Zubok, 2021-11-30 A major study of the collapse of the Soviet Union showing how Gorbachev's misguided reforms led to its demise A deeply informed account of how the Soviet Union fell apart Rodric Braithwaite Financial Times A masterly analysis Joshua Rubenstein Wall Street Journal In 1945 the Soviet Union controlled half of Europe and was a founding member of the United Nations By 1991 it had an army four million strong with five thousand nuclear tipped missiles and was the second biggest producer of oil in the world But soon afterward the union sank into an economic crisis and was torn apart by nationalist separatism Its collapse was one of the seismic shifts of the twentieth century Thirty years on Vladislav Zubok offers a major reinterpretation of the final years of the USSR refuting the notion that the breakup of the Soviet order was inevitable Instead Zubok reveals how Gorbachev's misguided reforms intended to modernize and democratize the Soviet Union deprived the government of resources and empowered separatism *Collapse* sheds new light on Russian democratic populism the Baltic struggle for independence the crisis of Soviet finances and the fragility of authoritarian state power *Flowers Through Concrete* Juliane Fürst, 2021-03-11 *Flowers through Concrete* Explorations in Soviet Hippieland does what the title promises It takes readers on a journey into a world few knew existed the lives and thoughts of Soviet hippies who in the face of disapproval and repression created a version of Western counterculture skilfully adapting manipulating and shaping it to their late socialist environment As a quasi guide into the underground hippieland readers are situated in the world of hippies firmly in late Soviet reality and are offered an unusual history of the last Soviet decades as well as a case study in the power of transnational youth cultures *Flowers through Concrete* recounts not only a compelling story of survival against the odds hippies were harassed by police shorn of their hair by civilian guards and confined in psychiatric hospitals by doctors who believed non conformism was a symptom of schizophrenia It also advances a surprising argument despite obvious antagonism the land of Soviet hippies and the world of late socialism were not incompatible Indeed Soviet hippies and late socialist reality meshed so well that the hostile yet stable relationship that emerged was in many ways symbiotic Ultimately it was not the KGB but the arrival of capitalism in the 1990s that ended the Soviet hippie sistema *World Yearbook of Education 2026* Katja Brøgger, Hannah Moscovitz, Susan L. Lee, 2025-10-31 *World Yearbook of Education 2026* discusses the shifting geopolitics of Higher Education directly engaging with an urgent call to theorize the academy as a site of power politics protest and possibility The volume brings together leading and new generations of thinkers from across the globe who draw on theoretical resources from sociology politics international relations geography gender studies cultural studies and post and decolonial studies Taken together the chapters show how these epistemic resources can help us understand the current state of affairs in higher education and beyond They reflect key dimensions of shifting geopolitics and their impact on higher education multipolar superpower rivalry autocratic populism decolonial justice and digital transformations By anchoring the study of higher

education in prevailing geopolitical tensions the volume seeks to uncover the critical role of the university in contemporary global politics By exploring higher education as a central institution caught within competing visions of world order one rooted in international cooperation another asserting the nation state and yet another challenging the very notion of the university as territorially fixed the book offers a perspective on the university which is in line with pivotal global developments It is a must read book for anyone interested in the new geopolitics of higher education and the future of the university globally

Reconstructing Lenin Tamás Krausz, 2015-02-27 Vladimir Ilyich Lenin is among the most enigmatic and influential figures of the twentieth century While his life and work are crucial to any understanding of modern history and the socialist movement generations of writers on the left and the right have seen fit to embalm him endlessly with superficial analysis or dreary dogma Now after the fall of the Soviet Union and actually existing socialism it is possible to consider Lenin afresh with sober senses trained on his historical context and how it shaped his theoretical and political contributions *Reconstructing Lenin* four decades in the making and now available in English for the first time is an attempt to do just that Tam s Krausz an esteemed Hungarian scholar writing in the tradition of Gy rgy Luk cs Ferenc Tokei and Istv n M sz ros makes a major contribution to a growing field of contemporary Lenin studies This rich and penetrating account reveals Lenin busy at the work of revolution his thought shaped by immediate political events but never straying far from a coherent theoretical perspective Krausz balances detailed descriptions of Lenin s time and place with lucid explications of his intellectual development covering a range of topics like war and revolution dictatorship and democracy socialism and utopianism *Reconstructing Lenin* will change the way you look at a man and a movement it will also introduce the English speaking world to a profound radical scholar

Gissurarson, In the 20th century communism claimed the lives of at least 100 million people But often it is regarded with more sympathy than the other deadly totalitarian creed national socialism Despite several plausible accounts of famines mass executions labour camps and oppression many Western intellectuals were either supporters or fellow travellers of the communists This illustrated report is about some of the most noteworthy books travelogues novels memories and historical treatises that came out in the great struggle between totalitarian communism and liberal democracy from the 1917 Bolshevik Revolution onwards

The Art and Science of Making the New Man in Early 20th-Century Russia Yvonne Howell, Nikolai Kremmentsov, 2021-12-02 The idea that morally mentally and physically superior new men might replace the currently existing mankind has periodically seized the imagination of intellectuals leaders and reformers throughout history This volume offers a multidisciplinary investigation into how the new man was made in Russia and the early Soviet Union in the first third of the 20th century The traditional narrative of the Soviet new man as a creature forged by propaganda is challenged by the strikingly new and varied case studies presented here The book focuses on the interplay between the rapidly developing experimental life sciences such as biology medicine and psychology and countless cultural products ranging from film and fiction dolls and museum exhibits to

pedagogical projects sculptures and exemplary agricultural fairs With contributions from scholars based in the United States Canada the UK Germany and Russia the picture that emerges is emphatically more complex contradictory and suggestive of strong parallels with other new man visions in Europe and elsewhere In contrast to previous interpretations that focused largely on the apparent disconnect between utopian new man rhetoric and the harsh realities of everyday life in the Soviet Union this volume brings to light the surprising historical trajectories of new man visions their often obscure origins acclaimed and forgotten champions unexpected and complicated results and mutual interrelations In short the volume is a timely examination of a recurring theme in modern history when dramatic advancements in science and technology conjoin with anxieties about the future to fuel dreams of a new and improved mankind **The White Nights** Boris Sokoloff,1959

CSA Political Science & Government, 2005 **The Autobiography of W. E. B. DuBois** W. E. B. Du Bois, 2013-09-01

The present volume is quite different from the other two autobiographies by Du Bois not only because of its additional two decade span and the significantly altered outlook of its author but also because in it unlike the others he seeks as he writes to review my life as frankly and fully as I can Of course with the directness and honesty which so decisively characterized him he reminds the reader of this book of the intense subjectivity that inevitably permeates autobiography hence he writes he offers this account of his life as he understood it and as he would like others to believe it to have been Certainly while Dr Du Bois was deep in his ninth decade when he died longevity was the least remarkable feature of his life As editor author lecturer scholar organizer inspirer and fighter he was among the most consequential figures of the twentieth century Necessarily therefore the full and final accounting of that life and his times becomes an indispensable volume
