print photos with precise color accuracy Use the map to plot locations where your photos were taken *Web Content Delivery* Xueyan Tang,Jianliang

Xu,Samuel T. Chanson,2006-01-17 The concept of content delivery also known as content distribution is be coming increasingly important due to rapidly growing demands for efficient distribution and fast access of information in the Internet Content delivery is very broad and comprehensive in that the contents for distribution cover a wide range of types with significantly different characteristics and performance concerns including HTML documents images multimedia streams database tables and dynamically generated contents Moreover to facilitate ubiquitous information access the network architectures and hardware devices also vary widely They range from broadband wired fixed networks to bandwidth constrained wireless mobile networks and from powerful workstations PCs to personal digital assistants PDAs and cellular phones with limited processing and display capabilities All these levels of diversity are introducing numerous challenges on content delivery technologies It is desirable to deliver contents in their best quality based on the nature of the contents network connections and client devices This book aims at providing a snapshot of the state of the art research and

development activities on web content delivery and laying the foundations for future web applications The book focuses on four main areas 1 web content delivery 2 dynamic web content 3 streaming media delivery and 4 ubiquitous web access It consists of 17 chapters written by leading experts in the field The book is designed for a professional audience including academic researchers and industrial practitioners who are interested in the most recent research and development activities on web content delivery

NPC 2004 International Federation for Information Processing, 2004-10-06 This book constitutes the refereed proceedings of the IFIP International Conference on Network and Parallel Computing NPC 2004 held in Wuhan China in October 2004 Also included are selected refereed papers from two workshops associated with NPC 2004 The 46 revised full papers and 23 revised short papers presented together with abstracts of 5 invited presentations were selected from a total of 338 submissions The 25 workshop revised papers included also were carefully reviewed and selected from numerous submissions The papers are organized in topical sections on grid computing peer to peer computing Web techniques cluster computing parallel programming environments network architecture network security network storage intelligent sensor networks and multimedia modeling and security in next generation network information systems

Networks, The Proceedings Of The Joint International Conference On Wireless LANS And Home Networks (ICWLHN 2002) & Networking (ICN 2002) Benny Bing, Pascal Lorenz, 2002-08-08 The joint conference ICWLHN 2002 and ICN 2002 covers a wide variety of technical sessions covering all aspects of networking technology It features some of the world's most dynamic presenters including leading experts such as Norman Abramson inventor of the first access protocol the ALOHA protocol and Daniel Awduche pioneer of the MPLambdaS concept now referred to as GMPLS The proceedings for this joint conference is accessible to engineers practitioners scientists as well as industry professionals from manufacturers to service providers

EUC 2004 Laurence T. Yang, 2004-08-18 This book constitutes the refereed proceedings of the International Conference on Embedded and Ubiquitous Computing EUC 2004 held in Aizu Wakamatsu City Japan in August 2004 The 104 revised full papers presented were carefully reviewed and selected from more than 260 submissions The papers are organized in topical sections on embedded hardware and software real time systems power aware computing hardware software codesign and systems on chip mobile computing wireless communication multimedia and pervasive computing agent technology and distributed computing network protocols security and fault tolerance and middleware and peer to peer computing

Tactical Wireless Communications and Networks George F. Elmasry, 2012-10-10 Providing a complete description of modern tactical military communications and networks technology this book systematically compares tactical military communications techniques with their commercial equivalents pointing out similarities and differences In particular it examines each layer of the protocol stack and shows how specific tactical and security requirements result in changes from the commercial approach The author systematically leads readers through this complex topic firstly providing background on the architectural approach upon which the analysis will be based and then going into detail on tactical wireless

communications and networking technologies and techniques Structured progressively for readers needing an overall view for those looking at the communications aspects lower layers of the protocol stack and for users interested in the networking aspects higher layers of the protocol stack Presents approaches to alleviate the challenges faced by the engineers in the field today Furnished throughout with illustrations and case studies to clarify the notional and architectural approaches Includes a list of problems for each chapter to emphasize the important aspects of the topics covered Covers the current state of tactical networking as well as the future long term evolution of tactical wireless communications and networking in the next 50 years Written at an advanced level with scope as a reference tool for engineers and scientists as well as a graduate text for advanced courses

Scalable Continuous Media Streaming Systems Jack Lee, 2005-11-01 Continuous media streaming systems will shape the future of information infrastructure The challenge is to design systems and networks capable of supporting millions of concurrent users Key to this is the integration of fault tolerant mechanisms to prevent individual component failures from disrupting systems operations These are just some of the hurdles that need to be overcome before large scale continuous media services such as video on demand can be deployed with maximum efficiency The author places the subject in context drawing together findings from the past decade of research whilst examining the technology's present status and its future potential The approach adopted is comprehensive covering topics notably the scalability and fault tolerance issues that previously have not been treated in depth Provides an accessible introduction to the technology presenting the basic principles for media streaming system design focusing on the need for the correct and timely delivery of data Explores the use of parallel server architectures to tackle the two key challenges of scalability and fault tolerance Investigates the use of network multicast streaming algorithms to further increase the scalability of very large scale media streaming systems Illustrates all findings using real world examples and case studies gleaned from cutting edge worldwide research Combining theory and practice this book will appeal to industry specialists working in content distribution in general and continuous media streaming in particular The introductory materials and basic building blocks complemented by amply illustrated more advanced coverage provide essential reading for senior undergraduates postgraduates and researchers in these fields
