**Mysteries of the Universe-Unveiled** Satya Prakash Verma, 2015-03-21 In spite of the fact that the story of Blind Students and the Elephant is merely a story the same has been repeated several times in the history of the mankind right from the primordial times till to date in fact this is the way science has gradually grown on its journey of evolution Scientists have to face similar situations on many occasions they never get full information before devising any theory instead they discover part truths in several steps each of which is discovered after long periods of time This is analogous to concept developed by a blind man who forms an idea about the elephant by touches only one of its body part Scientists can therefore consider only one aspect of a problem at a time they encounter with other aspects of the same problem at a much later point of time At times such a situation might lead to misconceptions Sometimes such misconceptions

conceived by some renowned personalities are even considered to be very brilliant ideas and valuable achievements As a result heritage of falsified knowledge had been transferred several times in the past to at least next 3 4 generations This becomes possible because common man blindly follows renowned persons who are considered to be wise normally no one even bothers to verify the truth this is the greatest misfortune of the human kind Misjudging or regarding such misconceptions as valuable discoveries might cause science to divagate from its path to find out absolute truth a very long and valuable time might also be lost in elimination of such misconceptions
