## **Online Shadows Architecture Afterlife Nicholas Hawksmoor:**

From the Shadows Owen Hopkins, 2015-11-15 Nicholas Hawksmoor 1662 1736 is one of English history's greatest architects outshone only by Christopher Wren under whom he served as an apprentice. A major figure in his own time, he was involved in nearly all the grandest architectural projects of his age and he is best known for his London churches, six of which still stand today. Hawksmoor wasn't always appreciated; however, for decades after his death, he was seen as at best a second-rate talent. From the Shadows tells the story of the resurrection of his reputation, showing how over the years his work was ignored, abused, and altered, and finally recovered and celebrated. It is a story of the triumph of talent and of the power of appreciative admirers like T. S. Eliot, James Stirling, Robert Venturi, and Peter Ackroyd, all of whom played a role in the twentieth-century recovery of Hawksmoor's reputation.

London's 'Big Bang' Moment and its Architectural Conversations Stephen Rosser, 2025-06-30 This book explores the topic of architecture as a component of public discourse, focussing on the reception of four high-profile developments in the City of London, the UK capital's financial district, dating from the final years of the twentieth century. During this time, the City's mode of operation, culture, and built environment were all transformed as a result of the market deregulation process labelled 'Big Bang'. It was also a period which saw the subject of architecture attracting public and media attention, becoming a prominent feature of national conversation. The book examines the extensive and often contentious discourse generated by the four case study projects. It looks at how these projects were viewed and interpreted retrospectively when they had become part of the City's long and rich history. Topics explored include building and urban form on the eve of the millennium, the place of new development in a setting of unique historic importance, the iconic building and celebrity architect, and the role of then Prince Charles as an architectural critic. Also referenced are many of the broader issues of the day, including the Thatcher government policies and the preoccupations concerning London's infrastructure, public realm, inner city areas, and inequalities. Furthermore, ranging across the discourse is the theme of the relationship between buildings and global finance, foreshadowing later controversies concerning London's post-millennial towers and their impact on the capital's skyline. The book will be of interest to researchers and students of late twentieth-century British architecture and urban development, London's history, and UK public discourse in the 1980s, a decade of profound political, economic, and social change.
