The Three Axial Ages John Torpey, 2017-03-01 How should we think about the shape of human history since the birth of cities and where are we headed Sociologist and historian John Torpey proposes that the Axial Age of the first millennium BCE when some of the world's major religious and intellectual developments first emerged was only one of three such decisive periods that can be used to directly affect present social problems from economic inequality to ecological destruction Torpey's argument advances the idea that there are in fact three Axial Ages instead of one original Axial Age and several subsequent smaller developments Each of the three ages contributed

decisively to how humanity lives and the difficulties it faces The earliest or original Axial Age was a moral one the second was material and revolved around the creation and use of physical objects and the third is chiefly mental and focused on the technological While there are profound risks and challenges Torpey shows how a worldview that combines the strengths of all three ages has the potential to usher in a period of exceptional human freedom and possibility Shaping the Developing World Andy Baker, 2021-01-07 Why are some countries rich and others poor Colonialism globalization bad government gender inequality geography and environmental degradation are just some of the potential answers to this complex question Using a threefold framework of the West the South and the natural world Shaping the Developing World provides a logical and intuitive structure for categorizing and evaluating the causes of underdevelopment This interdisciplinary book also describes the social political and economic aspects of development and is relevant to students in political science international studies geography sociology economics gender studies and anthropology The Second Edition has been updated to include the most recent development statistics and to incorporate new research on topics like climate change democratization religion and prosperity the resource curse and more This second edition also contains expanded discussions of gender financial inclusion crime and police killings and the Middle East including the Syrian Civil War Discourses of Globalisation, Ideology, and Human Rights Joseph Zajda, Yvonne Vissing, 2022-03-11 This book examines dominant discourses in human rights education globally Using diverse paradigms ranging from critical theory to discourse analysis the book examines major human rights education reforms and policy issues in a global culture with a focus on the ambivalent and problematic relationship between human rights education discourses ideology and the state The book discusses democracy ideology and human rights which are among the most critical and significant factors defining and contextualising the processes surrounding human rights education globally The book critiques current human rights education practices and policy reforms illustrating the shifts in the relationship between the state ideology and human rights education policy Written by authors from diverse backgrounds and regions the book examines current developments in research concerning human rights education The book enables readers to gain a more holistic understanding of the nexus between human rights education and dominant ideologies both locally and globally It also provides an easily accessible practical yet scholarly insights into international concerns in the field of human rights education in the context of global culture **Industrial Development in Africa** Berhanu Abegaz, 2018-02-21 Industrial Development in Africa critically synthesizes and reframes the debates on African industrial development in a capability opportunity framework It recasts the challenge in a broader comparative context of successive waves of catchup industrialization experiences in the European periphery Latin America and East Asia Berhanu Abegaz explores the case for resource based and factor based industrialization in North Africa and Sub Saharan Africa by drawing on insights from the history of industrialization development economics political economy and institutional economics Unpacking complex and diverse experiences the chapters look at Africa at several levels continent

Making Russia and Turkey Great Again? Norman A. Graham, Folke Lindahl, Timur Kocaoglu, 2021-03-19 This study analyzes theoretically and empirically the background of the rise to power of Vladimir Putin in Russia and Recep Tayyip Erdogan in Turkey It situates this analysis in the contexts of the historical assessment of the fragility of liberal democracy and the persistence and growth of authoritarianism populism and dictatorship in many parts of the world The authors argue that the question whether Putin and Erdogan can make Russia and

Turkey great again is hard to confirm personal ambition for power and wealth is certainly key to an understanding of both rulers They each squandered opportunities to build from free and fair democratic electoral legitimacy and economic progress The prospect for restored national greatness depends on how they can handle the economic and political challenges they now face and will continue to face in the near future in a climate of global pandemic and economic recession Both rulers so far have succeeded in maintaining and increasing their powers and influence in their respective regions but neither has made real contributions to regional stability and order Chaos seems to be growing and the EU and the U S thus far seem unable to provide coherent responses to mitigate the impact of their adventurism and disruption *Handbook of Aid and Development*

Raj M. Desai,Shantayanan Devarajan,Jennifer L. Tobin,2024-06-05 With intellectual rigour the Handbook of Aid and Development not only critically examines the relationship between aid and development but also discusses recent trends within the field and judiciously considers its future prospects **Populist Nationalism in Europe and the Americas**

Fernando López-Alves,Diane E. Johnson,2018-10-10 Populist nationalism fuses beliefs that citizens are being exploited by a privileged elite with claims that the national culture and interests are under threat from enemies within or without Ideologically fluid populist nationalists decry out of touch institutions such as political parties and the mainstream press while extolling the virtues of the people They claim that only populists can truly represent the nation and solve its problems and often call for unorthodox solutions that appeal to the common people The recent spread of populist nationalism throughout the world has triggered a growing interest in the subject led mainly by journalists The Brexit vote and the election of Donald Trump in the US have provoked a flurry of media coverage in Europe and the Americas along with parliamentary debates Some social scientists have sought to explain the resurgence of nationalism and the spread of populism in recent decades but important questions remain and most of the scholarship has not adequately addressed the fusion of nationalism and populism It fails to examine the combination of populism and nationalism comparatively especially the contrast between the more progressive and leftist versions such as those in Latin America and the more traditional conservative varieties that are gaining strength in Germany the United Kingdom and the United States This interdisciplinary collection by experts on Europe and the Americas fills this void The volume examines various experiences with populist nationalism and offers theoretical tools to assess its future Some chapters are in depth country case studies and others take a broader perspective but all open the door for meaningful comparison *The Evolution of Liberal Arts in the Global Age*

Peter Marber,Daniel Araya,2017-03-16 Advanced and developing countries across the globe are embracing the liberal arts approach in higher education to foster more innovative human capital to compete in the global economy Even as interest in the tradition expands outside the United States can the democratic philosophy underlying the liberal arts tradition be sustained Can developing countries operating under heavy authoritarian systems cultivate schools predicated on open discussion and debate Can entrenched specialist systems in Europe and Asia successfully adopt the multidisciplinary liberal

arts model These are some of the questions put to leading scholars and senior higher education practitioners within this edited collection Beginning with historical context international contributors explore the contours of liberal arts education amid public calls for change in the United States the growing global interest in the approach outside the United States as well as the potential of liberal arts philosophy in a global knowledge economy The Planetary Emergency Kent D. Shifferd,2021-01-13 Earth and its inhabitants face an unprecedented crisis the human caused destruction of the planet s life support systems Deteriorating climate bringing super storms mass forest fires melting glaciers droughts extreme heat and rising seas a decline in food production soil loss water pollution and declining fisheries all threaten the future of life on earth with a looming extinction event not seen for 60 million years Beginning in the 17th century we developed a civilization based on radical materialism exploitation of natural resources and the myth of endless economic growth For all its technological wonders this hypercivilization has proven unsustainable This book explores ways we can create an ecocivilization compatible with the laws and limits of nature a new way of living already developing with new technologies new forms of social organization and a new story about ourselves and the Earth **Archaeology Outside the Box** Hans Barnard,2023-05-15 Archaeology Outside the Box makes contemporary archaeology germane to the general public as well as to researchers in other disciplines In thirty one richly illustrated chapters a wide variety of projects is presented by an international group of anthropologists archaeologists architects and artists These aim to broaden the applicability of archaeology by reflecting on archaeological remains in novel ways or by addressing contemporary concerns with archaeological theory and research methods Demonstrating the fascinating and pertinent nature of archaeology the authors go far beyond its definition as a discipline that unearths objects of ancient material culture Many chapters also provide arguments relevant to the soul searching discussions currently taking place within archaeology worldwide and accelerated by the Black Lives Matter movement and the recent Covid 19 pandemic *The Great Surge* Steven C. Radelet,2015 The Great Surge tells the remarkable story of this unprecedented economic social and political transformation It shows how the end of the Cold War the development of new technologies globalization courageous local leadership and in some cases good fortune have combined to dramatically improve the fate of hundreds of millions of people in poor countries around the world Most importantly The Great Surge reveals how we can fight the changing tides of climate change resource demand economic and political mismanagement and demographic pressures to accelerate the political economic and social development that has been helping the poorest of the poor around the world Amazon com
