Transfiguring Transcendence in Harry Potter, His Dark Materials and Left Behind Mike Gray,2013-10-23 Three recent and commercially successful series of novels employ and adapt the resources of popular fantasy fiction to create visions of religious identity J K Rowling s Harry Potter books Phillip Pullman s

Dark Materials and Tim LaHaye and Jerry Jenkins Left Behind series The act of creating fantasy counter worlds naturally involves all three stories in the creation of what Mike Gray terms transfigurations of transcendence hopeful albeit paradoxical encodings of the ambiguous non observable reality whose primary locus in modern society is the societally extra systemic human individual Popular fantasy fiction turns out to involve acts of world creation that are inherently religious and inherently paradoxical A substantive examination shows that all three are involved in more or less intentional re narrations of traditional Christian beliefs and narratives The atheist His Dark Materials series does not deny but re imagines the Christian visions of selfhood the traditionalist Left Behind series does not simply replicate but modifies its own declared values the apparent secularity of the Harry Potter series is shaped by its creative reception of Christian patterns and narratives While the stories visions of selfhood clearly clash the basic paradoxes involved in their struggle to articulate transcendence expose significant parallels and a productive conversation with the Christian tradition It is not simply that popular fantasy fiction is theologically relevant the Christian Heilsgeschichte too proves to be highly relevant in popular culture However while far from obsolescent models of religious identity in contemporary society require criticism and creativity and as evinced most powerfully in the Harry Potter stories a flair for constructive engagement with paradox

Writing at the Limit Daniel Punday, 2012-05-01 While some cultural critics are pronouncing the death of the novel a whole generation of novelists have turned to other media with curiosity rather than fear These novelists are not simply incorporating references to other media into their work for the sake of verisimilitude they are also engaging precisely such media as a way of talking about what it means to write and read narrative in a society filled with stories told outside the print medium By examining how some of our best fiction writers have taken up the challenge of film television video games and hypertext Daniel Punday offers an enlightening look into the current status of such fundamental narrative concepts as character plot and setting He considers well known postmodernists like Thomas Pynchon and Robert Coover more accessible authors like Maxine Hong Kingston and Oscar Hijuelos and unjustly overlooked writers like Susan Daitch and Kenneth Gangemi and asks how their works investigate the nature and limits of print as a medium for storytelling Writing at the Limit explores how novelists locate print writing within the contemporary media ecology and what it really means to be writing at print's media limit

IRL Chris Stedman, 2020-10-20 What Does IRL In Real Life Really Mean in Today's Digital Age It's easy and reflexive to view our online presence as fake to see the internet as a space we enter when we aren't living our real offline lives Yet so much of who we are and what we do now happens online making it hard to know which parts of our lives are real IRL Chris Stedman's personal and searing exploration of authenticity in the digital age shines a light on how age old notions of realness who we are and where we fit in the world can be freshly understood in our increasingly online lives Stedman offers a different way of

seeing the supposed split between our online and offline selves the internet and social media are new tools for understanding and expressing ourselves and the not always graceful ways we use these tools can reveal new insights into far older human behaviors and desires IRL invites readers to consider how we use the internet to fulfill the essential human need to feel real a need many of us once met in institutions but now seek to do on our own online as well as the ways we edit or curate ourselves for digital audiences The digital search for meaning and belonging presents challenges Stedman suggests but also myriad opportunities to become more fully human In the end he makes a bold case for embracing realness in all of its uncertainty online and off even when it feels risky
