Colonial Spectacles Marieke Bloembergen, 2006 Teilw zugl Amsterdam Univ Diss 2001 Revision of the author s thesis doctoral University of Amsterdam De nieuwe richting in de kunstenijverheid in Nederland Jo de Jong, 1929 A Century of Architecture in the Netherlands, 1880-1990 Joseph Buch, 1993 Bibliotheekleven , 1926 **Gids voor moderne architectuur in Nederland** Paul Groenendijk, Piet Vollaard, Piet Rook, 1998 Reis gids voor moderne Nederlandse architectuur waarin ruim 700 objecten worden afgebeeld en beknopt beschreven Geschiedenis van de bouwstijlen in de hoofdtijdperken der architectuur Eugen Gugel, 1886 **Contemporary Architects** Muriel Emanuel, 2016-01-23 The Art of Building Auke Van Der Woud, 2017-10-23 This title was first published in 2002 In the second half of the 18th century philosophy provided the fundamental characteristics of architecture The architects of the 19th century then introduced the empirical comparative study of buildings This phenomenon has usually been regarded exclusively in terms of historicism but this is to underestimate the fact that they were architects The problems for which they sought solutions did not belong to the past but were part of their own age or the future The architecture of the past was to the 19th century architect significant to a large degree as a silent witness of a bygone era a representation of beauty Historical architecture provided study material for their inquiries into the aesthetic laws that they hoped would give the 19th century a splendid contemporary architecture The art of building as a way of visibly edifying society was the most important of all the arts with architectural theory showing the way to this lofty purpose This book takes this as a starting point Focusing on place as well as time the text discusses the Dutch architects who contributed to this idea discussing several of the most important but ultimately seeing their activities not as the cause but the expression of movements that continuously changed the face of architecture The particularly Dutch nature of architecture took visual beauty to result from the visible success of technical intelligence and creativity rather than philosophy and aesthetics The grand 19th century themes discussed in the book are the author suggests somewhat un Dutch originating as they did from an idealist intellectual tradition The Amsterdam School Maristella Casciato, 1996 The first years of this century witnessed the birth in Amsterdam of a movement which with its sculptural opulence of form would alter dramatically the appearance of that city Under the leadership of architects like Wijdeveld Kramer and De Klerk there evolved an expressionist visual language which under the name of Amsterdam School would create a stir on an international scale Here aided by almost 500 illustrations is a comprehensive survey of many designs produced by the Amsterdam School including such masterpieces as Van der Mey s Scheepvaarthuis Berlage s plan for Amsterdam South Kramer s bridges and De Klerk s De Dageraad and Eigen Haard housing estates The work also deals with the carvings of Hildo Krop street furniture furniture designs and domestic interiors The extensive bibliography and biographies of the most important architects make this an indispensable work of reference **Encyclopedia of Interior Design** Joanna Banham, 1997-05-01 From ancient Greece to Frank Lloyd Wright studiola to smoking rooms chimney boards

to cocktail cabinets and papier m ch to tubular steel the Encyclopedia of Interior Design provides a history of interior decoration and design from ancient times to the present day It includes more than 500 illustrated entries covering a variety of subjects ranging from the work of the foremost designers to the origins and function of principal rooms and furnishing types as well as surveys of interior design by period and nationality all prepared by an international team of experts in the field Entries on individuals include a biography a chronological list of principal works or career summary a primary and secondary bibliography and a signed critical essay of 800 to 1500 words on the individual s work in interior design The style and topic entries contain an identifying headnote a guide to main collections a list of secondary sources and a signed critical essay

Urban Oases, Dutch Hofjes as Hidden Architectural Gems Willemijn Wilms Floet, 2022-04-06 Urban Oases is an ode to the architecture of Dutch hofjes It explains why hofjes have been a natural and attractive part of the urban fabric of the Netherlands for six centuries and why they continue to appeal to new generations The appeal of hofje architecture lies in its ability to renew its medieval archetype an enclosed living environment around a shared green garden Hofjes allow both residents and visitors to enjoy an especially serene and intimate atmosphere that contrasts surprisingly with the urban experience of hustle and bustle The drawings text and photography of Urban Oases take the reader to the capillaries of old Dutch cities and are relevant to an important contemporary global question How can high quality compact residential environments be created in twenty first century cities Inspired by this extraordinary architectural heritage the author addresses everyone who wants to contribute to a sustainable and liveable city This book is part of a series of open access books published jointly by TU Delft OPEN Publishing and nai010

The Architectural Representation of Islam Eric Roose, 2025-10-01 This book is a study of Dutch mosque designs objects of heated public debate Until now studies of diaspora mosque designs have largely consisted of normative architectural critiques that reject the ubiquitous domes and minarets as hampering further Islamic architectural evolution The Architectural Representation of Islam Muslim Commissioned Mosque Design in The Netherlands represents a clear break with the architectural critical narrative and meticulously analyzes twelve design processes for Dutch mosques It shows that patrons by consciously selecting steering and replacing their architects have much more influence on their mosques than has been generally assumed Through the careful transformation of specific building elements from Islamic architectural history to a new context they literally aim to construct the ultimate Islam Their designs thus evolve not in opposition to Dutch society but to those versions of Islam that they hold to be false

Romantic Modernism Wim Denslagen, 2009 In the world of architectural conservation there is

little tolerance for reconstructing or even protecting historic facades when everything behind is modern and even less for reconstructing a building that has been completely destroyed These offenses are considered lies against history In this thoughtful revealing work conservation expert Wim Denslagen traces this predilection for honesty to the legacy of Functionalism a Romantic era movement that denounced the building of pseudo architecture in favor of a new rational form of building With detailed analyses of headline making restoration projects from Bruges to Berlin Denslagen shows that the adoption of these romantic values by conservationists gave rise to a new wave of modern additions and transformations

Avant-garde and Criticism K. Beekman, Jan de Vries, 2007 Avant Garde and Criticism sheds new light on the complex aims functions practices and contexts of art criticism in relation to the European avant garde Although many avant garde works and the avant gardes of various countries have been analyzed considerably less attention has been given to the reviews in newspapers and journals on avant garde literature art architecture and film This volume of Avant Garde Critical Studies will look at how art critics operated in a strategic way The strategies of avant garde criticism are diverse Art critics especially when they are artists themselves attempt to manipulate the cultural climate in their favour They use their position to legitimize avant garde concepts and to conquer a place in the cultural field But they are also markedly influenced by the context in which they operate The position of fellow critics and the ideological bias of the papers in which they publish can be as important as the political climate in which their criticism flourishes The analysis of avant garde art criticism can also make clear how strategies sometimes fail and involuntarily display non avant garde characteristics On the other hand traditionalist criticism on the avant garde offers new insights into its status and reception in a given time and place This volume is of interest for scholars teachers and students who are interested in the avant garde of the interbellum period and work in the field of literature art film and architecture
