Nothing About Us Without Us 20 Years Of Dementia Advocacy:

Nothing about us, without us! Christine Bryden,2015-09-21 Advocating for dementia for 20 years Christine Bryden has been instrumental in ensuring that people with dementia are included in discussions about the condition and how to manage and think about it This collection of her hard hitting and inspiring insider presentations demands nothing about us without us and promotes self advocacy and self reflection Provocative and insightful the pieces included in the book address issues that demand attention and will change the way dementia is perceived and the lives of people with dementia and their families

American Dementia Daniel R. George,Peter J. Whitehouse,2021-09-14 Have the social safety nets environmental protections and policies to redress wealth and income inequality enacted after World War II contributed to declining rates of dementia today and how do we improve brain health in the future Winner of the American Book Fest Health Aging 50 by the American Book Fest Living Now Book Award Mature Living Aging by the Living Now Book Awards For decades researchers have chased a pharmaceutical cure for memory loss But despite the fact that no disease modifying biotech treatments have emerged new research suggests that dementia rates have actually declined in the United States and Western Europe over the last decade Why is this happening And what does it mean for brain health in the future In American Dementia Daniel R George PhD MSc and Peter J Whitehouse MD PhD argue that the current decline of dementia may be strongly linked to mid twentieth century policies that reduced inequality provided widespread access to education and healthcare and brought about cleaner air soil and water They also explain why Alzheimer s disease an obscure clinical label until the 1970s is the hallmark illness of our current hyper capitalist era reveal how the soaring inequalities of the twenty first century which are sowing poverty barriers to healthcare and education loneliness lack of sleep stressful life events environmental exposures and climate change are reversing the gains of the twentieth century and damaging our brains tackle the ageist tendencies in our culture which disadvantage both vulnerable youth and elders make an evidence based argument that policies like single payer healthcare a living wage and universal access to free higher education and technical training programs will build collective resilience to dementia promote strategies that show how local communities can rise above the disconnection and loneliness that define our present moment and come together to care for our struggling neighbors Ultimately American Dementia asserts that actively remembering lessons from the twentieth century which help us become a healthier wiser and more compassionate society represents our most powerful intervention for preventing Alzheimer s and protecting human dignity Exposing the inconvenient truths that confound market based approaches to memory enhancement as well as broader social organization the book imagines how we can act as citizens to protect our brains build the cognitive resilience of younger generations and rise to the moral challenge of caring for the cognitively frail **Dementia-Friendly Communities** Susan McFadden,2020-11-19 Creating dementia friendly communities can give people with dementia the chance to continue meaningful lives with reciprocal personal relationships Underpinning successful dementia friendly communities is an

Identity Flexibility During Adulthood Jan D. Sinnott, 2017-09-15 This volume seeks to explore the idea of identity as a flexible center of events around which aspects of the self and events in the outside world are organized Historically in much of the literature identity was conceptualized as a somewhat fixed unchanging construct Scholars now have a greater awareness of more nuanced theories about identity and there is a greater willingness to accept that identity is not fixed concrete and permanent but rather evolving and fluid Although this volume discusses a wide variety of aspects of identity as it flexibly changes during adulthood in the face of numerous experiences it is really addressing one key question How adaptive and fluid is identity and how can we know ourselves as both continuing and changing Exploring these ideas raises the importance of future research on adult identity With a firm grounding in the historical and theoretical background of identity research this volume begins by defining identity and the psychological self as a center around which the person's behaviors and self concepts revolve The following chapters gather the wisdom of many writers who all accepted the challenge of talking about creating a flexible adult self and identity during adulthood They come at this challenging question from many different perspectives using different tools Some survey existing literature and theory then summarize prior work in a meaningful way Some discuss their own research some reflect on personal experiences that have demanded a flexible identity Also included in the coverage are discussions of methodology and validity issues for studies and scales of identity With its dual focus on research and applied fields ranging across social and personality psychology industrial occupational psychology cross cultural psychology mental health existential issues relationships and demographic categories Identity Flexibility During Adulthood Perspectives on Adult Development is a fascinating and complex resource for psychologists sociologists anthropologists gerontologists and all those interested in our changing identities

The Family Experience of Dementia Gary Morris, Jack Morris, 2020-12-21 Dementia not only affects the person presented with the diagnosis but their family and friends too This book provides practitioners with strategies to support the whole family and understand their dementia journey both pre and post diagnosis This is facilitated through a series of activities and reflective prompts There is also a dedicated chapter offering structured exercises for health and social care practitioners and students The book introduces the Lawrence family where Peter has been diagnosed with dementia and provides perspectives from each family member allowing practitioners to become acquainted with the lived experience of everyone involved The reflective questions allow readers to become actively engaged to maximise their knowledge and understanding and to better contextualize what the dementia experience feels like for family and friends With its focus on the all important lived experience of the whole family during the diagnostic process and beyond this is essential reading for any practitioner

working with people with dementia *Dementia and Human Rights* Suzanne Cahill, 2018-03-28 The time has come to further challenge biomedical and clinical thinking about dementia which has for so long underpinned policy and practice Framing dementia as a disability this book takes a rights based approach to expand the debate Applying a social constructionist lens it builds on earlier critical perspectives by bringing together concepts including disability social inclusion personhood equality participation dignity empowerment autonomy and solidarity Launching the debate into new and exciting territory the book argues that people living with dementia come within the UN Convention on the Rights of Persons with Disabilities and therefore have full entitlement to all the rights the Convention enshrines A human rights based approach has not to date been fully applied to interrogate the lived experience and policy response to dementia With the fresh analytical tools provided in this book policy makers and practitioners will gain new insights into how this broader perspective can be used to further promote the quality of life and quality of care for all those affected by dementia Reconsidering Dementia Narratives Rebecca Bitenc, 2019-07-05 *Reconsidering Dementia Narratives* explores the role of narrative in developing new ways of understanding interacting with and caring for people with dementia It asks how the stories we tell about dementia in fiction life writing and film both reflect and shape the way we think about this important condition Highlighting the need to attend to embodied and relational aspects of identity in dementia the study further outlines ways in which narratives may contribute to dementia care while disputing the idea that the modes of empathy fostered by narrative necessarily bring about more humane care practices This cross medial analysis represents an interdisciplinary approach to dementia narratives which range across auto biography graphic narrative novel film documentary and collaborative storytelling practices The book aims to clarify the limits and affordances of narrative and narrative studies in relation to an ethically driven medical humanities agenda through the use of case studies Answering the key question of whether dementia narratives align with or run counter to the dominant discourse of dementia as loss of self this innovative book will be of interest to anyone interested in dementia studies ageing studies narrative studies in health care and critical medical humanities **Dementia, Narrative and Performance** Janet Gibson, 2020-09-29 Focusing mainly on case studies from Australia and the United States of America this book considers how people with dementia represent themselves and are represented in theatre of the real productions and care home interventions assessing the extent to which the right kind of dementia story is being affirmed or challenged It argues that this type of story one of tragedy loss of personhood biomedical deficit and socio economic crisis produces dementia and the people living with it as much as biology does It proposes two novel ideas One is that the gaze of theatre and performance offers a reframing of some of the behaviours and actions of people with dementia through which deficit views can be changed to ones of possibility The other is that conversely dementia offers productive perspectives on theatre of the real Scanning contemporary critical studies about and practices of theatre of the real performances and applied theatre interventions the book probes what it means when certain theatre of the real practices specifically verbatim and

autobiographical interact with storytellers considered culturally to be unreliable narrators It also explores whether autobiographical theatre is useful in reinforcing a sense of self for those deemed no longer to have one With a focus on the relationship between stories and selves the book investigates how selves might be rethought so that they are not contingent on the production of lucid self narratives consistent language and truthful memories *The Story of Dementia* John Killick,2017-09-16 The story of dementia as I present it in these pages is the alternative narrative which has been occupying the shadowlands of the subject and which is much in need of bringing into the light So far as we are aware there has never been a book before with this title or aim This may be because no one has been foolhardy enough to attempt one And it is true that this is a story in mid flow even perhaps still near the beginning But the subject is so complex and surrounded with so many misconceptions that even in a truncated form it needs to be told John Killick has chosen a simple but effective format Each of the nine main chapters focuses on an individual or individuals twelve in number who in his view have made significant contributions to our knowledge The message is one of hope Although the medical model has yielded little in the way of advances that is not true of psychosocial initiatives This little book tells the hidden story of positive approaches and those who have devoted their lives to finding alternative creative solutions to one of today s great challenges If your life is at all touched by dementia you should be reading it **Social Research Methods in Dementia Studies** John Keady,Lars-Christer Hydén,Ann Johnson,Caroline Swarbrick,2017-10-06 Traditionally the most preferred social research methods in dementia studies have been interviews focus groups and non participant observations Most of these methods have been used for a long time by researchers in other social research fields but their application to the field of dementia studies is a relatively new phenomenon A ground breaking book Social Research Methods in Dementia Studies shows researchers how to adapt their methods of data collection to address the individual needs of someone who is living with dementia With an editorial team that includes Ann Johnson a trained nurse and person living with dementia this enlightening volume mainly draws its contents from two interdisciplinary social research teams in dementia namely the Center for Dementia Research CEDER at Linköping University in Norrköping Sweden and the Dementia and Ageing Research Team DART at The University of Manchester in Manchester UK Case examples are shared in each of the main chapters to help ground the social research methods in a real life context and provide direction as to how learning can be applied to other settings Chapters also contain key references and recommended reading This volume will appeal to undergraduate and postgraduate students as well as postdoctoral researchers interested in fields such as Research Methods Qualitative Methods and Dementia Studies **Living a good life with Dementia** Liz Leach Murphy,Jayna Patel,2025-02-28 A practical guide to helping those living with dementia live their best life in a way that makes sense to them Essential reading for anyone working with people living with dementia this book explains the concept of Self Directed Support and Care for people living with dementia and links the various Person Centred approaches within dementia care with Person Centred Planning and

Community based approaches As the content unfolds the concept of the Dementia Care Triad people living with dementia unpaid carers and professional carers is explored and developed further to include the layer of community The links between the health and social care legal context guidance documents and national dementia strategies are presented with good actionable practice approaches tools and informed advice to achieve Person Centred dementia care and support with an emphasis on communities Living a Good Life with Dementia will help professionals and carers gain knowledge and insight to be able to develop creative ideas for the care and support they want to have in place **Personhood, Identity and Care in**

Advanced Old Age Higgs, Paul, Gilleard, Chris, 2016-10-05 How do we sustain agency and identity amidst the frailty of advanced old age What role does care play in this process Pushing forward new sociological theory this book explores the theoretical and practical issues raised by age and infirmity It begins with a theoretical examination of the fourth age interrogating notions of agency identity and personhood as well as the impact of frailty abjection and othering It then applies this analysis to issues of care Exploring our collective hopes and fears concerning old age and the ends of people's lives this is essential reading on one of the biggest social issues of our time **Dementia Activist** Helga Rohra, 2016-07-21 Helga

Rohra turns dementia stereotypes on their heads with this candid memoir Speaking about her diagnosis day to day life and experience of advocacy she proves that a dementia diagnosis doesn't mean you have to give up on life With helpful advice and practical tips this book is a testament to living well with dementia **People with Dementia Speak Out** Lucy Whitman, 2015-09-21 In this book contributors from a wide range of backgrounds reflect on their experiences of living with dementia and what impact the condition has had on their lives This timely collection offers a much needed opportunity to hear the voices of people with dementia as they demystify the condition and break down stigma and stereotypes

Critical Kinship Studies Damien W. Riggs, Elizabeth Peel, 2016-09-15 This book draws together research on posthumanism and studies of kinship to elaborate an account of western human kinship practices. Studies of kinship have increasingly sought to critique the normative assumptions that often underpin how caring relationships between humans are understood. The categorisation of human and kinship is brought into question and this book examines who might be excluded through adherence to accepted categories and how a critical lens may broaden our understanding of caring relationships. Bringing together a diverse array of analytic foci and theoretical lenses, *Critical Kinship Studies* opens up new avenues for understanding what it means to be in relationships with others and in so doing challenges the human exceptionalism that has often limited how we think about family, loss, love, and subjectivity.

Redfern's Nursing Older People Fiona M. Ross, Ruth Harris, Joanne M. Fitzpatrick, Clare Abley, 2023-04-20 Redfern's *Nursing Older People* provides accessible, evidence-based information for nurses, care assistants, and other health professionals wanting to improve the quality of health and social care for older people. Republished for the first time since 2006, this fifth edition has been comprehensively revised and rewritten by a large team of expert contributors while preserving the person-centred spirit of earlier editions. It applies best evidence in straightforward and practical ways to the demographic, physical, psychological, social, and emotional challenges of ageing, with a focus on supporting independence and health maintenance. With new contributions covering emerging challenges such as understanding frailty and the use of digital technology, and the themes of diversity, service user perspectives, and the impact of the COVID-19 pandemic woven throughout, *Redfern's Nursing Older People* is essential reading to help nurses shape practice, improve outcomes, and promote opportunities for ageing well. Written by a team of 68 specialists and experts drawn from the fields of nursing, social sciences, gerontology, and healthcare practice, it covers the latest evidence, policy, and nursing practice. Focus on nursing-led solutions for improving activities of daily living, independence, and preventing common problems of ageing. Accessible to all, with stories, case studies, and lived experience to bring material to life. Summaries and learning points support learning around complex problems. Emphasis on countering ageism using images and wider literature where appropriate. All chapters either extensively rewritten or completely new. New chapters on frailty, the misuse of alcohol as a growing problem in old age, digital technology, and nursing older people with intellectual disabilities. Core themes of gerontology embedded throughout, such as assessment and rehabilitation. Impact of COVID-19 embedded throughout.
