Anthropological Perspectives on Global Challenges Emma Gilberthorpe, 2024-03-28 This volume offers a snapshot of anthropological perspectives on global challenges Whilst it could not hope to represent the full scope of anthropological perspectives those that are presented highlight some of the critical flaws embedded in such an all encompassing notion The contributors reveal the possibilities of reimagining the ways in which challenges are understood and addressed and demonstrate how a combination of deep understanding of the past and collaboration cooperation and inclusive dialogue about the future can improve the chances of positive action The collection thus not only shows us that perspectives must change but also how that change might be realised Whilst the chapters are

authored solely by anthropologists this book is not solely for anthropologists The book is illustrative of the practical and theoretical insights that anthropology can offer those individuals teams and policy and decision makers engaged in research mitigation and or intervention practices in relation to the global challenges Beyond academia it contributes to broader understandings of the challenges we collectively face at this point in time and how we might collectively and effectively address them

Spacious Minds Sara E. Lewis, 2020-02-15 Spacious Minds argues that resilience is not a mere absence of suffering Sara E Lewis s research reveals how those who cope most gracefully may indeed experience deep pain and loss Looking at the Tibetan diaspora she challenges perspectives that liken resilience to the hardness of physical materials suggesting people should bounce back from adversity More broadly this ethnography calls into question the tendency to use trauma as an organizing principle for all studies of conflict where suffering is understood as an individual problem rooted in psychiatric illness Beyond simply articulating the ways that Tibetan categories of distress are different from biomedical ones Spacious Minds shows how Tibetan Buddhism frames new possibilities for understanding resilience Here the social and religious landscape encourages those exposed to violence to see past events as impermanent and illusory where debriefing working through or processing past events only solidifies suffering and may even cause illness Resilience in Dharamsala is understood as *sams pa chen po* a vast and spacious mind that does not fixate on individual problems but rather uses suffering as an opportunity to generate compassion for others in the endless cycle of *samsara* A big mind view helps to see suffering in life as ordinary And yet an intriguing paradox occurs As Lewis deftly demonstrates Tibetans in exile have learned that human rights campaigns are predicated on the creation and circulation of the trauma narrative in this way Tibetan activists utilize foreign trauma discourse not for psychological healing but as a political device and act of agency

Introducing Health Anthropology Merrill Singer, Hans A. Baer, Debbi Long, Alex Pavlotski, 2025-04-01 With a new title that reflects the broad scope and primary concerns of the field Introducing Health Anthropology A Discipline in Action Fourth Edition provides students with a first look at the dynamic discipline of medical and health anthropology The narrative is guided by four unifying themes First health anthropologists are heavily involved in the process of helping to better understand and change the world through their work in applied projects policy initiatives and advocacy Second the book presents the fundamental importance of culture and social relationships in health and sickness by demonstrating that experienced illness and diagnosed disease involve complex biosocial processes and that resolving them requires attention to a range of factors beyond biology Third through an examination of health inequality the book highlights the need for research and analyses that move beyond cultural or even ecological models of health toward comprehensive and holistic biosocial frameworks Finally the authors emphasize that physical and mental health are intimately related to the health of the environment on which humans depend for air food and the other resources that make life possible Introducing Health Anthropology gives students the tools to rethink how to achieve healthier populations effective and fully accessible healthcare systems and a sustainable

The Recovery Revolution Claire D. Clark, 2017-05-02 In the 1960s as illegal drug use grew from a fringe issue to a pervasive public concern a new industry arose to treat the addiction epidemic Over the next five decades the industry s leaders promised to rehabilitate the casualties of the drug culture even as incarceration rates for drug related offenses climbed In this history of addiction treatment Claire D Clark traces the political shift from the radical communitarianism of the 1960s to the conservatism of the Reagan era uncovering the forgotten origins of today s recovery movement Based on extensive interviews with drug rehabilitation professionals and archival research The Recovery Revolution locates the history of treatment activists influence on the development of American drug policy Synanon a controversial drug treatment program launched in California in 1958 emphasized a community based approach to rehabilitation Its associates helped develop the therapeutic community TC model which encouraged peer confrontation as a path to recovery As TC treatment pioneers made mutual aid profitable the model attracted powerful supporters and spread rapidly throughout the country The TC approach was supported as part of the Nixon administration s law and order policies favored in the Reagan administration s antidrug campaigns and remained relevant amid the turbulent drug policies of the late twentieth and early twenty first centuries While many contemporary critics characterize American drug policy as simply the expression of moralizing conservatism or a mask for racial oppression Clark recounts the complicated legacy of the ex addict activists who turned drug treatment into both a product and a political symbol that promoted the impossible dream of a drug free America

Fragile Resonance Jason Danely, 2022-10-15 Fragile Resonance describes the paths carers take as they make meaning of their experiences and find a sense of moral purpose to sustain them and guide their decisions When a parent or partner becomes frail or disabled often a family member assumes responsibility for their care But family care is a physically and emotionally exhausting undertaking Carers experience moments of profound connection as well as pain and grief Carers ask themselves questions about the meaning of family their entitlement to support and their capacity to understand and sympathize with another person s pain Based on his research gathering stories of family carers in Japan and England Jason Danely traces how care transforms individual sensibilities and the roles of cultural narratives and imagination in shaping these transformations which persist even after the care recipient has died Throughout Fragile Resonance Danely examines the implications of unpaid carer s experiences for challenging and enhancing social policies and institutions
