Embarking on a literature review journey in the realm of organisational performance management can be akin to navigating a labyrinth of scholarly texts, theories, and methodologies. It is a formidable task that demands meticulous attention to detail, comprehensive research skills, and an analytical mindset. For many, the process can be overwhelming, time-consuming, and fraught with challenges.

The literature review serves as the foundation of any academic or research endeavor, providing a comprehensive overview of existing knowledge, identifying gaps in the literature, and establishing the theoretical framework for the study. In the context of organisational performance management, it entails synthesizing a vast array of scholarly articles, books, reports, and other sources to gain insights into the various dimensions of performance measurement, evaluation, and improvement within organizations.

One of the primary challenges of conducting a literature review in this field lies in the sheer volume and diversity of sources available. From seminal works by pioneering scholars to cutting-edge research published in peer-reviewed journals, the landscape of organisational performance management literature is vast and ever-evolving. Navigating through this vast sea of information requires a keen eye for relevance, credibility, and rigor.

Moreover, the interdisciplinary nature of organisational performance management adds another layer of complexity to the literature review process. Drawing from fields such as management, psychology, sociology, economics, and beyond, researchers must synthesize insights from diverse disciplines to develop a comprehensive understanding of the subject matter.

Another hurdle often encountered in literature reviews is the challenge of critically evaluating the quality and validity of the sources. With the proliferation of online databases and open-access journals, distinguishing between credible research and questionable sources can be daunting. Researchers must exercise discernment and rigorously assess the methodological soundness, theoretical coherence, and empirical validity of the literature they encounter.

The Role of Organisational Change Management in Offshore Outsourcing of Information Technology Services

T. R. Ramanathan, 2009-03 This research study seeks to understand the nature of organisational change with respect to offshore outsourcing of information technology services in a multinational pharmaceutical company and to examine the effectiveness of approaches used to manage this change so that lessons may be drawn from these experiences Despite the abundant literature on effective organisational change management the key factors that need to be managed properly at different stages of the offshore outsourcing process are not well understood The research adopts a processual view to paint a broad picture of the issues involved in these different stages A generic process model of change based on the review of the change literature was first developed to represent how change was intended to occur This model focuses on the following four stages in the change process context diagnosis and planning implementation and institutionalisation The research employs an interpretive case study approach and draws on fieldwork from three independent information systems departments cases of the company where offshore outsourcing programmes were implemented Qualitative data from semi structured interviews direct observation and document analysis are analysed by applying the generic process model to produce a detailed account of the way in which change was managed in the case organisations The findings reveal that a combination of contextual factors both external and internal to the company influenced the adoption and use of offshore outsourcing in the case organisations Externally the economic forces were found to be the main catalyst for the change while

internally the role of the executive leadership and the lack of internal resources further explain the motivations behind the adoption of offshore outsourcing. The study illustrates that achieving successful outcomes from offshore outsourcing activities critically depends on the organisation adequately addressing a number of factors such as conveying a sense of urgency, developing and communicating the vision, identifying the benefits of change and how they will be delivered, generating short term wins, providing education and training, developing a fit between the change and organisational culture etc throughout the change process. The findings also highlight the effects of offshore outsourcing on the case organisations including change in job roles and responsibilities and organisational learning activities that enable corrective actions to improve change management efforts. An important contribution of this research is the development of a model providing a more comprehensive understanding of the change process associated with the implementation of offshore IT outsourcing. Recommendations for policy makers and change managers to improve change management practice based on the research findings as well as recommendations for further research form a significant part of the conclusions.

LEADERSHIP AND ORGANISATIONAL PERFORMANCE Dr. Godwin C. Arikibe, 1901. Leadership is inherent in every being despite one's job profile. But qualitative training and other traits are very important for the right behaviours. Every follower possesses attribute of a leader but because these are somewhat concealed to lead effectively becomes a huge challenge to many. This book is as a result of many years of research. It focused on discovering those behavioural attributes that could combine effectively with the leader's competing roles to enhance his performance. A Competing Value Framework (CVF) was applied to understand the leadership behaviours characteristics, attributes and roles that could influence a leader even in the face of contingency factors. The result was quite revealing. Leaders that combine their roles with other attributes/skills achieve behavioural complexity which are performance enhancing behaviours. Furthermore, leaders are distinguished by their unique mental attitude particularly in four roles they play: motivation, vision, analytic and task master roles. Combination of these with other attributes and characteristics enhances

the leadership complexity This book is a useful material for those in the ministries academia and organisations of different sizes It s a book every leader must possess to comprehend the behavioural complexities relevant for organisational performance
