**The United States Army Second Division Northwest of Chateau Thierry in World War I** John W. Thomason, Jr.,2015-01-24 In 1927 at the request of his superiors John W Thomason Jr set out to chronicle the history of the U S Army 2nd Division particularly during the bloody action of 1918 A

proven writer with a solid military background through his service in the Marine Corps and at that time two successful books under his belt Thomason was a natural choice to write this important document The project ran into trouble however when Thomason made unflattering discoveries regarding command decisions of both Army and Marine officers His subsequent removal from the project at his own request left the document permanently incomplete Here is Thomason's manuscript faithfully reproduced The work of editor George Clark is deliberately limited to matters of spelling and consistency with Clark's comments clearly set apart from Thomason's work present only when necessary for clarification Clark also includes a short biography of Thomason and a brief historical sketch of the 2nd Division to place the action within the framework of the war as a whole Illustrations include Thomason's own maps and drawings originally intended to accompany the work

Northwest Frontier Matthew H. Case, 1982      Publications in Archeology, 1980      Long House, Mesa Verde National Park, Colorado George S. Cattanach, Richard Page Wheeler, 1980      Beneath Haunted Waters Peter Stekel, 2017-09-30

Drama Tragedy Irony Unsolved mysteries And throw in a little greed Beneath Haunted Waters is not a ghost story it's not that kind of haunted at all These are waters haunted by generations of people who cannot forget the story of how two B 24 Liberator bombers disappeared in 1943 and what happened to the boys on board During the World War II years the convention was to call young men in their late teens to their late 20s boys The boys who piloted bombers and fighter aircraft during World War II were 19 or 20 years old barely out of their childhood Imagine boarding a 737 today and seeing a teenager at the controls instead of a person with greying temples That was the situation during the war Beneath Haunted Waters is a story about that era when children flew large airplanes equipped with enough firepower to destroy cities And yet boys they were and boys they will always be But it's primarily a story of how they died not in combat but by accident During World War II the USA lost 7100 combat aircraft and 5300 trainers along with 15 530 pilots crew members and ground personnel in over 52 000 domestic accidents These statistics don't compare to the huge numbers of RAF 8th Air Force and Luftwaffe losses during the European air war but the numbers are still frightening Between 1942 1945 US aviation losses to accidents 12 400 exceeded combat losses 4500 to the Japanese For every plane shot down in the South Pacific there were three lost to accidents within the United States While memoirs of those who served histories of military and political leaders and books about combat abound very little has been written about the terrible toll of aviation training accidents during the war Beneath Haunted Waters is unique because it tells this hardly known and little appreciated story Most information on this subject is covered in official reports It appears in a casual way in many memoirs There are a few histories of the air war during World War II that mention aviation accidents during training or once the boys were in theater There has been no popular academic or comprehensive book on the subject I propose to cover this subject within the more personal story of what happened to the two Liberators that wound up in Huntington Lake and Hester Lake Usually pilots and crews of World War II aircraft were neither old enough to vote nor to drink Many had never driven a car or taken a train ride much less been

in an airplane Nine months after enlistment they were flying the most technologically advanced high performance machines ever built The same could be said for their navigation equipment and radio gear But aviation had been around for only 40 years Aircraft design was still in its infancy Engines failed pilots flew into mountains navigators got lost radios broke and weather forecasts were frequently and fatally wrong **Film Quotations** Robert A.
