Numbers Sequences And Series Keith Hirst

James M. Bower, John Francis Bowers

Numbers Sequences And Series Keith Hirst:

Numbers, Sequences and Series Keith Hirst, 1994-12-08 Number and geometry are the foundations upon which mathematics has been built over some 3000 years This book is concerned with the logical foundations of number systems from integers to complex numbers The author has chosen to develop the ideas by illustrating the techniques used throughout mathematics rather than using a self contained logical treatise The idea of proof has been emphasised as has the illustration of concepts from a graphical numerical and algebraic point of view Having laid the foundations of the number system the author has then turned to the analysis of infinite processes involving sequences and series of numbers including power series The book also has worked examples throughout and includes some suggestions for self study projects In addition there are tutorial problems aimed at stimulating group work and discussion

Analysis Ekkehard Kopp, 1996-08-30 Building on the basic concepts through a careful discussion of covalence while adhering resolutely to sequences where possible the main part of the book concerns the central topics of continuity differentiation and integration of real functions Throughout the historical context in which the subject was developed is highlighted and particular attention is paid to showing how precision allows us to refine our geometric intuition The intention is to stimulate the reader to reflect on the underlying concepts and ideas

Matrices and Quadratic Forms James M. Bower, John Francis Bowers, 2000 This is a lively and accessible introduction to matrices and quadratic forms for students in linear algebra Examples and exercises are used as teaching aids and ideas for investigation and project work help to place the subject in context The inclusion of historical contexts real life situations and the discussion of links with other areas of mathematics will greatly enhance student motivation making this the perfect classroom tool
