**Scientific Mythologies** James A. Herrick, 2008-01-01 What does science have to do with science fiction What does science fiction have to do with scientists What does religion have to do with science and science fiction In the spiritual vacuum of our post Christian West new mythologies continually arise The sources of much religious speculation however may be surprising Author James Herrick directs our attention to a wide range of scientists filmmakers science fiction writers and religious philosophers and discovers there the role that science and science fiction have played in such mythmaking From scientists such as Francis Bacon Francis Crick Carl Sagan and Freeman Dyson to filmmakers such as George Lucas and Steven Spielberg to science fiction writers such as Olaf Stapledon Sir Arthur C Clarke Robert Heinlein and Isaac Asimov Herrick finds a curious collusion of science with science fiction for promoting and justifying alternative spiritualities The rise of these new mythologies he argues is no longer a curiosity at the edge of Western culture This alchemy is catalyzing a religious vision of new gods a new humanity and alien races with superior intelligence and secret knowledge This new mythology overshadows the realms of politics science and religion Should we follow such visions Does science endorse these mythologies Are we being offered a spirituality superior to the Judeo Christian tradition This book will help you decide

The Internet Myth Paolo Bory, 2020-04-29 The Internet is broken and Paolo Bory knows how we got here In a powerful book based on original research Bory carefully documents the myths imaginaries and ideologies that shaped the material and cultural history of the Internet As important as this book is to understand our shattered digital world it is essential for those who would fix it Vincent Mosco author of The Smart City in a Digital World The Internet Myth retraces and challenges the myth laying at the foundations of the network ideologies the idea that networks by themselves are the main agents of social economic political and cultural change By comparing and integrating different sources related to network histories this book emphasizes how a dominant narrative has extensively contributed to the construction of the Internet myth while other visions of the networked society have been erased from the collective imaginary The book decodes analyzes and challenges the foundations of the network ideologies looking at how networks have been imagined designed and promoted during the crucial phase of the 1990s Three case studies are scrutinized so as to reveal the complexity of network imaginaries in this decade the birth of the Web and the mythopoesis of its inventor and the histories of two Italian networking projects the infrastructural plan Socrate and the civic network Iperbole the first to give free Internet access to citizens The Internet Myth thereby provides a compelling and hidden sociohistorical narrative in order to challenge one of the most powerful myths of our time This title has been published with the financial assistance of the Fondazione Hilda e Felice Vitali Lugano
