*Orphan's Choice* Dondi Schwartz,2025-08-03 The inevitable interaction between Orphan Braque and IDF Unit 1234 5678 newly developed by Commander ABCD Marshall begins a snowball of bloody sensitive guilt ridden events that will impact the main characters as well as potentially all mankind Orphan s beginnings as a computer game fanatic led to the more improbable role he finds himself in as a skilled hacker who is a danger to the security of Israel He has no social life with

limited family life and is a poor student but he finds companionship with other game players and hackers calling them friends His father who is very worried about his son will be quite surprised by what his son achieves by the end of this fictional story based on subjects that may or may not exist in real life Orphan s love of games and computers is a double edged sword which both Orphan and ABCD hold on to Their complex relationship may lead both of them to glory each in their own way Philosophical questions of whether the human race is doomed to destruction or if we are meant to save one another from harm might find possibly realistic answers between the lines of Orphan s Choice some of which the main character will have to deal with in his own life all of this found within a fascinating book combining sharp tongued humor with a variety of expressions of love

*Pacific Air* David Sears,2011-05-31 An excellent volume on the navy s air war in the Pacific during WWII the author has almost certainly created the best one volume study of the subject Booklist In a grand sweeping narrative *Pacific Air* tells the inspiring story of how despite initial disastrous defeats a generation of young naval aviators ultimately vanquished a superior Japanese air force and fleet in the Pacific The instruments of the United States aviators triumphs were the elegantly designed F4F Wildcat F6F Hellcat and the lethal TBF Avenger torpedo bomber With superbly trained U S Navy and Marine Corps aviators at their controls these planes became the most successful aerial weapons in naval history A majestic portrait of a proud era from dual perspectives the inventive minds of young aeronautical engineers and the deadly skills of even younger combat pilots *Pacific Air* brings this important yet underappreciated chapter of World War II vividly to life

*So Much Water, so Little Wood* Daniel J. Theron M.A. TH Ph.D.,2014-01-17 To appreciate this book readers must grasp the symbolism of its title and the front page depicting the authors life story sometimes in rough seas At three four years old he was already strongly aware that he had been called into the Christian ministry an inspiration for a long fruitful life He grew up helping in their South African farm life He commuted to grammar school on horseback accumulating enough miles to ride three times from New York to California It was a financial struggle to become ordained as a clergyman His story is interestingly interspersed with several short unbelievable biographies of classmates and what life was like Read the The Sturdy Warrior Chapter V and others like Albert Schweitzer of the Bushveld and We Shall Triumph in the book mentioned below With several well earned degrees he migrated to the USA to study at Princeton Theological Seminary where he became a professor But then the delicate call that had driven him since childhood was smashed seemingly beyond repair However for him those called into Gods Kingdom can in its wideness find symbolic pulpits and lecterns in many places Of all he found such in Wall Street and

God and how this connection has permeated our universe from the start We cover several areas that include personal stories the micro and macro sources of world events the origins of our cosmos and solar system the emergence of human mindfulness and choice major episodes of the twentieth century the future and the quest for fairness In the course of examining these topics we identify how current scientific research is consistent with our speculation of how God influences our lives in the presence of all this randomness We conclude that the random events affecting us may originate in other dimensions that are inaccessible to us and that God is actively at work in the chaos and randomness that pervades our lives and our world
