This revised and updated second edition details the vast progress that has been achieved in the understanding of the physical mechanisms of rogue wave phenomenon in recent years. The selected articles address such issues as the formation of rogue waves due to modulational instability of nonlinear wave fields, physical and statistical properties of extreme ocean wave generation in deep water as well as in shallow water, various models of nonlinear water waves, special analysis of nonlinear resonances between water waves, and the relation between in situ observations, experimental data, and rogue wave theories. In addition, recent results on tsunami waves due to subaerial landslides are presented. This book is written for specialists in the fields of fluid mechanics, applied mathematics, nonlinear physics, physical oceanography, and geophysics, and for students learning these subjects.

Ocean Beach Storm Damage Reduction Feasibility Study, City and County of San Francisco, CA. United States Army. Corps of Engineers. San Francisco District, 1996. The report presents information developed in the course of a multi-year investigation of the need for shore protection and storm damage reduction. The study area was 8.6 miles of the Pacific coast known as Ocean Beach in the City of San Francisco, CA. The study area extended from Cliff House to Fort Funston. The beach portion of the study area is in the Golden Gate National Recreation Area under the jurisdiction of the National Park Service. Facilities threatened with damage included the Great Highway parking lots of the GGNRA, a buried storm and sewer water transport box, a sewer pumping plant, and ultimately houses and businesses. The report records the Ocean Engineering

Economic and Geotechnical studies used to formulate and analyze a variety of alternative measures including structural seawalls and revetments as well as beach and dune nourishment The final analysis indicated that most of the study area while not absolutely safe had a low probability of erosion In the one area with a possible federal interest the sponsor was unable to agree to cost share at the time of the report Therefore the study was terminated The sponsor will pursue other measures not requiring federal cost sharing
