An Analysis of Elaine Tyler May's *Homeward Bound* Jarrod Homer, 2017-07-05 Elaine Tyler May's 1988 *Homeward Bound* American Families in the Cold War Era is a ground breaking piece of historical and cultural analysis that uses its findings to build a strong argument for its author's view of the course of modern US history. The aim of May's study is to trace the links between Cold War politics and the domestic lives of everyday American families at the time. Historians have long noted the unique domestic trends of 1950s America with its increased focus on the nuclear family, neatly divided traditional gender roles and aspirational suburban consumer lifestyles. May's contribution was to analyse the interplay between the domestic scene and the political ideologies of American government and then to build a carefully constructed argument that draws attention to the ways in which these seemingly disparate forces are in fact related. May's key achievement was to use her analytical skills to understand the relationships between these different factors. She traced ways in which domestic life and US foreign policy mirrored one another showing that the structures and processes they aimed for while different in scale were essentially the same. She then carefully brought together different types of historical data organizing her study to produce a carefully reasoned argument that the American suburban home was in certain direct ways the product of the containment policies that ruled American foreign policy at the time. Internet Culture David Porter, 2013-09-13 The internet has recently grown from a fringe cultural phenomenon to a significant site of cultural production and transformation. *Internet Culture* maps this new domain of language, politics and identity locating it within the histories of communication and the public sphere. *Internet Culture* offers a critical interrogation of the sustaining myths of the virtual world and of the implications of the current mass migration onto the electronic frontier. Among the topics discussed in *Internet Culture* are the virtual spaces and places created by the citizens of the Net and their claims to the hotly contested notion of virtual community, the virtual bodies that occupy such spaces and the desires that animate these bodies. The contributors also examine the communication medium behind the worlds of the Net analyzing the rhetorical conventions governing online discussion, literary antecedents and potential pedagogical applications. *Feminist Connections* Katherine Fredlund, Kerri Hauman, Jessica Ouellette, 2020-09-29 Highlights feminist rhetorical practices that disrupt and surpass boundaries of time and space. In 1917 Alice Paul and other suffragists famously picketed in front of the White House while holding banners with short pithy sayings such as 'Mr President How long must women wait for Liberty'. Their juxtaposition of this short phrase with the image of the White House, a symbol of liberty and justice, relies on the same rhetorical tactics as memes, a genre contemporary feminists use frequently to make arguments about reproductive rights, Black Lives Matter, sex positivity and more. Many such connections between feminists of different spaces, places and eras have yet to be considered, let alone understood. *Feminist Connections: Rhetoric and Activism across Time, Space and Place* reconsiders feminist rhetorical strategies as linked intergenerational and surprisingly consistent despite the emergence of new forms of media.

and intersectional considerations Contributors to this volume highlight continuities in feminist rhetorical practices that are often invisible to scholars obscured by time new media and wildly different cultural political and social contexts Thus this collection takes a nonchronological approach to the study of feminist rhetoric grouping chapters by rhetorical practice rather than time content or choice of media By connecting historical contemporary and future trajectories this collection develops three feminist rhetorical frameworks revisionary rhetorics circulatory rhetorics and response rhetorics A theorization of these frameworks explains how feminist rhetorical practices past and present rely on similar but diverse methods to create change and fight oppression Identifying these strategies not only helps us rethink feminist rhetoric from an academic perspective but also allows us to enact feminist activist rhetorics beyond the academy during a time in which feminist scholarship cannot afford to remain behind its hallowed yet insular walls

Offering present-day reflections alongside the fresh, hopeful voice of the twenty-year-old student she once was, Laura Gray-Rosendale tells the story of her near destruction and her family's disintegration but also one of abiding friendships and shining hope. In the end, *College Girl* is also a story about stories and a meditation on memoir itself. Gray-Rosendale writes in a tone that is simply unforgettable: gritty, humorous, and raw. Artfully written and devoid of self-pity, *College Girl* is a rich story of triumph, hope, and survival.

Empire of the Air Jenifer Van Vleck, 2013-11-01 Jenifer Van Vleck's fascinating history reveals the central role commercial aviation played in the United States' ascent to global preeminence in the twentieth century. As U.S. military and economic influence grew, the federal government partnered with the aviation industry to deliver American power across the globe and to sell the idea of the American Century to the public at home and abroad. The airplane promised to extend the frontiers of the United States to infinity as Pan American World Airways president Juan Trippe said. As it accelerated the global circulation of U.S. capital, consumer goods, technologies, weapons, popular culture, and expertise, few places remained distant from Wall Street and Washington. Aviation promised to secure a new type of empire: an empire of the air instead of the land, which emphasized access to markets rather than the conquest of territory and made the entire world America's sphere of influence. By the late 1960s, however, foreign airlines and governments were challenging America's control of global airways, and the domestic aviation industry hit turbulent times. Just as the history of commercial aviation helps to explain the ascendance of American power, its subsequent challenges reflect the limits and contradictions of the American Century.

The Nursing Clio Reader The Nursing Clio Editorial Collective, 2025-09-09 A powerful resource for classrooms and individual readers alike, *The Nursing Clio Reader* invites reflection on how the past informs current debates, urging us to engage deeply with the history of reproductive justice in a time of unprecedented change.

A Destiny of Choice? David Blanke, David Steigerwald, 2013-02-21 In the twentieth century, Americans thought of the United States as a land of opportunity and equality. To what extent and for whom this was true was of course a matter of debate, however. Especially during the Cold War, many Americans clung to the patriotic conviction that America was the land of the free. At the same time, another national ideal emerged that was far less contentious: that arguably came to subsume the ideals of freedom, opportunity, and equality, and that eventually embodied an unspoken consensus about what constitutes the good society in a postmodern setting. This was the ideal of choice, broadly understood as the proposition that the good society provides

individuals with the power to shape the contours of their lives in ways that suit their personal interests idiosyncrasies and tastes By the closing decades of the century Americans were widely agreed that theirs was or at least should be the land of choice In *A Destiny of Choice* David Blanke and David Steigerwald bring together important scholarship on the tension between two leading interpretations of modern American consumer culture That modern consumerism reflects the social cultural economic and political changes that accompanied the country's transition from a local producer economy dominated by limited choices and restricted credit to a national consumer marketplace based on the individual selection of mass produced mass advertised and mass distributed goods This debate is central to the economic difficulties seen in the United States today
