**Brownian Motion and Molecular Reality** George E. Smith, Raghav Seth, 2020 Between 1905 and 1913 French physicist Jean Perrin's experiments on Brownian motion ostensibly put a definitive end to the long debate regarding the real existence of molecules proving the atomic theory of matter While Perrin's results had a significant impact at the time later examination of his experiments questioned whether he really gained experimental access to the molecular realm In this case study in the history and philosophy of science George E Smith and Raghav Seth here argue that despite doubts Perrin's measurements were nevertheless exemplars of theory mediated measurement the practice of obtaining values for an inaccessible quantity by inferring them from an accessible proxy via theoretical relationships between them They argue that it was actually Perrin more than any of his contemporaries who championed this approach during the years in question **Literature**

**Recommendations: Industrial Technical Library** United States. International Cooperation Administration. Office of Industrial Resources, 1960 **Uneven Roads** Todd Shaw, Louis DeSipio, Dianne Pinderhughes, Lorrie Frasure, Toni-Michelle C. Travis, 2024-01-12 Uneven Roads helps students grasp how when and why race and ethnicity matter in U S politics Using the metaphor of a road with twists turns and dead ends this incisive text takes students on a journey to understanding political racialization and the roots of modern interpretations of race and ethnicity The book's structure and narrative are designed to encourage comparison and reflection Students critically analyze the history and context of U S racial and ethnic politics to build the skills needed to draw their own conclusions In the Third Edition of this groundbreaking text authors Shaw DeSipio Pinderhughes Frasure and Travis bring the historical narrative to life by addressing the most contemporary debates and challenges affecting U S racial and ethnic politics Students will explore important issues regarding voting rights political representation education and criminal justice policies and the immigrant experience **Library Journal**, 1962

*The Library Journal*, 1999 Includes beginning Sept 15 1954 and on the 15th of each month Sept May a special section School library journal ISSN 0000 0035 called Junior libraries 1954 May 1961 Also issued separately **The Sustainable Economics of Elinor Ostrom** Derek Wall, 2014-02-24 Elinor Ostrom's Nobel Prize winning work on common pool property rights has implications for some of the most pressing sustainability issues of the twenty first century from tackling climate change to maintaining cyberspace In this book Derek Wall critically examines Ostrom's work while also exploring the following questions is it possible to combine insights rooted in methodological individualism with a theory that stresses collectivist solutions Is Ostrom's emphasis on largely local solutions to climate change relevant to a crisis propelled by global factors This volume situates her ideas in terms of the constitutional analysis of her partner Vincent Ostrom and wider institutional economics It outlines her key concerns including a radical research methodology commitment to indigenous people and the concept of social ecological systems Ostrom is recognised for producing a body of work which demonstrates how people can construct rules that allow them to exploit the environment in an ecologically sustainable way without the

need for governmental regulation and this book argues that in a world where ecological realities increasingly threaten material prosperity such scholarship provides a way of thinking about how humanity can create truly sustainable development Given the inter disciplinary nature of Ostrom s work this book will be relevant to those working in the areas of environmental economics political economy political science and ecology **Princeton Alumni Weekly** ,1939 *Controls and Art* Amy LaViers,Magnus Egerstedt,2014-01-23 Dancing humanoids robotic art installations and music generated by mathematically precise methods are no longer science fiction in fact they are the subject of this book This first of its kind anthology assembles technical research that makes such creations possible In order to mechanize something as enigmatic and personal as dance researchers must delve deeply into two distinct academic disciplines control theory and art Broadly this research uses techniques from the world of art to inspire methods in control enables artistic endeavours using advanced control theory and aids in the analysis of art using metrics devised by a systems theoretic approach To ensure that artistic influences are well represented the individual chapters are focused so that they relate their contribution to the arts meaningfully and explicitly Specially composed introductions set up the contributions either in terms of inspiration by artistic principles or their contribution to the arts through new analysis tools To facilitate this the majority of the chapters are authored jointly by experts in control theory and by artists including dancers choreographers puppeteers and painters Connections between controls and art then permeate the text so that these important relationships play a central role in the book *Controls and Art* surveys current projects in this area including a disco dancing robot a reactive museum exhibit and otherworldly music and illuminates open problems and topics for research in this emerging interdisciplinary field It will draw attention both from experts in robotics and control interested in developing the artistic side of their creations and from academics studying dance theater music and the visual arts with an interest in avant garde means of production **Recent Advances in Nonlinear Dynamics and Synchronization** Kyandoghere Kyamakya,Wolfgang Mathis,Ruedi Stoop,Jean Chamberlain Chedjou,Zhong Li,2017-07-25 This book focuses on modelling and simulation control and optimization signal processing and forecasting in selected nonlinear dynamical systems presenting both literature reviews and novel concepts It develops analytical or numerical approaches which are simple to use robust stable flexible and universally applicable to the analysis of complex nonlinear dynamical systems As such it addresses key challenges are addressed e g efficient handling of time varying dynamics efficient design faster numerical computations robustness stability and convergence of algorithms The book provides a series of contributions discussing either the design or analysis of complex systems in sciences and engineering and the concepts developed involve nonlinear dynamics synchronization optimization machine learning and forecasting Both theoretical and practical aspects of diverse areas are investigated specifically neurocomputing transportation engineering theoretical electrical engineering signal processing communications engineering and computational intelligence It is a valuable resource for students and researchers interested in nonlinear dynamics and

synchronization with applications in selected areas      *Revolutionary Art and Politics in Egypt* Rounwah Adly Riyadh Bseiso, 2023-01-26 This book examines the role of artists in Egypt during the 2011 revolution when street art from graffiti to political murals became ubiquitous facets of revolutionary spaces Through interviews personal testimonies and accounts of the lived experience of 25 street artists the book explores the meaning of art in revolutionary political contexts specifically by focusing on artistic production during liminal moments as the events of the Egyptian revolution unfolded The author privileges the perspective of the actors themselves to examine the ways that artists reacted to events and conceived of their art as means to further the goals of the revolution Based on fieldwork conducted in the years since 2011 the book provides a narrative of Egyptian artists participation in and representations of the revolution from hopeful beginnings to the subsequent crackdown and election of al Sisi      A Materialist Theory of Justice George Sotiropoulos, 2019-03-13 A Materialist Theory of Justice offers an innovative re reading of justice that draws from diverse theoretical currents tracing in the process an age old tradition of critical thought Raising the banner of materialism against idealist conceptions justice is conceived as a multiple process which emerges in the dynamic reproduction and interaction of material bodies Mapping out its presence on non human fields justice is then shown to attain in human beings the status of a contentious problem and a productive desire which is related to the pursuit of a good life and is also determinative of human history The theorization enlarges the scope of the notion by incorporating a wide spectrum of phenomena from animal forms of sociality and activity to revolution empire civil war up to and including the riots that spread out in the world today In this way the book also manages to extend beyond the disciplinary boundaries of normative political theory within which theories of justice are usually logged and enter a productive discussion with various currents of critical thought      **Christian Tourist Attractions, Mythmaking, and Identity Formation** Erin Roberts, Jennifer Eyl, 2018-11-29 *Christian Tourist Attractions Mythmaking and Identity Formation* examines a sampling of contemporary Christian tourist attractions that position visitors as the inheritors of ancient sacred traditions and make claims about the truth of the historical narratives that they promote Rather than approaching these attractions as sacred expressions of religious experience or as uncontested accounts of history the book applies recent work on mythmaking and identity formation to argue that these presentations of the past function as strategic discourses that serve material concerns in the present From an approach informed by social and materialist theories of religion the volume draws upon a variety of methodological approaches that enable readers to understand the often bewildering array of objects claims demands and activities not to mention the seemingly endless array of gifts and personal items available for purchase that appear at attractions including Ark Encounter the Creation Museum the Holy Land Experience Bible Walk Museum Christian Zionist tours of Israel and the recently opened Museum of the Bible Discourse analysis practice theory rhetorical criticism and embodied theories of cognition help make sense not only of the Christian tourist attractions under examination but also of the ways that religion is entangled with contemporary social political and economic interests more broadly

Learning from Logistics Clare Lyster, 2016-02-22 In the 19th century railroads and canals provided both structure and motor for city development This role has been taken over today by the global flow of data and products as the author argues Flow of material and communication is the DNA of contemporary environments This development has enormous and partially unfathomable implications for our city fabric Logistics networks and their complex structure increasingly bear upon many urban spheres Counter trends to the ubiquitous internet retail trade to name one of the most palpable phenomena are gaining momentum as well exemplified by the criticism of labor conditions in e commerce and the trend to buy regional products from local stores The author describes the current development and its impact on architecture landscape architecture and urbanism Aspects such as today s hypermobility of both products and people have repercussions in design work and create new paradigms for architecture and urban design Concepts for the integration of these new issues are introduced by a number of exemplary urban design projects

Jones Jr.,Shane Vogel,2020-08-10 The contributors to Race and Performance after Repetition explore how theater and performance studies account for the complex relationship between race and time Pointing out that repetition has been the primary point of reference for understanding both the complex temporality of theater and the historical persistence of race they identify and pursue critical alternatives to the conceptualization organization measurement and politics of race in performance The contributors examine theater performance art music sports dance photography and other forms of performance in topics that range from the movement of boxer Joe Louis to George C Wolfe s 2016 reimagining of the 1921 all black musical comedy Shuffle Along to the relationship between dance mourning and black adolescence in Flying Lotus s music video Never Catch Me Proposing a spectrum of coexisting racial temporalities that are not tethered to repetition this collection reconsiders central theories in performance studies in order to find new understandings of race Contributors Joshua Chambers Letson Soyica Diggs Colbert Nicholas Fesette Patricia Herrera Jasmine Elizabeth Johnson Douglas A Jones Jr Mario LaMothe Daphne P Lei Jisha Menon Tavia Nyong o Tina Post Elizabeth W Son Shane Vogel Catherine M Young Katherine Zien      **The Zero Marginal Cost Society** Jeremy Rifkin,2014-04-01 The New York Times bestselling author describes how current trends will create an era when anything and everything is available for almost nothing In The Zero Marginal Cost Society New York Times bestselling author Jeremy Rifkin uncovers a paradox at the heart of capitalism that has propelled it to greatness but is now taking it to its death the inherent entrepreneurial dynamism of competitive markets that drives productivity up and marginal costs down enabling businesses to reduce the price of their goods and services in order to win over consumers and market share Marginal cost is

the cost of producing additional units of a good or service if fixed costs are not counted While economists have always welcomed a reduction in marginal cost they never anticipated the possibility of a technological revolution that might bring marginal costs to near zero making goods and services priceless nearly free and abundant and no longer subject to market forces Now a formidable new technology infrastructure the Internet of things IoT is emerging with the potential of pushing large segments of economic life to near zero marginal cost in the years ahead Rifkin describes how the Communication Internet is converging with an Energy Internet and Logistics Internet to create a new technology platform that connects all There are billions of sensors feeding Big Data into an IoT global neural network Prosumers can connect to the network and use Big Data analytics and algorithms to accelerate efficiency dramatically increase productivity and lower the marginal cost of producing and sharing a wide range of products and services to near zero just like they now do with information goods The plummeting of marginal costs is spawning a hybrid economy part capitalist market and part Collaborative Commons with far reaching implications for society according to Rifkin Hundreds of millions of people are already transferring parts of their economic lives to the global Collaborative Commons Prosumers are plugging into the IoT and making and sharing their own information entertainment green energy and 3D printed products at near zero marginal cost Students are enrolling in free massive open online courses MOOCs that operate at near zero marginal cost Social entrepreneurs are even bypassing the banking establishment and using crowdfunding to finance startup businesses as well as creating alternative currencies in the fledgling sharing economy In this new world social capital is as important as financial capital access trumps ownership sustainability supersedes consumerism cooperation ousts competition and exchange value in the capitalist marketplace is increasingly replaced by sharable value on the Collaborative Commons Rifkin concludes that capitalism will remain with us albeit in an increasingly streamlined role primarily as an aggregator of network services and solutions allowing it to flourish as a powerful niche player in the coming era We are however says Rifkin entering a world beyond markets where we are learning how to live together in an increasingly interdependent global Collaborative Commons
