Retrofitting Cities for Tomorrow's World Malcolm Eames, Tim Dixon, Miriam Hunt, Simon Lannon, 2017-11-13 A groundbreaking exploration of the most promising new ideas for creating the sustainable cities of tomorrow The culmination of a four year collaborative research project undertaken by leading UK universities in partnership with city authorities prominent architecture firms and major international consultants Retrofitting Cities for Tomorrow's World explores the theoretical and practical aspects of the transition towards sustainability in the built environment that will occur in the years ahead The emphasis throughout is on emerging systems innovations and bold new ways of imagining and re imagining urban retrofitting set within the context of futures based thinking The concept of urban retrofitting has gained prominence within both the research and policy arenas in recent years While cities are often viewed as a source of environmental stress and resource depletion they are also hubs of learning and innovation offering enormous potential for

scaling up technological responses But city level action will require a major shift in thinking and a scaling up of positive responses to climate change and the associated threats of environmental and social degradation Clearly the time has come for a more coordinated planned and strategic approach that will allow cities to transition to a sustainable future This book summarizes many of the best new ideas currently in play on how to achieve those goals Reviews the most promising ideas for how to approach planning and coordinating a more sustainable urban future by 2050 through retrofitting existing structures Explores how cities need to govern for urban retrofit and how future urban transitions and pathways can be managed modeled and navigated Offers inter disciplinary insights from international contributors from both the academic and professional spheres Develops a rigorous conceptual framework for analyzing existing challenges and fostering innovative ways of addressing those challenges Retrofitting Cities for Tomorrow s World is must reading for academic researchers including postgraduates insustainability urban planning environmental studies economics among other fields It is also an important source of fresh ideas and inspiration for town planners developers policy advisors and consultants working within the field of sustainability energy and the urban environment *The Routledge Handbook of Urban Design Research Methods* Hesam Kamalipour,Patricia Aelbrecht,Nastaran Peimani,2023-08-24 As an evolving and contested field urban design has been made unmade and remade at the intersections of multiple disciplines and professions It is now a decisive moment for urban design to reflect on its rigour and relevance This handbook is an attempt to seize this moment for urban design to further develop its theoretical and methodological knowledge base and engage with the question of what urban design can be with a primary focus on its research This handbook includes contributions from both established and emerging scholars across the global North and global South to provide a more field specific entry point by introducing a range of topics and lines of inquiry and discussing how they can be explored with a focus on the related research designs and methods The specific aim scope and structure of this handbook are appealing to a range of audiences interested and or involved in shaping places and public spaces What makes this book quite distinctive from conventional handbooks on research methods is the way it has been structured in relation to some key research topics and questions in the field of urban design regarding the issues of agency affordance place informality and performance In addition to the introduction chapter this handbook includes 80 contributors and 52 chapters organised into five parts The commissioned chapters showcase a wide range of topics research designs and methods with references to relevant scholarly works on the related topics and methods **Research and Innovation Forum 2024** Anna Visvizi,Orlando Troisi,Vincenzo Corvello,Mara Grimaldi,2025-07-26 This book features research presented and discussed during the Research Innovation Forum Rii Forum 2024 As such this book offers a unique insight into emerging topics issues and developments pertinent to the fields of technology innovation and education and their social impact Papers included in this book apply inter and multi disciplinary approaches to query such issues as technology enhanced teaching and learning smart cities information systems cognitive computing and social networking What brings

these threads of the discussion together is the question of how advances in computer science which are otherwise largely incomprehensible to researchers from other fields can be effectively translated and capitalized on so as to make them beneficial for society as a whole In this context Rii Forum and Rii Forum proceedings offer an essential venue where diverse stakeholders including academics the think tank sector and decision makers can engage in a meaningful dialogue with a view to improving the applicability of advances in computer science

Territorial Policy and Governance Iain Deas, Stephen Hincks, 2017-02-24 In response to both policy and conceptual debates alternative narratives have begun to emerge about territorial governance and policymaking As local and regional policy actors strive to respond to the geographically uneven effects of the economic crises of the early twenty first century a crucial question emerges what are the opportunities and challenges presented by alternative forms of territorially based governance and policy The aim of this edited volume therefore is critically to explore the opportunities and challenges presented by different forms of territorial policy and governance Drawing on conceptual debates and empirical research from the United Kingdom and other international contexts the contributors engage with issues around the politics and governance of territorial development economic development planning and regeneration and the environment Territorial Policy and Governance addresses the question of how alternative forms of territorial governance and policy can help to shape patterns of urban and regional development highlighting the related opportunities constraints and challenges that confront their operationalisation This book will be essential reading for international audiences with an interest in territorial development governance politics human geography and planning and regeneration

Cultural Landscapes of South Asia Kapila Silva, Amita Sinha, 2016-10-14 Winner of the Environmental Design Research Association's 2018 Achievement Award The pluralism of South Asia belies any singular reading of its heritage In spite of this diversity its cultural traditions retain certain attributes that are at their core South Asian in their capacity to self organize enact and reinvent cultural memories and in their ability to retain an intimate connection with nature and landscape This volume focuses on the notion of cultural landscape as a medium integrating multiple forms of heritage and points to a new paradigm for conservation practices in the South Asian context Even though the construct of cultural landscape has been accepted as a category of heritage its potent use in heritage management in general and within the South Asian context in particular has not been widely studied The volume challenges the prevalent views of heritage management in South Asia that are entrenched in colonial legacies and contemporary global policy frameworks

The Routledge Handbook of Regional Design Michael Neuman, Wil Zonneveld, 2021-04-15 The Routledge Handbook of Regional Design explores contemporary research policy and practice that highlight critical aspects of strategy making planning and designing for contemporary regions including city regions bioregions delta regions and their hybrids As accelerating urbanization and globalization combine with other forces such as the demand for increasing returns on investment capital migration and innovation they yield cities that are expanding over ever larger territories Moreover these

polycentric city regions themselves are agglomerating with one another to create new territorial mega regions The processes that beget these novel regional forms produce numerous and significant effects positive and negative that call for new modes of design and management so that the urban places and the lives and well being of their inhabitants and businesses thrive sustainably into the future With international case studies from leading scholars and practitioners this book is an important resource not just for students researchers and practitioners of urban planning but also policy makers developers architects engineers and anyone interested in the broader issues of urbanism *Markets, Places, Cities* Kirsten Seale, 2016-03-22

Using a transnational analytical framework this book provides a comprehensive overview of formal and informal markets and place in globalised cities It examines how urban markets are situated within social cultural and media discourses and within material and symbolic economies The book addresses four key narratives redevelopment and relocation privatization of public space urban renewal and urbanism and sustainability to investigate shared and individual attributes of markets and place in diverse international urban contexts With case studies in Sydney Hong Kong Beijing Rio de Janeiro London Antwerp Amsterdam Paris and San Francisco experiences of market place and city are explored through interdisciplinary and multimodal perspectives of visual culture spatial practice urban design and textual analysis **Transitioning to**

Sustainable Cities and Communities Hubert Klumpner, Klearjos Eduardo Papanicolaou, Georgeen Theodore, 2024-11-14 In developing alternative approaches to urban development in response to the societal challenge of living in ever expanding cities this Volume on the SDG11 Sustainable Cities and Communities proposes the concept of an Urbanising Earth We question the dominant model of Western cities and their resultant global warming leading to the replacement of natural environments with artificial ones The Volume features over twenty practical and metaphorical cases from experienced practitioners to emerging design thinkers each of whom offer interconnected reflections on the research design and implementation of projects anchored in architecture and design arguments promoting a more balanced view of the built and natural environment These reflections designed to engage readers highlight the collective effort needed for sustainable urban development The Volume aims to facilitate design as a learning process for society to reconcile human and environmental rights while celebrating the art of cultivating and living in this urban age The right to education and housing can create synergies providing parks and public spaces to underprivileged neighbourhoods The overall aim is to connect thinking with actions while considering what modernism in architecture and urban planning is today In doing this the Volume sheds light on the condition of contemporary design itself We draw from limitless approaches to the fundamental challenges and critical discussions presented to us by this Urbanising Earth **Companion to Public Space** Vikas Mehta, Danilo Palazzo, 2020-05-13 The Companion to Public Space draws together an outstanding multidisciplinary collection of specially commissioned chapters that offer the state of the art in the intellectual discourse scholarship research and principles of understanding in the construction of public space Thematically the volume crosses disciplinary boundaries and traverses

territories to address the philosophical political legal planning design and management issues in the social construction of public space The Companion uniquely assembles important voices from diverse fields of philosophy political science geography anthropology sociology urban design and planning architecture art and many more under one cover It addresses the complete ecology of the topic to expose the interrelated issues challenges and opportunities of public space in the twenty first century The book is primarily intended for scholars and graduate students for whom it will provide an invaluable and up to date guide to current thinking across the range of disciplines that converge in the study of public space The Companion will also be of use to practitioners and public officials who deal with the planning design and management of public spaces

Activist Planning Case Studies 1990-2020 Tore Sager,2023-05-10 Activist planning shows how communities neighbourhoods and social movements use their own alternative spatial planning to oppose interventions from the government This book is a systematic overview of scholarly reported activist planning cases It includes descriptions of the various kinds of activist planning and contains a comprehensive bibliography of academic publications related to the 164 cases The book informs the planning community what activist planning is in practice and offers a classification scheme where all reported cases fit in This text is needed because no comprehensive collection of activist planning cases exists nor does a classification comprising all types of activist planning There is to date no database of cases and associated literature providing researchers and students with an authoritative source The search for cases in the English language has been global and the cases and 122 supplementary examples are sorted by country and world region Australasia Europe the Global South and North America

The Code Margaret O'Mara,2020-07-07 One of New York Magazine s best books on Silicon Valley The true behind the scenes history of the people who built Silicon Valley and shaped Big Tech in America Long before Margaret O Mara became one of our most consequential historians of the American led digital revolution she worked in the White House of Bill Clinton and Al Gore in the earliest days of the commercial Internet There she saw firsthand how deeply intertwined Silicon Valley was with the federal government and always had been and how shallow the common understanding of the secrets of the Valley s success actually was Now after almost five years of pioneering research O Mara has produced the definitive history of Silicon Valley for our time the story of mavericks and visionaries but also of powerful institutions creating the framework for innovation from the Pentagon to Stanford University It is also a story of a community that started off remarkably homogeneous and tight knit and stayed that way and whose belief in its own mythology has deepened into a collective hubris that has led to astonishing triumphs as well as devastating second order effects Deploying a wonderfully rich and diverse cast of protagonists from the justly famous to the unjustly obscure across four generations of explosive growth in the Valley from the forties to the present O Mara has wrestled one of the most fateful developments in modern American history into magnificent narrative form She is on the ground with all of the key tech companies chronicling the evolution in their offerings through each successive era and she has a profound fingertip feel for the politics of the sector

and its relation to the larger cultural narrative about tech as it has evolved over the years Perhaps most impressive O Mara has penetrated the inner kingdom of tech venture capital firms the insular and still remarkably old boy world that became the cockpit of American capitalism and the crucible for bringing technological innovation to market or not The transformation of big tech into the engine room of the American economy and the nexus of so many of our hopes and dreams and increasingly our nightmares can be understood in Margaret O Mara s masterful hands as the story of one California valley As her majestic history makes clear its fate is the fate of us all *Transience and Permanence in Urban Development* John

Henneberry,2017-03-21 Temporary urban uses innovative ways to transform cities or new means to old ends The scale and variety of temporary or meanwhile or interim urban uses and spaces has grown rapidly in response to the dramatic increase in vacant and derelict land and buildings particularly in post industrial cities To some this indicates that a paradigm shift in city making is underway To others alternative urbanism is little more than a distraction that temporarily cloaks some of the negative outcomes of conventional urban development However rigorous theoretically informed criticism of temporary uses has been limited The book draws on international experience to address this shortcoming from the perspectives of the law sociology human geography urban studies planning and real estate It considers how time and the way that it is experienced informs alternative perspectives on transience It emphasises the importance for analysis of the structural position of a temporary use in an urban system in spatial temporal and socio cultural terms It illustrates how this position is contingent upon circumstances What may be deemed a helpful and acceptable use to established institutions in one context may be seen as a problematic unacceptable use in another What may be a challenging and fulfilling alternative use to its proponents may lose its allure if it becomes successful in conventional terms Conceptualisations of temporary uses are therefore mutable and the use of fixed or insufficiently differentiated frames of reference within which to study them should be avoided It then identifies the major challenges of transforming a temporary use into a long term use These include the demands of regulatory compliance financial requirements levels of expertise and so on Finally the potential impacts of policy on temporary uses both inadvertent and intended are considered The first substantive critical review of temporary urban uses *Transience and Permanence in Urban Development* is essential reading for academics policy makers practitioners and students of cities worldwide *Urban Geography* Tim Hall,Heather Barrett,2018-01-03 This revised fifth edition not only

examines the new geographical patterns forming within and between cities but also investigates the way geographers have sought to make sense of this urban transformation It is structured into three sections contexts themes and issues that move students from a foundation in urban geography through its major themes to contemporary and pressing issues The text critically synthesizes key literatures in the following areas the urban world changing approaches to urban geography urban form and structure economy and the city urban politics planning regeneration and urban policy cities and culture architecture and urban landscapes images of the city experiencing the city housing and residential segregation transport and

mobility in cities sustainability and the city This edition builds on the success of the comprehensively revised fourth edition and provides revised chapters on transport mobility and urban futures with additional updating of readings and some case studies The book synthesises a wide range of literature on each subject and presents the material in a lively engaging way supported by an expanded range of student friendly features including exercises and suggestions for further study

Wortham-Galvin, Jennifer H. Allen, Jacob Sherman, 2017-09-08 What is the role of the university Current systems may stress research output but Wortham Galvin Allen and Sherman seek to re establish the importance of teaching and service in the work of the 21st century university The Sustainable Solutions series shares Portland State University s experience of community engaged teaching and research With a focus on sustainability we see that such collaboration is vital to making Portland one of the world s most sustainable cities Volume 2 University Community Partnerships builds on the themes introduced in Volume 1 Let Knowledge Serve the City to explore how these partnerships play out in practice Covering 13 projects which range from supporting local artisans and researching food access to sharing Indigenous history and decolonizing perceptions of knowledge readers receive pragmatic advice on working with community organizations Authors also offer critical reflection on how theories of engagement have structured PSU s work and how their findings impact our very understanding of partnership This reader friendly text provides an ideal introduction to anyone wishing to learn more about models of effective collaboration and how to put these into practice Explained through the context of specific projects the book offers both inspiration and practical guidance to anyone in local government academia or the third sector looking to set up productive community university partnerships Capitalism Contested Romain Huret, Nelson Lichtenstein, Jean-Christian Vinel, 2020-12-11 In the historical narrative that prevails today the New Deal years are positioned between two equally despised Gilded Ages the first in the late nineteenth century and the

second characterized by the world of Walmart globalization and right wing populism in which we currently live What defines these two ages is an increasing level of inequality legitimized by powerful ideologies namely Social Darwinism at the end of the nineteenth century and neoliberalism today In stark contrast the era of the New Deal was first and foremost an attempt to put an end to inequality in American society In the historical longue dur e it appears today as a kind of golden age when policymakers and citizens sought to devise solutions to the two major questions labor on one side social on the other that were at the heart of the American political economy during the twentieth century Capitalism Contested argues that the New Deal order remains an effective framework to make sense of the transformation of American political economy over the last hundred years Contributors offer an historicized analysis of the degree to which that political economic and ideological order persists and the ways in which it has been transcended or even overthrown The essays pay attention not only to those ideas and social forces hostile to the New Deal but to the contradictions and debilities that were present at the inauguration or became inherent within this liberal impulse during the last half of the twentieth century The unifying thematic among the essays consists not in their subject matter politics political economy social thought and legal scholarship are represented but in a historical quest to assess the transformation and fate of an economic and policy order nearly a century after its creation Contributors Kate Andrias Romain Huret William P Jones Nelson Lichtenstein Nancy MacLean Isaac William Martin Margaret O Mara K Sabeel Rahman Timothy Shenk Elizabeth Tandy Shermer Jason Scott Smith Samir Sonti Karen M Tani Jean Christian Vinel Alternative Planning History and Theory Dorina Pojani,2022-12-27 This book includes twelve newly commissioned and carefully curated chapters each of which presents an alternative planning history and theory written from the perspective of groups that have been historically marginalized or neglected In teaching planning history and theory many planning programs tend to follow the planning cannon a normative perspective that mostly accounts for the experience of white Anglo Christian middle class middle aged heterosexual able bodied men This book takes a unique approach It provides alternative planning history and theory timelines for each of the following groups women the poor LGBTQ communities people with disabilities older adults children religious minorities people of color migrants Indigenous people and colonized peoples in South Asia and Sub Saharan Anglophone Africa To allow for easy cross comparison chapters follow a similar chronological structure which extends from the late 19th century into the present The authors provide insights into the core planning issues in each time period and review the different stances and critiques The book is a must read for planning students and instructors Each chapter includes the following pedagogical features 1 a boxed case study which presents a recent example of positive change to showcase theory in practice 2 a table which lays out an alternative planning history and theory timeline for the group covered in the chapter and 3 suggestions for further study comprising non academic sources such as books websites and films Main Street Mindy Thompson Fullilove,2020-09-08 Mindy Thompson Fullilove traverses the central thoroughfares of our cities to uncover the ways they bring together our communities After an 11 year study of

Main Streets in 178 cities and 14 countries Fullilove discovered the power of city centers to help us name and solve our problems In an era of compounding crises including racial injustice climate change and COVID 19 the ability to rely on the power of community is more important than ever However Fullilove describes how a pattern of disinvestment in inner city neighborhoods has left Main Streets across the U S in disrepair weakening our cities and leaving us vulnerable to catastrophe In the face of urban renewal programs built in response to a supposed lack of personal responsibility Fullilove offers a different story that of a series of forced displacements that had devastating effects on inner city communities Through that lens we can appreciate the strength of segregated communities that managed to temper the ravages of racism through the Jim Crow era and build political power and many kinds of wealth Only a very well integrated powerful community one with deep spiritual principles could have accomplished such a feat This is the power she hopes we will find again Throughout Main Street readers glimpse strong vibrant communities who have conquered a variety of disasters from the near loss of a beloved local business to the devastation of a hurricane Using case studies to illustrate her findings Fullilove turns our eyes to the cracks in city centers the parts of the city that tend to be avoided or ignored Providing a framework for those who wish to see their communities revitalized Fullilove s Main Street encourages us all to look both inward and outward to find the assets that already exist to create meaningful change
