**Advances in Multimedia, Software Engineering and Computing Vol.1** David Jin, Sally Lin, 2011-11-23 MSEC2011 is an integrated conference concentrating its focus upon Multimedia, Software Engineering, Computing, and Education. In the proceeding, you can learn much more knowledge about Multimedia, Software Engineering, Computing, and Education of researchers all around the world. The main role of the proceeding is to be used as an exchange pillar for researchers who are working in the mentioned field. In order to meet high standard of Springer AISC series, the organization committee has made their efforts to do the following things: Firstly, poor quality paper has been refused after reviewing course by anonymous referee experts. Secondly, periodically review meetings have been held around the reviewers about five times for exchanging reviewing suggestions. Finally, the conference organization had several preliminary sessions before the conference. Through efforts of different people and departments, the conference will be successful and fruitful.

*Rethinking the Environmental Impacts of Renewable Energy* Alexander Clarke, 2016-08-25 Renewable energy is important as a substitute for finite fossil fuels and inflexible nuclear power and could conceivably power the world. However, this is challenging as the world is currently 80% dependent on fossil fuels and

renewable sources produce only about 15% of total energy Conversion technologies for use with many of the eight different primary sources of renewable energy are only just emerging as viable technologies While renewable energy sources will not run out and their use involves little or no release of carbon dioxide or ionising wastes they do have local environmental impacts of their own This book analyses the nature of environmental impacts from renewable sources A novel method of assessing impacts is explored based on a set of parameters centred on how diffuse or concentrated the energy flow is The approach that is developed will inform engineers designers policy makers and planners as well as researchers in the area

**Fundamentals of Plan Making** Edward J. Jepson, Jr., Jerry Weitz, 2015-12-07 Urban and regional planning programs aspire to prepare practitioners to write and implement plans primarily at the local level of government. These programs are very much professional in their aspirations as opposed to research oriented. Yet academic planning programs often place greater emphasis on theory than practice. For decades the planning academy has acknowledged a major disconnect between what the planning academy teaches students and the techniques and skills needed to be a successful professional practitioner. **Fundamentals of Plan Making** will give planning students an understanding of research design as it applies to planning, develop familiarity with various data sources and help them acquire knowledge and the ability to conduct basic planning analyses such as population projections, housing needs assessments, development impact analyses and land use plans. Students will also learn how to implement the various citizen participation methods used by planners and develop an appreciation of the values and roles of practicing planners. In **Fundamentals of Plan Making**, Edward Jepson and Jerry Weitz bring their extensive experience as practicing academics and give planning students the practical hands on tools they need to implement the various methods used to create and implement real plans and policies. Its chapters on transportation, housing, environment, economic development and other core development topics also make it a handy reference for planning practitioners.

**Computer and Computing Technologies in Agriculture VI** Daoliang Li, Yingyi Chen, 2013-02-26 The two volume set IFIP AICT 392 and 393 constitutes the refereed post conference proceedings of the 6th IFIP TC 5 SIG 5.1 International Conference on Computer and Computing Technologies in Agriculture CCTA 2012 held in Zhangjiajie, China in October 2012. The 108 revised papers presented were carefully selected from numerous submissions. They cover a wide range of interesting theories and applications of information technology in agriculture including Internet of things and cloud computing, simulation models and decision support systems for agricultural production, smart sensor monitoring and control technology, traceability and e-commerce technology, computer vision, computer graphics and virtual reality, the application of information and communication technology in agriculture and universal information service technology and service systems development in rural areas. The 55 papers included in the second volume focus on GIS, GPS, RS and Precision Farming.

**Methods of Environmental and Social Impact Assessment** Riki Therivel, Graham Wood, 2017-09-13 Environmental and social impact assessment (ESIA) is an important and often obligatory part of proposing or launching any development project. Delivering a successful ESIA needs not only an understanding of the theory but also a detailed knowledge of the methods for carrying out the processes required. Riki Therivel and Graham Wood bring together the latest advice on best practice from experienced practitioners to ensure an ESIA is carried out effectively and efficiently. This new edition explains how an ESIA works and how it should be carried out, demonstrates the links between socio-economic, cultural, environmental and ecological systems and assessments, incorporates

the World Bank's IFC performance standards and best practice examples from developing as well as developed countries includes new chapters on emerging ESIA topics such as climate change ecosystem services cultural impacts resource efficiency land acquisition and involuntary resettlement Invaluable to undergraduate and MSc students of ESIA on planning ecology geography and environment courses this internationally oriented fourth edition of Methods of Environmental and Social Impact Assessment is also of great use to planners ESIA practitioners and professionals seeking to update their skills
