Myjer, Thilo Marauhn, 2022-12-06 This Research Handbook provides a broad yet detailed treatment of international arms control law It takes stock of existing arms control agreements addresses current challenges and aims to indicate avenues for the future development of this distinct branch of public international law International Law and Chemical, Biological, Radio-Nuclear (CBRN) Events Andreas de Guttery, Micaela Frulli, Federico Casolari, Ludovica Poli, 2022-03-21 The volume investigates to what extent the international and European Union legal frameworks applicable to Chemical Biological and Radio Nuclear CBRN events are adequate to face current challenges It is innovative in many aspects it adopts an all hazard approach to CBRN risks focusing on events of intentional accidental and natural origin it explores international obligations according to the four phases of the emergency cycle including prevention preparedness response and recovery and it covers horizontal issues such as protection of human rights international environmental law new technologies the role of private actors as well as enforcement mechanisms and remedies available to victims The book thus offers a new way of looking at the applicable rules of international law in this field Disarmament Law Treasa Dunworth, Anna Hood, 2020-10-29 This volume seeks to start a revival of the field of disarmament law scholarship Law is a fundamental component of disarmament yet today most perspectives on the wide range of disarmament issues that exist come primarily from political diplomatic and public advocacy angles The aim of this book is to revive the field of disarmament law building on earlier important and still relevant contributions by international lawyers to the subject The collection brings together international scholars on various aspects of disarmament The contributions range across a variety of weapons types adopt different approaches doctrinal historical and critical to the issues being discussed and taken together constitute a snapshot of the ideas concerns and issues that currently occupy disarmament law scholars The book will be essential reading for academics researchers and policy makers working in the area of disarmament **Handbook on European Nuclear Law** Rasa Engstedt, 2020-11-27 Energy and Environmental Law and Policy Series 39 While the European Economic Community has evolved through the decades into the legal entity of the European Union the substantive law contained in the

1957 Euratom Treaty has never been amended. Recurring legal discussions of the treaty's potentially obsolete nature give rise to this much needed handbook which provides systematic analysis and evaluation of the competences conferred under the Euratom Treaty. Following the structure of the Euratom Treaty the author analyses and evaluates the scope, content, exercise and case law of the Euratom Community's competences in the following fields: Promotion of research with reference to the Horizon research programmes; dissemination of information; health and safety including environmental protection; investments; joint undertakings; nuclear supplies; safeguards; property ownership of fissile materials; the nuclear common market and the Community's external relations. The book deals with issues of stagnation and potential obsolescence through such lenses as the legislative amendment procedure; level of regulatory detail; quantitative elements of exercise; secondary legal acts and the Court of Justice of the European Union's power to define and delimit the Euratom Community's competences. The competences in the fields of military activities and State aid are also examined in detail. The role of principles of subsidiarity and proportionality in European nuclear law and the issue of classification of competences under the Euratom Treaty are addressed in this book. With its systematic chapter by chapter analysis of competences of the Euratom Community under the Euratom Treaty the book will be welcomed by lawyers and negotiators working in nuclear field; researchers in nuclear law and in the broader competences of the EU and policymakers in the European nuclear sector. This book represents an important contribution to the renewed academic discourse on the Euratom Community. I would like to recommend it both to those looking for concise information on this neglected Community as well as to those dealing with the topic of competences with respect to the law of the EU. It is also vital reading for policymakers and lawyers active in the field of energy and nuclear law. Jakub Handrlica, Common Market Law Review 2021. [Iran's Nuclear Program and International Law](#) Daniel H. Joyner, 2016-09-09. This book provides an international legal analysis of the most important questions regarding Iran's nuclear program since 2002. Setting these legal questions in their historical and diplomatic context, this book aims to clarify how the relevant sources of international law including primarily the 1968 Nuclear Non-proliferation Treaty and IAEA treaty law should be properly applied in the context of the Iran case. It provides an instructional case study of the application of these sources of international law, the lessons which can be applied to inform both the ongoing legal and diplomatic dynamics surrounding the Iran nuclear dispute itself as well as similar future cases. Some questions raised regard the watershed diplomatic accord reached between Iran and Western states in July 2015 known as the Joint Comprehensive Program of Action. The answers will be of interests to diplomats and academics as well as to anyone who is interested in understanding international law's application to this sensitive dispute in international relations.

[Networked Nonproliferation](#) Michal Onderco, 2021-10-05. The Treaty on Non Proliferation of Nuclear Weapons (NPT) had many opponents when in 1995 it came up for extension. The majority of parties opposed extension and experts expected a limited extension as countries sought alternative means to manage nuclear weapons. But against all predictions the treaty

was extended indefinitely and without a vote Networked Nonproliferation offers a social network theory explanation of how the NPT was extended giving new insight into why international treaties succeed or fail The United States was the NPT's main proponent but even a global superpower cannot get its way through coercion or persuasion alone Michal Onderco draws on unique in depth interviews and newly declassified documents to analyze the networked power at play Onderco not only gives the richest account yet of the conference looking at key actors like South Africa Egypt and the EU but also challenges us to reconsider how we think about American power in international relations With Networked Nonproliferation Onderco provides new insight into multilateral diplomacy in general and nuclear nonproliferation in particular with consequences for understanding a changing global system as the US the chief advocate of nonproliferation and a central node in the diplomatic networks around it declines in material power

Disarmament under International Law John Kierulf, 2017-01-01 Russia's annexation of Crimea and involvement in the conflict in eastern Ukraine has in many respects set back post Cold War improved relations between Russia the United States and Europe The continued war in Syria threatens the security and stability of many countries in the Middle East and attacks by ISIS and other terrorist organizations are causing increased fear and instability in Iraq and in neighbouring countries In many areas negotiations on disarmament and arms control are at a standstill In *Disarmament under International Law* John Kierulf examines and discusses how disarmament arms control and non proliferation of both conventional weapons and weapons of mass destruction are regulated in existing treaties and conventions From his perspective as a former disarmament negotiator Kierulf explains the United Nations disarmament machinery and procedures and describes the UN's essential role in promoting disarmament Underlining the continued and serious threat posed by nuclear weapons Kierulf appeals for increased and effective international efforts to reduce their number and ultimately eliminate them Presenting information and analysis on a comprehensive range of issues *Disarmament under International Law* is an essential guide for anyone interested in gaining knowledge about the current state of international security

Theories of Compliance with International Law Mark G. Burgstaller, 2004-11-26 This book examines some of the most prominent contemporary theories of compliance with international law It is argued that these theories ultimately rely on some political philosophy and that therefore their strengths and weaknesses can be traced back to those of the respective philosophical background The approach finally taken is based on some recent empirical and theoretical research undertaken and as such provides new insights to the major works of the authors that are at the core of the discussion As such it aims to contribute fresh input to a contemporary discussion at the heart of the international system The book combines theoretical arguments with insights gained from a practitioner s point of view It is of interest particularly for scholars and practitioners of international law and international relations as well as legal and political philosophers
