Bringing together internationally renowned experts, this Handbook provides a comprehensive overview of standardization norms and standard languages. Chapters are grouped into five thematic areas: models and theories of standardization; questions of authority and legitimacy; literacy and education; borders and boundaries; and standardization in Late Modernity. Each chapter addresses a specific issue in detail, illustrating it with linguistic case studies and taking into account the particular political, social, and cultural context. Showcasing cutting-edge research, it offers fresh perspectives that go beyond traditional accounts of the standardization of national European languages and affords new insights into minoritized indigenous and stateless languages. Surveying a wide range of languages and approaches, this Handbook is an essential resource for all those interested in language standards and standard languages.
