illustrates how sound is put to use within modes of composition installation and performance While chronological in its structure Brandon LaBelle's book is informed by spatial thinking weaving architecture environments and the specifics of location into the work of sound with the aim of formulating an expansive history and understanding of sound art At its center the book presupposes an intrinsic relation between sound and its location galvanizing acoustics sound phenomena and the environmental with the tensions inherent in what LaBelle identifies as sound's relational dynamic For the author this is embedded within sound's tendency to become public expressed in its ability to travel distances foster cultural expression and define spaces while being radically flexible This second expanded edition includes a new chapter on the non human and subnatural tendencies in sound art revisions to the text as well as a new preface by the author Intersecting material analysis with theoretical frameworks spanning art and architectural theory performance studies and media theory Background Noise makes the case that sound and sound art are central to understandings of contemporary culture Music Worlding in Palau Birgit Abels, 2025-10-01 Music Worlding in Palau Chanting Atmospheres and Meaningfulness is a detailed study of the performing arts in Palau Micronesia as holistic techniques enabling the experiential corporeality of music's meaningfulness that distinctly musical way of making sense of the world with which the felt body immediately resonates but which to a significant extent escapes interpretive techniques Drawing on long term ethnographic research alongside Pacific Islander and neo phenomenological conceptual frameworks Music Worlding in Palau distinguishes between meaning's and meaningfulness in Palauan music making These are not binary phenomena but deeply intertwined However unlike meaning's meaningfulness to a significant extent suspends language and is thus often prematurely considered ineffable The book proposes a broader understanding of how the performing arts give rise to a sense of meaningfulness whose felt bodily affectivity is pivotal to music making and lived realities Music Worlding in Palau thus seeks to draw the reader closer to the holistic complexity of music making both in Palau and more generally **Geosonics** Joshua Dittrich, 2024-08-08 How do we listen to the earth That is the central question posed in Geosonics Listening Through Earth's Soundscapes Working across sound studies media theory and environmental media studies Joshua Dittrich explores the material and metaphorical geology of the sonic environment In an epoch of climate crisis environment is no longer a neutral background site or simple surrounding environment is immanently implicated in the chains of mediation that make up the material and imaginative infrastructure of our lives The analytical task of Geosonics is to tune into that infrastructure through sound Drawing on influential work in sound studies around the concept of transduction this book explores how listening does not take place in a pre existing soundscape but rather makes place by etching out a mediated mutually constitutive set of relations between listeners media and environments The Routledge Companion to Mobile Media Art Larissa Hjorth, Adriana de Souza e Silva, Klare Lanson, 2020-07-28 In this companion a diverse international and interdisciplinary group of contributors and editors examine the rapidly expanding far reaching field of mobile media as it intersects with art across a range of spaces

theoretical practical and conceptual As a vehicle for and of the everyday mobile media is recalibrating the relationship between art and digital networked media and reshaping how creative practices such as writing photography video art and filmmaking are being conceptualized and practised In exploring these innovations The Routledge Companion to Mobile Media Art pulls together comprehensive culturally nuanced and interdisciplinary approaches considerations of broader media ecologies and histories and political social and cultural dynamics and critical and considered perspectives on the intersections between mobile media and art This book is the definitive publication for researchers artists and students interested in comprehending all the various aspects of mobile media art covering digital media and culture internet studies games studies anthropology sociology geography media and communication cultural studies and design **Non-humans in Social Science** Petr Gibas,Karolína Pauknerová,Marco Stella,2012-04-01 Ideas of dead inert space non living machinelike reflexive controlled bodies and passive meaningless things are very modern At the very heart of the program of modernity resource exploitation and consumption is the idea that non humans have no agency they are simply resources to be manipulated and exploited at our will Mostly leaving aside the more and more evident ethical concerns of this worldview and this setting of the human non human boundary this volume attempts to explore what social sciences have to say about the relationship between the human and non human The intention of this book is to offer a non human perspective We realize that it is sometimes difficult to say whether the outcome of such a perspective would be just a shallow tendency to anthropomorphize or whether we could reach some of the previously unseen properties of non humans Being aware of the dangers this volume puts together different case studies that are more or less inspired by this non human perspective The aim is to explore what has been for a long time put aside and to provide new insights new revelations that can lead social science to undiscovered or hidden realms The outcome of this thrilling adventure can in the end be a discovery that the role of natural and social sciences or even more the character of the nature culture dichotomy would have to be re evaluated
