Historical Geography Dietrich Denecke, Gareth Shaw, 1988-06-30 Originally published in 1988 this book provides a fascinating comparative review of research in urban historical geography in Britain and West Germany It draws together a wide range of material on the history of urban development to explore the theoretical and methodological possibilities offered by comparative surveys of contrasting national and regional urban expenses The chronological focus of the essays ranges in time from the medieval period onwards and the contributors explore not only the specifically intellectual consequences of their empirical research but also its policy implications for urban planners and conservationists Serious extended comparative debate has hitherto been absent from the field of urban historical geography as a whole this volume sought to reverse that trend and in so doing to establish a fresh research agenda for an important and expanding discipline

Gutenberg in Shanghai Christopher A. Reed, 2011-11-01 In the mid 1910s what historians call the Golden Age of Chinese Capitalism began accompanied by a technological transformation that included the drastic expansion of China's Gutenberg revolution *Gutenberg in Shanghai* examines this process It finds the origins of that revolution in the country's printing industries of the late imperial period and analyzes their subsequent development in the Republican era This book which relies on documents previously unavailable to both Western and Chinese researchers demonstrates how Western technology and evolving traditional values resulted in the birth of a unique form of print capitalism whose influence on Chinese culture was far reaching and irreversible Its conclusion contests scholarly arguments that view China's technological development as slowed by culture or that interpret Chinese modernity as mere cultural continuity A vital reevaluation of Chinese modernity *Gutenberg in Shanghai* will be enthusiastically received by scholars of Chinese history and by specialists in cultural studies political science sociology the history of the book and the anthropology of science and technology Looking Backward and Looking Forward Harvey J. Graff, 2005 Asserting the need for social science historians to examine their own field this wide ranging volume offers an intellectual history and critical evaluation of interdisciplinary social science and social science historiography The editors present a creative experimental mix of topics and genres spanning a range of contemporary thought in the field exploring the past present and future of social science history This book comes at a time when there is great academic interest in the future of the disciplines and in their place within the organization of university education Based on the 25th anniversary conference of the Social Science History Association 2000 **Riches, Class, and Power** Edward Pessen, 2017-07-12 Until publication of *Riches, Classes and Power* Alexis de Tocqueville's vision of the United States as a generally egalitarian nation predominated While historians might quarrel about the social sources of egalitarianism they did not dispute the soundness of the basic model and Tocqueville's vision clearly dominated American's sense of itself as well

A self acknowledged congenital skeptic Pessen decided to find out whether the facts of American life sustained Tocqueville's conclusions. *Riches, Class and Power* represents more than five years intensive research on the wealth, family backgrounds, careers, marriages, residential patterns, uses of leisure, life styles, social standing and influence and power of the wealthy in four of the five largest cities in the United States before the Civil War. Pessen examines New York City, Philadelphia, Boston and the then separate city of Brooklyn in the 1820s and 1840s. His claim is that the massive evidence on urban life of the time sharply refutes Tocqueville's thesis. A National Book Award finalist for history, *Riches, Class and Power* undoubtedly helped reshape America before the Civil War. In his reintroduction to this paperback edition, Pessen reviews the critical reaction and reconsiders the extent to which its findings are applicable to the social structure of small or frontier towns of the period. He discusses whether unequal distribution of wealth in America results more from changes in historical circumstance or to shifts in demographic or age structure.

Period and Place Alan R. H. Baker, Mark Billinge, 1982-05-06 This 1982 volume of essays attempts to promote discussion about the purpose and practice of historical geography.

Fantasy City John Hannigan, 2005-07-20 *Fantasy City* analyses the post industrialist city as a site of entertainment. By discussing examples from a wide variety of venues including casinos, malls, heritage developments and theme parks, Hannigan questions urban entertainments, economic foundations and historical background. He asks whether such areas of fantasy destroy communities or instead create new groupings of shared identities and experiences. The book is written in a student friendly way with boxed case studies for class discussion.

A Companion to American Immigration Reed Ueda, 2011-03-21 *A Companion to American Immigration* is an authoritative collection of original essays by leading scholars on the major topics and themes underlying American immigration history. Focuses on the two most important periods in American Immigration history: the Industrial Revolution, 1820-1930 and the Globalizing Era, Cold War to the present. Provides an in depth treatment of central themes including economic circumstances, acculturation, social mobility and assimilation. Includes an introductory essay by the volume editor.
