Read the passage below before answering the question.

Most Americans know that HIV/AIDS is a worldwide health problem; many also believe it is the most dangerous disease across the globe. Malaria, however, far surpasses HIV/AIDS as a cause of sickness and death around the world. One likely reason for Americans' lack of awareness about malaria may be that malaria has been eradicated in this country, thanks in large part to efforts made during World War II. U.S. scientists sought new medicines and methods to control the effects and spread of malaria among combat troops. Those efforts were later applied to an eradication effort that has kept the U.S. malaria-free for decades.

Stimulus Question #: 1 of 4

Which of the following data supports the author's argument about why Americans lack awareness about the dangers of malaria around the world?

.....

- ☐ 95% of American adults in a survey believe HIV/AIDS is more dangerous worldwide than malaria.
- ☐ A financial study finds that U.S. churches donated over \$10,000 last year to supply mosquito nets to impoverished countries to prevent the spread of malaria.
- ☐ An epidemiology report finds there have been no cases of malaria originating from the United States in the last 60 years.
- ☐ A World Health Organization investigation reports that over half of the world's population is in danger of malaria.
