Communication in Palliative Nursing Elaine Wittenberg-Lyles, Joy Goldsmith, Betty Ferrell, Sandra L. Ragan, 2013-01-01

Communication in Palliative Nursing unites complementary work in communication studies and nursing research to present a theoretically grounded curriculum for teaching palliative care communication to nurses. The chapters outline the COMFORT curriculum comprised of these elements: Communication Orientation and opportunity, Mindful presence, Family Openings, Relating, and Team communication. Central to this curriculum is the need for nurses to practice self care. Based on a narrative approach to communication which addresses communication skills development holistically, this volume teaches nurses to consider a holistic model of communication that aligns with the holistic nature of palliative care. This work moves beyond the traditional and singular view of the nurse as patient and family teacher to embrace more complex communication challenges present in palliative care, namely providing care and comfort through communication at a time when patients, families, and nurses themselves are suffering. In addition to collaborating with physicians, the nurse's role involves speaking with patients and families after they have received bad news and often extends to discussions of spiritual and religious concerns. This book covers communication theory, clinical tools, and teaching resources to help nurses enhance their own communication and create comfort for themselves as well as for patients and their families.

Textbook of Palliative Care Communication

Elaine Wittenberg, Betty Ferrell, Joy Goldsmith, Thomas Smith, Myra Glajchen, George Handzo, Sandra L. Ragan, 2015-10-23. The Textbook of Palliative Care Communication is the authoritative text on communication in palliative care, providing a compilation of international and interdisciplinary perspectives. The volume was uniquely developed by an interdisciplinary editorial team to address an array of providers including physicians, nurses, social workers, and chaplains, and unites clinicians with academic researchers interested in the study of communication. By featuring practical conversation and curriculum tools stemming from research, this text integrates scholarship and inquiry into translatable content that others can use to improve their practice, teach skills to others, and engage in patient-centered communication. The volume begins by defining communication, explicating debatable issues in research, and highlighting specific approaches to studying communication in a palliative care context. Chapters focus on health literacy and cultural communication, patient and family communication barriers, and approaches to discussing palliative care with specific patient populations, discussing pain, life support, advance care planning, and quality of life topics such as sexuality, spirituality, hope, and grief. Team communication in various care settings is outlined, and current research and education for healthcare professionals are summarized. Unique to this volume are chapters on conducting communication research, both qualitatively and quantitatively, to promote further research in palliative care.

Communication in Palliative Nursing Elaine Wittenberg-Lyles, 2013. This book unites complementary

work in communication studies and nursing research to present a theoretically grounded curriculum for teaching palliative care communication to nurses. The chapters outline the COMFORT curriculum. Central to this curriculum is the need for nurses to practice self care. Health Literacy and Palliative Care National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Population Health and Public Health Practice, Roundtable on Health Literacy, 2016-06-18. The Institute of Medicine Roundtable on Health Literacy convened a 1 day public workshop to explore the relationship between palliative care and health literacy and the importance of health literate communication in providing high quality delivery of palliative care. Health Literacy and Palliative Care summarizes the discussions that occurred throughout the workshop and highlights the key lessons presented, practical strategies and the needs and opportunities for improving health literacy in the United States.

Somaesthetics and Design Culture, 2023-04-03. Design permeates every dimension of our lifeworld from the products we consume and the built environments in which we live to the adorned and stylized beings that we are and the natural preserves where we seek relief from the stressful bustle of urban life. Design is where contrasting values of functionality and aesthetic pleasure converge. At the core of design is the human soma, an active perceptive subjectivity that creates and evaluates design but is also its cultivated product. This collection of ten essays explores the somaesthetics of design in multiple fields from ritual craft and healthcare to architecture, urbanism and the new media of extended realities.

Communication as Comfort Sandra L. Ragan, Elaine M. Wittenberg-Lyles, Joy Goldsmith, Sandra Sanchez Reilly, 2008-05-15. This scholarly volume explores communication at the end of life emphasizing palliative care and the circumstances of patients in need of such consideration.

Communication in Palliative Nursing Elaine Wittenberg-Lyles, Joy V. Goldsmith, Sandra L. Ragan, Terri Ann Parnell, 2019. The first edition of Communication in Palliative Nursing was published in 2012 and became the market leader for nurses wanting to learn more about how to improve and teach palliative care communication. For the last 8 years it has remained the only text solely focused on the vital role of nurses in palliative care. During this time the COMFORT model was taught to nurses nationwide who brought the curriculum back to their own institutions and taught components of the model to more than 10 000 healthcare providers across the United States. Wittenberg, Ferrell, Goldsmith, Ragan, Buller 2017. Numerous journal articles and research studies have been produced to highlight the principle components of the COMFORT model and test its effectiveness among healthcare audiences across a variety of clinical and educational settings. Through this all as the model was disseminated to clinical audiences of bedside nurses, nurse leaders, nursing students and interprofessional learners, feedback was captured about COMFORT. Comments revealed major components of the model that were working and weren't working for the nurses and other healthcare providers who utilized the strategies with patients and families and began using curriculum tools for teaching and integrating palliative care communication instruction. So much like the model's grounding in a transactional communication approach which relies on the co-created interaction between parties, it was clear that the COMFORT model

was also ebbing and flowing and had to change More importantly palliative care has been growing changing expanding and becoming more sophisticated more wide spread Now more than ever before palliative care is provided in the home clinic or inpatient setting and serves patients who are seriously or chronically ill and their families It became evident that in order to continue improvements to the model and to keep up with the changing landscape of palliative care and palliative patient populations a new edition was necessary Before we highlight the changes it is never too early to overstate our steadfast commitment to the following principles We believe that communication research and theory can shape palliative care practices providing tools for a variety of contexts We believe that palliative care offering compassionate holistic treatment for patients and their families will not be possible without caring for the entire person body and mind We believe that communicating about palliative care must begin at diagnosis of serious illness not just at end stages We believe in a patient centered approach to communication that emphasizes the role of the family caregiver in the illness trajectory We believe that intentional communication emphasizing team processes among physicians nurses social workers chaplains and other healthcare professionals improves palliative care practice We believe that palliative care should be introduced early in the communication education of all health professionals We believe that education about palliative care and communication must extend to patients and families who can then advocate for and partner more productively in such services We believe that communication with the family caregiver is essential for the treatment of pain and symptom management We believe that frequent conversations are needed across the disease care trajectory as patients and families encounter ongoing points of decision making

Oxford Textbook of Communication in Oncology and Palliative Care David William Kissane, Barry D. Bultz, Phyllis N. Butow, Carma L. Bylund, Susie Wilkinson, 2017 Communication is a core skill for medical professionals when treating patients Cancer and palliative care present some of the most challenging clinical situations This book provides evidence based guidelines alongside case examples tips and strategies to achieve effective patient centred communication

Communication in Palliative Care Janet Dunphy, 2020-03-26 Janet's skill in this book lies in her ability to combine theory with narrative and natural science with humanity to create a text that resonates deeply bringing to light the message that intellectual knowledge is nothing if not accompanied by sensitive delivery and humanity Mary Kiely in the Foreword This practical thought provoking guide provides the unemotional clear and accurate advice necessary for communicating with patients in a palliative care setting Completely up to date this book includes new initiatives born of the End of Life Care Strategy 2008 and details the ethics of key issues in palliative care Crucially it considers the fine art of communication the pivotal aspect of being a palliative care expert that is so difficult to quantify and teach It uses genuine anecdotes and case studies to bring theory to life and assist in everyday application Communication in Palliative Care is a wide ranging invaluable resource for palliative care professionals across all clinical settings

Caring for the Family Caregiver Elaine Wittenberg-Lyles, Joy V. Goldsmith, Sandra L. Ragan, Terri Ann Parnell, 2021 Caring for the Family Caregiver is an extensive

practical tool kit for health care providers across the healthcare continuum Regardless if it is a mother caring for a child with a developmental disability a wife caring for a husband with a long term chronic illness or a daughter sitting at the bedside of her father who is enrolled in hospice family caregivers are the silent other patient in the health care drama Healthcare providers who do not attend to the needs of the caregiver not only inflict interactional suffering but dilute their treatment by not engaging the caregiver as a partner In fact they may unintentionally do harm as the caregiver flounders and thus patient treatment fails As noted by one dying cancer patient in an educational YouTube video of his cancer journey there are two patients not one If we are to eliminate the interactional suffering experienced by family caregivers we must train both the caregiver and the health care team for the important interaction and roles that are required for the successful care of the patient Caregivers lack information skills and emotional support for the tireless task they are volunteering for They need to be taught how to advocate for themselves and their patients and how to best communicate with the health care team Likewise health care providers have the skills and knowledge to provide outstanding patient centered care however they are not taught the importance of the family caregiver nor do they always understand that experience or how to help

Palliative Care Conversations David Gramling, Robert Gramling, 2019-01-14 This book will be the first of its kind to offer intensive conversation analysis on patient clinician interactions in the context of palliative medicine The book focuses on a series of individual case studies of conversations that revolve in each case around one key critical term that is often evoked or understood differently by clinicians and patients
