Anglophone Fiction Armelle Parey, 2018-09-03 This book offers to delineate a key phenomenon in contemporary Anglophone fiction novel expansion when the plot and characters from a finished novel are retrieved to be developed in new adventures set before after or during the narrative time of the source text If autographic and allographic sequels are almost as old as literature prequels that imagine the anteriority of a narrative and coquels that develop secondary characters in the same story time as the source text are more recent The overall trend for novel expansion spread in the mid 1980s and 1990s and has since shown no sign of abating This volume is organised following three types of relationships to the source texts even if these occasionally combine to produce a more complex structure This book comprises 11 essays preceded by an introduction

that examine narrative strategies aesthetic ethical and political tendencies underlying these novel expansions Following the overview provided in the introduction the reader will find case studies of prequels coquels and sequels before a final chapter that encompasses them all and more
