The Genesis Quest Michael Marshall, 2020-08-20 A fascinating and challenging story New York Review of Books This is an incredibly absorbing and insightful book about the most important scientific question of our age Mark Miodownik author of *Stuff Matters* The story of the quest to understand life's genesis is a universal one in which everyone can find pleasure and fascination By asking how life came to be we are implicitly asking why we are here whether life exists on other planets and what it means to be alive This book is the story of a group of fragile flawed humans who chose to wrestle with these questions By exploring the origin of life we can catch a glimpse of the infinite How did life begin Why are we here These are some of the most profound questions we can ask For almost a century a small band of eccentric scientists has struggled to answer these questions and explain one of the greatest mysteries of all how and why life began on Earth There are many different proposals and each idea has attracted passionate believers who promote it with an almost religious fervour as well as detractors who reject it with equal passion But the quest to unravel life's genesis is not just a story of big ideas It is also a compelling human story rich in personalities conflicts and surprising twists and turns Along the way the journey takes in some of the greatest discoveries in modern biology from evolution and cells to DNA and life's family tree It is also a search whose end may finally be in sight In *The Genesis Quest* Michael Marshall shows how the quest to understand life's beginning is also a journey to discover the true nature of life and by extension our place in the universe

Foundations of Information Literacy Natalie Greene Taylor, Paul T. Jaeger, 2021-11-15 It's not hyperbole to conclude that in today's world information literacy is essential for survival and success and also that if left unchecked the social consequences of widespread misinformation and information illiteracy will only continue to grow more dire Thus its study must be at the core of every education But while many books have been written on information literacy this text is the first to examine information literacy from a cross national cross cultural and cross institutional perspective From this book readers will learn about information literacy in a wide variety of contexts including academic and school libraries public libraries special libraries and archives through research and literature that has previously been siloed in specialized publications come to understand why information literacy is not just an issue of information and technology but also a broader community and societal issue get an historical overview of advertising propaganda disinformation misinformation and illiteracy gain knowledge of both applied strategies for working with individuals and for addressing the issues in community contexts find methods for combating urgent societal ills caused and exacerbated by misinformation and get tools and techniques for advocacy activism and self reflection throughout one's career

How Molecular Forces and Rotating Planets Create Life Jan Spitzer, 2021-02-09 A reconceptualization of origins research that exploits a modern understanding of non covalent molecular forces that stabilize living prokaryotic cells Scientific research into the origins of life remains exploratory and speculative Science has no definitive answer to the biggest questions What is life and How did life begin on earth In this book Jan Spitzer

reconceptualizes origins research by exploiting a modern understanding of non covalent molecular forces and covalent bond formation a physicochemical approach propounded originally by Linus Pauling and Max Delbrück Spitzer develops the Pauling Delbrück premise as a physicochemical jigsaw puzzle that identifies key stages in life's emergence from the formation of first oceans tidal sediments and proto biofilms to progenotes proto cells and the first cellular organisms *Astrobiology and Humanism* Julian Chela-Flores,2019-06-13 This book reviews the horizons and frontiers of humanism as they interact with the science of life in the universe now generally known as astrobiology As one of the most important conversations of our time the existence of life itself raises deep questions that are meaningful to both astrobiology and humanism The text discusses current disagreements in this intercultural dialogue which are shown to be solely due to the widespread delusion that the horizons and frontiers of science can be ignored Strange Survivors One R. Pagan,2018-02-27 Life is beautiful ruthless and very very strange In the evolutionary arms race that has raged on since life began organisms have developed an endless variety of survival strategies From sharp claws to brute strength camouflage to venom all these tools and abilities share one purpose to keep their bearer alive long enough to reproduce helping the species avoid extinction Every living thing on this planet has developed a time tested arsenal of weapons and defenses Some of these weapons and defenses however are decidedly more unusual than others In *Strange Survivors* biologist One R Pagan takes us on a tour of the improbable the ingenious and the just plain bizarre ways that creatures fight for life Inside this funny fascinating field guide to nature's most colorful characters you'll meet killer snails social bacteria and an animal with toxic elbows But *Strange Survivors* is more than a collection of curiosities it is a love letter to science and an argument for the continuing relevance of this evolutionary battle as we face the threat of resistant bacteria and the need for novel medical therapies Whether discussing blood thinning bats and electric fish or pondering the power of cooperation Pagan reveals the surprising lessons found in some of life's natural oddities and how the tactics they employ to live might aid our own survival **American Trinity** Larry Len Peterson,2017-09-11 *American Trinity* is for everyone who loves the American West and wants to learn more about the good the bad and the ugly It is a sprawling story with a scholarly approach in method but accessible in manner In this innovative examination Dr Larry Len Peterson explores the origins development and consequences of hatred and racism from the time modern humans left Africa 100 000 years ago to the forced placement of Indian children on off reservation schools far from home in the late 1800s Along the way dozens of notable individuals and cultures are profiled Many historical events turned on the lives of legendary Americans like the Father of the West Thomas Jefferson and the Son of the West George Armstrong Custer two strange companions who shared an unshakable sense of their own skills as their interpretation of truths motivated them in the winning of the West Dr Peterson reveals how anti Indian sentiments were always only obliquely about them They were victims but not the cause The Indian was a symbol not a real person The politics of hate and racism directed toward them was also experienced in prior centuries by Jews enslaved Africans and other Christians Hatred and racism when

taken into the public domain are singularly difficult to justify which is why Europeans and Americans have always sought vindication from the highest sources of authority in their cultures In the Middle Ages it was religion supplemented later by the philosophy of the Enlightenment In nineteenth century Europe and America religion and philosophy were joined by science and medicine to support Manifest Destiny scientific racism and social Darwinism all of which had profound consequences on Native Americans and the Spirit of the West Presenting research in anthropology archaeology biology history law medicine religion philosophy and psychology Dr Peterson provides the latest observations that delineate why the Native American s life was destroyed American Trinity is a stunning portrait a view at once unique panoramic and intimate It is a fascinating book that will make you think about the differences between belief and knowledge about the self skepticism of science and medicine and about what aspects of the world we take on faith Opening Science Sönke Bartling,Sascha Friesike,2013-12-16 Modern information and communication technologies together with a cultural upheaval within the research community have profoundly changed research in nearly every aspect Ranging from sharing and discussing ideas in social networks for scientists to new collaborative environments and novel publication formats knowledge creation and dissemination as we know it is experiencing a vigorous shift towards increased transparency collaboration and accessibility Many assume that research workflows will change more in the next 20 years than they have in the last 200 This book provides researchers decision makers and other scientific stakeholders with a snapshot of the basics the tools and the underlying visions that drive the current scientific r evolution often called Open Science New Network Architectures Tania Tronco,2010-07-05 Future Internet is a worldwide hot topic The Internet has become a critical infrastructure for business development and social interactions However the immense growth of the Internet has resulted in additional stresses on its architecture resulting in a network difficult to monitor understand and manage due to its huge scale in terms of connected devices and actors end users content providers equipment vendors etc This book presents and discusses the ongoing initiatives and experimental facilities for the creation of new Future Internet Architectures using alternative approaches like Clean Slate and Incremental improvements It considers several possible internet network use scenarios that include seamless mobility ad hoc networks sensor networks internet of things and new paradigms like content and user centric networks **Origins** Tom Yulsman,2002-12-06 With stunning regularity the search for our cosmic roots has been yielding remarkable new discoveries about the universe and our place in it In his compelling book Origins The Quest for Our Cosmic Roots veteran science journalist Tom Yulsman chronicles the latest discoveries and describes in clear and engaging terms what they mean From **Encyclopedia of Library and Information Sciences** John D. McDonald,Michael Levine-Clark,2017-03-15 The Encyclopedia of Library and Information Sciences comprising of seven volumes now in its fourth edition compiles the contributions of major researchers and practitioners and explores the cultural institutions of more than 30 countries This major reference presents over 550 entries extensively reviewed for accuracy in seven print volumes or

Trial and Error Edward John Larson, 1989 Ranging from before the 1925 Scopes trial to the creationism disputes of the 1980s this book offers a comprehensive account of the American controversy over creation and evolution

Evolution, Creationism, and Intelligent Design Allene S. Phy-Olsen, 2010-07-01 This work of historical exploration examines America's conflicts as it has attempted to maintain its founding principles of freedom of thought and separation of church and state while nevertheless remaining the most traditionally religious of modern nations Evolution Creationism and Intelligent Design offers a comprehensive unbiased history of this controversial issue as well as a balanced presentation of the arguments central to a debate that remains one of the most divisive in American society Centered around the importance of the issue to education in both the sciences and humanities the book's chief concern is the relevance of the debate to America's public schools Beginning with an overview of the topic and its history the book goes on to investigate Darwinism and the neo Darwinian revolution as well as the applications of Darwinian theories in the social Darwinism and eugenics movements It looks at theistic approaches to evolution at arguments for and critiques of intelligent design at religion science and the American courts and at religion and science in the postmodern world The two concluding sections of special relevance to students are annotated listings of important personalities in the science religion debate and an annotated bibliography

The Creationists Ronald L. Numbers, 2006 In light of the embattled status of evolutionary theory particularly as intelligent design makes headway against Darwinism in the schools and in the courts this account of the roots of creationism assumes new relevance This edition offers an overview of the arguments and figures at the heart of the debate

Hard Bargains Linda R. Hirshman, Jane E. Larson, 1998 Men and women have always bargained for sex In this controversial new book philosopher lawyer Linda Hirshman and legal historian Jane Larson provide the first comprehensive look at the politics of heterosexual sex in the West from Hammurabi's Code to Monica Lewinsky Starting with an essential summary of the roots of Western sex in the ancient near East and early modern Europe the book quickly focuses on the history of the sexual regulation in America which it describes in unprecedented detail Hard Bargains also offers surprisingly workable proposals for a new sexual order rape laws replaced by laws of sexual autonomy adultery subjected to breach of contract action prostitution considered an unfair labor practice Hard Bargains takes a forthright and level headed look at all aspects of one of the biggest controversies in contemporary American society heterosexual sex and delivers a radically new perspective on the sexual lives of women and men

, Creationism and the Conflict over Evolution Tatha Wiley, 2009-01-01 How do our current notions of the workings of the universe fit with our deepest convictions about its meaning and value From religion we grasp the world as created given gift From science we apprehend it as evolving in process changing How do we bring these apprehensions

together Or can we Is our impulse to find the two complementary creation and evolution Or is it to find them contradictory creation or evolution The way in which we answer these questions carries personal and intellectual consequences It will constitute the first piece in a worldview within which we order our religious beliefs and scientific judgments from the Preface
