Out of the Blue John Friedman,2009 The odds of being hit by lightning each year are only about 1 in 750 000 in the U S And yet this rare phenomenon has inspired both fear and fascination for thousands of years In this groundbreaking brilliantly researched book journalist John S Friedman probes lightning s scientific spiritual and cultural roots Blending vibrant history with riveting first hand accounts of those who have clashed with lightning and lived to tell about it Out of the Blue charts an extraordinary journey across the ages that explores our awe and dread in the face of one of nature s most fearsome spectacles Herman Melville called it God s burning finger The ancient Romans feared it as the wrath of God Today we have a more scientific understanding so why our eternal fascination with lightning Out of the Blue attempts to understand this towering force of nature exploring the changing perceptions of lightning from the earliest civilizations through Ben Franklin s revolutionary experiments to the hair raising adventures of storm chasers like David Hoadley who s been chronicling extreme weather for half a century And Friedman describes one of the most treacherous rescues ever attempted in American mountain climbing Friedman profiles a Virginia ranger who was struck by lightning seven times and dubbed the human lightning rod along with scores of others who tell astonishing tales of rescue and survival And he charts lightning s profound life altering effects on the emotional and spiritual lives of its victims Combining captivating fact with thrilling personal stories Out of the Blue tells a remarkable true tale of fate and coincidence discovery and divine retribution science and superstition As entertaining as it is informative it is a book for outdoor adventurers sports enthusiasts science and weather buffs nature lovers and anyone who has ever been awed or frightened by the sight of lightning From the Hardcover edition

Renaissance Fun Philip Steadman,2021-04-13 Renaissance Fun is about the technology of Renaissance entertainments in stage machinery and theatrical special effects in

gardens and fountains and in the automata and self playing musical instruments that were installed in garden grottoes How did the machines behind these shows work How exactly were chariots filled with singers let down onto the stage How were flaming dragons made to fly across the sky How were seas created on stage How did mechanical birds imitate real birdsong What was artificial music three centuries before Edison and the phonograph How could pipe organs be driven and made to play themselves by waterpower alone And who were the architects engineers and craftsmen who created these wonders All these questions are answered At the end of the book we visit the lost garden of marvels at Pratolino with its many grottoes automata and water jokes and we attend the performance of Mercury and Mars in Parma in 1628 with its spectacular stage effects and its music by Claudio Monteverdi one of the places where opera was born Renaissance Fun is offered as an entertainment in itself But behind the show is a more serious scholarly argument centred on the enormous influence of two ancient writers on these subjects Vitruvius and Hero Vitruvius's Ten Books on Architecture were widely studied by Renaissance theatre designers Hero of Alexandria wrote the Pneumatics a collection of designs for surprising and entertaining devices that were the models for sixteenth and seventeenth century automata A second book by Hero On Automata Making much less well known then and now describes two miniature theatres that presented plays without human intervention One of these it is argued provided the model for the type of proscenium theatre introduced from the mid sixteenth century the generic design which is still built today As the influence of Vitruvius waned the influence of Hero grew
