Online Cloud Computing Business Trends Technologies:

Business Trends in the Digital Era Xiaoming Zhu, Bingying Song, Yingzi Ni, Yifan Ren, Rui Li, 2016-05-31 This book introduces 10 mega business trends ranging from big data to the O2O model. By mining and analyzing mountains of data, the author identifies these 10 emerging trends and goes to great lengths to explain and support his views with up-to-date cases. By incorporating the latest developments, this book allows readers to keep abreast of rapidly advancing digital technologies and business models. In this time of mass entrepreneurship and innovation, acquiring deep insights into business trends and grasping opportunities for innovation give readers business executives in particular and their companies a competitive advantage and the potential to become the next success story. The Chinese version of the book has become a hit with some business schools using it as a textbook for their S T Innovation and Business Trends programs. It also provides business executives with a practical guide for their investment and operation decisions.

Cloud Computing Igor Faynberg, Hui-Lan Lu, Dor Skuler, 2016-01-19 Cloud Computing Business Trends and Technologies provides a broad introduction to Cloud computing technologies and their applications to IT and telecommunications businesses, i.e. the network function virtualization NFV. To this end, the book is expected to serve as a textbook in a graduate course on Cloud computing. The book examines the business cases and then concentrates on the technologies necessary for supporting them. In the process, the book addresses the principles of as well as the known problems with the underlying technologies such as virtualization, data communications, network and operations management, security, and identity management. It introduces, through open source case studies based on OpenStack, an extensive illustration of lifecycle management. The book also looks at the existing and emerging standards, demonstrating their respective relation to each topic. Overall, this is an authoritative textbook on this emerging and still developing discipline which guides the reader through basic concepts to current practices to state-of-the-art applications. Considers technical standards, bodies involved in Cloud computing standardization. Is written by innovation experts in operating systems and data communications, each with over 20 years experience in business research and teaching.

Business Process On-Demand; Studying the Enterprise Cloud Computing and Its Role in Green IT Seyed Amir Beheshti, 2011-09 Master's Thesis from the year 2011 in the subject Engineering Industrial Engineering and Management grade 1 Vienna University of Technology course Business Engineering and Computer Science language English abstract Climate change and the impact it has on our lives have forced many governmental and also non-governmental organizations to conceive of new rules, regulations, and standards to control CO₂ and greenhouse gas (GHG) emissions. Calculating the energy efficiency and reducing the electricity consumption in data centers are important steps towards greening the IT in organizations. Several studies have shown that by migrating into the cloud, companies in most cases could reduce their costs in addition to decreasing their greenhouse gas emissions. Unfortunately, lack of guidelines and varying and limited services from different cloud providers have made the adoption of appropriate Cloud services a challenge for many organizations. In

this regard there is a vital need to study and analyze available services from different cloud vendors and provide enterprises with the best solutions available regarding their specific business requirements This thesis focuses on cloud computing and its efficiency for individual organizations It attempts to study the potential benefits of cloud computing by taking the environmental and energy consumption advantages into consideration Cloud Computing is not a new concept and has been a hype term in recent years Cloud computing is based on the available technologies and it is all about using a new term for the existing technologies But the question is why to create a new name for what already exists The answer to this question is closely related to the potential that Cloud computing has for organizations It is all about conversion of capital expenditure CAPEX to the operational expenditure OPEX and the possible advantages that this conversion could have for any organization that chooses to migrate into the Cloud
