

# OPC Unified Architecture

Industrial machine-to-machine communication protocol for interoperability

- ▶ Originally developed by OPC Foundation for IoT applications (keyword Industry 4.0)
- ▶ OO Information modeling capabilities
- ▶ Enhanced security, performance and scalability
- ▶ Supports buffering, session mgmt, pub-sub, per-connection heartbeats/timeouts, discovery
- ▶ Multi-platform implementation, lightweight ↪ embedding possible
- ▶ Commercial SDKs available with stack from OPC foundation or open source stack implementations (C, C++, Java, JS, Python) for servers and clients

- ↪ Excellent experience in ATLAS since 2012
- ▶ Fully supported by JCOP
- ▶ Still requires expertise and effort in programming with OPC UA ...
- ↪ Provide development environment and generate OPC UA related code?

**S-BPM ONE - Scientific Research** Christian Stary, 2012-03-31 This book constitutes the thoroughly refereed scientific proceedings of the 4th International Conference on Subject Oriented Business Process Management S BPM ONE 2012 held in Vienna Austria in April 2012 The 12 papers were carefully reviewed and selected from 36 submissions and are completed by one invited keynote paper and a summary of the tutorial on subject oriented business process management S BPM as a discipline is characterized by a seamless approach toward the analysis modeling implementation execution and maintenance of business processes with an explicit stakeholder focus This year's contributions

address all life cycle activities in particular analyzing business objectives subject behavior design and integration and automating complex work procedures Handbook on Digital Twin and Artificial Intelligence Techniques for Rail Applications Maksym Spiryagin, Stefano Bruni, Colin Cole, 2025-06-17 With contributions from experts from around the world this handbook aims to systemize the existing experience and knowledge that can be used to the development of more efficient and controlled railway systems As a result this handbook showcases the modern methods methodologies and frameworks for the development of DT and AI architectures and apparatus in the area of the existing railway systems and transport engineering tasks The chapters cover such varied and specialized topics as the processes related to the transformation of a physical twin into a digital twin the application of data driven and physics based simulation approaches in the development of digital twins asset management application tasks with the implementation of DT and AI and the experimental and field applications of the DT and AI concepts and technologies in railway transport system design and predictive maintenance tasks Handbook on Digital Twin and Artificial Intelligence Techniques for Rail Applications is essential reading for engineers practitioners and researchers involved in the development of railway transport and transit systems **DIN EN IEC 62541-9, OPC Unified Architecture. Part 9, Alarms and Conditions (IEC 62541-9:2020)**, 2021 **Collaborative Process Automation Systems** Martin Hollender, 2010 Providing a comprehensive overview of the state of the art in Collaborative Process Automation Systems CPAS this book discusses topics such as engineering security enterprise connectivity advanced process control plant asset management and operator efficiency Collaborating with other industry experts the author covers the system architecture and infrastructure required for a CPAS as well as important standards like OPC and the ISA 95 series of standards This in depth reference focuses on the differences between a CPAS and traditional automation systems Implications on modern automation systems are outlined in theory and practice This book is ideal for industrial engineers as well as graduate students in control and automation Semantic Service Integration for Smart Grids S. Rohjans, IOS Press, 2012-12-13 The scope of the research presented includes semantic based integration of data services in smart grids achieved through following the proposed S2 In approach developed corresponding to design science guidelines This approach identifies standards and specifications which are integrated in order to build the basis for the S2 In architecture A process model is introduced in the beginning which serves as framework for developing the target architecture The first step of the process stipulates to define requirements for smart grid ICT architectures being derived from established studies and divided into two classes architecture and non functional requirements NFR Based on the architecture requirements the following specifications have been basically selected The IEC CIM representing a domain specific data model the OPC UA being a communication standard with special respects to information modeling and WSMO as an approach to realize the concept of Semantic Web Services The next step specifies to develop both a semantic information model integration of CIM and OPC UA and semantic services integration of CIM and WSMO These two

components are then combined to obtain the target architecture which allows precise descriptions of services as well as their combination and semi automatic execution Finally the NFR are considered in order to evaluate the architecture based on simulated representative use cases

**Research Anthology on BIM and Digital Twins in Smart Cities** Management Association, Information Resources,2022-09-16 In recent years smart cities have been an emerging area of interest across the world Due to this numerous technologies and tools such as building information modeling BIM and digital twins have been developed to help achieve smart cities To ensure research is continuously up to date and new technologies are considered within the field further study is required The Research Anthology on BIM and Digital Twins in Smart Cities considers the uses challenges and opportunities of BIM and digital twins within smart cities Covering key topics such as data design urban areas technology and sustainability this major reference work is ideal for industry professionals government officials computer scientists policymakers researchers scholars practitioners instructors and students
