Handbook of Research on Connecting Philosophy, Media, and Development in Developing Countries Okocha, Desmond Onyemечи, Onobe, Melchizedec J., Alike, Mirian Ngozi, 2022-05-13 Developing nations have been experimenting with different models and theories in their quest for development for decades but are missing some critical elements when mirrored or judged via a Westernized lens In order for these countries to successfully establish their identity and address issues that have held them back in the past further study on the use of media and philosophy in correlation with development must be conducted The Handbook of Research on Connecting Philosophy Media and Development in Developing Countries examines how media can be utilized to bridge the gap between the past and the future for developing countries and drive sustainable development The book also seeks to reimagine development within developing regions through the prism of their unique cultures religions media and philosophies so they can take hold of their identity and portrayals within the international arena Covering topics such as human development new media language and culture this major reference work is ideal for government officials policymakers scholars researchers academicians practitioners instructors and students

Reloading Data Protection Serge Gutwirth, Ronald Leenes, Paul De Hert, 2013-10-28 This volume brings together papers that offer conceptual analyses highlight issues propose solutions and discuss practices regarding privacy and data protection The first section of the book provides an overview of developments in data protection in different parts of the world The second section focuses on one of the most captivating innovations of the data protection package how to forget and the right to be forgotten in a digital world The third section presents studies on a recurring and still important and much disputed theme of the Computers Privacy and Data Protection CPDP conferences the surveillance control and steering of individuals and groups of people and the increasing number of performing tools data mining profiling convergence to achieve those objectives This part is illustrated by examples from the domain of law enforcement and smart surveillance The book concludes with five chapters that advance our understanding of the changing nature of privacy concerns and data protection

Philosophy of Education in the On-Life Era: The Journey Towards a New Conceptualization of Learning Černý, Michal, 2024-09-27 In the infosphere era the philosophy of education must evolve to address new methods of learning and knowledge communication The infosphere era is characterized by the presence of data and rapid technological advancements calling for a reevaluation of traditional educational frameworks It recognizes the importance of developing digital literacy fostering adaptability and nurturing skills for navigating an ever changing educational landscape Education must now prepare learners to thrive in a complex interconnected world where the boundaries between information technology and human experience are increasingly blurred Philosophy of Education in the On Life Era The Journey Towards a New Conceptualization of Learning offers a comprehensive view of the transformation of the philosophy of education in the infosphere age It uses Luciano Floridi's of transforming educational process ideas as well as Heideggrian phenomenology

and pragmatism to highlight aspects of contemporary philosophy of education and perspectives for effective solutions This book covers topics such as educational technologies information literacy and pedagogy and is a useful resource for philosophers education professionals professors teachers academicians scientists and researchers The Online Self Soraj Hongladarom, 2016-07-27 This book investigates the emerging phenomenon of the self as it exists in the online world It argues for an externalist conception of self and identity one that does not depend on the continuity of consciousness of the subject It also offers an analysis of related phenomenon such as online friendship and games based on this analysis An outstanding feature of social networking sites such as Facebook and MySpace is that it allows for the user to put forward their selves or their identity onto the Internet and use the online self as an anchor to connect with any number of friends each of whom also has their own online selves A number of questions then arise which are deeply conceptual and philosophical in nature What is the metaphysical nature of this emerging online self Is it the same or fundamentally different from the offline self with which we are already familiar Since increasing numbers of people are connected to the online world this world itself seems to be taking on a reality of its own This much has been appreciated by a number of scholars in the field However there seems to be lacking a systematic study of the philosophical and metaphysical nature of the self that has become a key element in cyberspace a key topic which this volume addresses Apart from the problem of constitution of the online self this volume addresses related questions concerning personal identity in the online world and scrutinizes computer games and the characteristics that they share with social networking sites Unlike the majority of the existing literature which discusses the topic from a more social scientific perspective this volume fills the lacuna of a philosophical and theoretical study of the online world *Philosophy and Engineering* Diane P. Michelfelder, Byron Newberry, Qin Zhu, 2016-11-26 This volume the result of an ongoing bridge building effort among engineers and humanists addresses a variety of philosophical ethical and policy issues emanating from engineering and technology Interwoven through its chapters are two themes often held in tension with one another Exploring Boundaries and Expanding Connections Expanding Connections highlights contributions that look to philosophy for insight into some of the challenges engineers face in working with policy makers lay designers and other members of the public It also speaks to reflections included in this volume on the connections between fact and value reason and emotion engineering practice and the social good and of course between engineering and philosophy Exploring Boundaries highlights contributions that focus on some type of demarcation Public policy sets a boundary between what is regulated from what is not academic disciplines delimit themselves by their subjects and methods of inquiry and professions approach problems with unique goals and by using concepts and language in particular ways that create potential obstacles to collaboration with other fields These and other forms of boundary setting are also addressed in this volume Contributors explore these two themes in a variety of specific contexts including engineering epistemology engineers social responsibilities engineering and public policy making engineering innovation and the affective dimensions of

engineering work The book also includes analyses of social and ethical issues with emerging technologies such as 3 D printing and its use in medical applications as well as social robots Initial versions of the invited papers included in this book were first presented at the 2014 meeting of the Forum on Philosophy Engineering and Technology fPET held at Virginia Tech in Blacksburg Virginia USA The volume furthers fPET s intent of extending and developing the philosophy of engineering as an academic field and encouraging conversation promoting a sense of shared enterprise and building community among philosophers and engineers across a diversity of cultural backgrounds and approaches to inquiry

Protecting Individuals Against the Negative Impact of Big Data

Manon Oostveen, 2018-07-13 In the contemporary information society organisations increasingly rely on the collection and analysis of large scale data popularly called big data to make decisions These processes which take place largely beyond the individual s knowledge produce a cascade of effects that go beyond privacy and data protection Should we focus on the possibilities of tackling these often negative effects through other areas of law or maybe even find new solutions to cope with the dark side of big data This ground breaking book is the first to address this crucially important question in detail Among the issues raised in the analysis are such vital elements as the following what is meant by big data privacy according to the European Court of Human Rights and the Court of Justice of the European Union what the European Union legal framework on privacy and data protection consists of and how it functions in the light of big data what companies governments and other organisations are permitted to do with big data under the current regulatory framework the central importance of personal autonomy circumstances that influence whether or not the right to privacy is triggered big data s possible impact on democracy through inter alia potentially limiting freedom of expression how governmental or corporate surveillance chills the receiver s gathering of information and ideas selective offering of choices or information or manipulation of people s ideas procedural aspects that influence the extrapolation of normative concepts of privacy and data protection and how discrimination occurs in big data This book foregrounds a critical scrutiny of commercial uses of big data its scale its limited capacity for independent oversight and the expected prevalence of interference with individuals rights The author s conclusions explore possible legal alternatives to mitigate the negative impact of big data using legal instruments case law and legal academic literature in her analysis Because the amount of digital data keeps growing and the private lives of individuals are increasingly taking place online and because of the opacity of the big data process the fundamental values that are at stake and the speed of technological developments compared to the pace of legal reform this comprehensive assessment of flaws in the current framework and possible practical solutions will be warmly welcomed by practitioners policymakers and government officials in all legal fields related to privacy and data protection
