**Interdisciplinary Conference on Image and Imagination** Enrico Cicalò,2020-03-17 This book gathers peer reviewed papers presented at the 1st International and Interdisciplinary Conference on Image and Imagination IMG 2019 held in Alghero Italy in July 2019 Highlighting interdisciplinary and multi disciplinary research concerning graphics science and education the papers address theoretical research as well as applications including education in several fields of science technology and art Mainly focusing on graphics for communication visualization description and storytelling and for learning and thought construction the book provides architects engineers computer scientists and designers with the latest advances in the field particularly in the context of science arts and education      Close-Range Photogrammetry and 3D Imaging  
Thomas Luhmann,Stuart Robson,Stephen Kyle,Jan Boehm,2013-11-27 This is the second edition of the established guide to close range photogrammetry which uses accurate imaging techniques to analyse the three dimensional shape of a wide range

of manufactured and natural objects After more than 20 years of use close range photogrammetry now for the most part entirely digital has become an accepted powerful and readily available technique for engineers scientists and others who wish to utilise images to make accurate 3D measurements of complex objects Here they will find the photogrammetric fundamentals details of system hardware and software and broad range of real world applications in order to achieve this Following the introduction the book provides fundamental mathematics covering subjects such as image orientation digital imaging processing and 3D reconstruction methods as well as a discussion of imaging technology including targeting and illumination and its implementation in hardware and software It concludes with an overview of photogrammetric solutions for typical applications in engineering manufacturing medical science architecture archaeology and other fields Advances in Intelligent Systems and Interactive Applications Fatos Xhafa, Srikanta Patnaik, Albert Y. Zomaya, 2017-10-30 This book presents research papers from diverse areas on novel Intelligent Systems and Interactive Systems and Applications It gathers selected research papers presented at the 2nd International Conference on Intelligent and Interactive Systems and Applications IISA2017 which was held on June 17 18 2017 in Beijing China Interactive Intelligent Systems IIS are systems that interact with human beings media or virtual agents in intelligent computing environments The emergence of Big Data and the Internet of Things have now opened new opportunities in both academic and industrial research for the successful design and development of intelligent interactive systems This book explores how novel interactive systems can be used to overcome various challenges and limitations previously encountered by human beings by combining machine learning algorithms and the analysis of recent trends The book presents 125 contributions which have been categorized into seven sections namely i Autonomous Systems ii Pattern Recognition and Vision Systems iii E Enabled Systems iv Mobile Computing and Intelligent Networking v Internet and Cloud Computing vi Intelligent Systems and vii Various Applications It not only offers readers extensive theoretical information on Intelligent and Interactive Systems but also introduces them to various applications in different domains **Elements of Cartography** Arthur H. Robinson, 1995-03-03 This revised and updated edition integrates the latest in modern technology with traditional cartographic principles While providing a solid conceptual foundation in cartographic methodology the text also introduces advances that have greatly altered cartographic techniques

*Stone Age without Stones* Raiko Krauß, Dan Ciobotaru, 2024-10-21 This volume deals with the results of the excavations from 2010 to 2015 at the Early Neolithic settlement of Bucova Pusta IV near S nnicolau Mare in northern Banat After the end of the Early Neolithic settlement a large burial mound was erected at this site in the early 3rd millennium BC the main burial of which was also documented during the excavations The site was subsequently inhabited once again during the transition from the Late Bronze Age to the Early Iron Age In medieval times the site served as a burial ground for a nomadic equestrian population The flat landscape of northern Banat is characterised by numerous watercourses This is why the utilisation of aquatic resources played an important role in the Neolithic period Another special feature is the lack of natural stones which

is reflected in the special character of the Early Neolithic finds
