Herman,1994-01-01 This reader shows the rich history and wide contemporary application of symbolic interaction theory **Printout of Literature Search on Rape** National Clearinghouse for Mental Health Information (U.S.),1979 Inside Greek U. Alan D. DeSantis,2007-10-12 This study examines the potentially damaging influence of fraternities and sororities and how a new approach could transform Greek life Popular films such as *Revenge of the Nerds* and *Old School* portray college Greek organizations as a training ground for malevolent young aristocrats yet they fail to depict the enduring influence of these organizations *Inside Greek U* provides an in depth analysis of how fraternities and sororities bolster damaging definitions of gender and sexuality negatively impacting the lives of their members Using evidence gathered in hundreds of focus groups and personal interviews as well as his years of experience as a faculty advisor to Greek organizations Alan D DeSantis examines the limited gender roles available to Greeks real men are unemotional sexually promiscuous and violent nice girls are nurturing domestic and pure These rigid formulations often lead to destructive attitudes and behaviors such as eating disorders date rape sexual misconduct and homophobia They also impede students intellectual and emotional development long after graduation While many students choose Greek life in search of positive social engagement the current culture can be profoundly damaging *Inside Greek U* demonstrates how with a new approach fraternities and sororities could serve as an enriching influence on individuals and campus life Ending Violence Against Women Francine Pickup,Suzanne Williams,Caroline Sweetman,2001 8 Challenging the state **Male Violence** John Archer,2022-11-30 First published in 1994 *Male Violence* examines male violence as the

major source of human suffering from a wide range of perspectives This book contains accessible contributions from a wide range of psychologists who have studied the many faces of male violence in childhood and adulthood on the street and in the home towards men women and children and in its sexual and non sexual forms These varied topics together with an emphasis on naturalistic rather than laboratory based investigations distinguish these researchers from those aiming to make generalizations about human aggression without considering the issues of sex and gender In doing so Male Violence raises fundamental questions about values which are accepted and unchallenged by the majority of people living in the modern world This book will be of interest to students of psychology sociology and gender studies *Investigating Rape* Ian Blair,2024-03-01 First published in 1985 Investigating Rape examines practices related with rape in four United States police departments and suggests what lessons the British police service might draw from them The author urges greater recognition of the emotional trauma suffered by rape victims and the effects of that trauma on the relationship between victims and investigators He recommends changes in police procedure including new approaches in interviewing style and changes in training and in liaison with agencies who provide help to victims This book will be of interest to any police official as well as to students of law and criminology **Emergency Psychiatry** Ellen L. Bassuk,2012-12-06 This eagerly awaited volume occupies an important place in the series Critical Issues in Psychiatry Most mental health professionals are quite at home with ordinary day to day crises of clinical practice but relatively unprepared for the true psychiatric emergency Such emergencies are too infrequent for most of us to experience a real sense of competence On the other hand emergency room psychiatrists as well as residents and other trainees have long wished for a truly comprehensive textbook that would cover the spectrum of emergency psychiatry This book is just such a definitive and comprehensive volume for the specialist while at the same time a clear succinct and comprehensive reference for the clinician of emergency care The authors consistently present a systematic model emphasizing the interconnection between the process of emergency intervention and the specific features of clinical crisis They are true to the principle that one s system of care should be built on priorities It is immediately apparent that these are highly experienced clinicians as well as teachers It is difficult to imagine a clinical situation that is not addressed by this book It includes chapters on triage assessment and treatment planning emergencies associated with all the various psychopathologies age groups from childhood to old age the emergency management of violent and suicidal patients as well as rape and disaster victims emergencies secondary to substance abuse and prescribed medications psychotherapeutic and psychopharmacologic intervention as well as the relevant legal social and community issues in emergency care Criminology John Muncie,2006 Phenomenology and Treatment of Psychiatric Emergencies B.S. Comstock,W.E. Fann,A.D. Pokorny,Robert L. Williams,2012-12-06 psychiatric treatment approaches there are opportunities for trial and error exploration and reconsideration revision of treatment approach and correction of errors Revisions and corrections are based on observations of progress and on response from patients about the impact of treatment efforts But

emergency interventions usually are one time efforts involving a sequence of evaluation therapeutic intervention and referral out Response is limited or absent and there are no opportunities for corrections over time Therefore interventions and referrals must be made on the basis of first evaluations with positive conviction related to current best effort and despite the lack of guidance derived from tracking the patient s progress over time The staff must tolerate the risk taking required and must also be prepared to forego the gratification of seeing the beneficial results of the work done Even in pro grams structured to allow return visits and despite the occasional information provided by other agencies after referrals the majority of patients are lost to follow up The usefulness of specific interventions is hard to evaluate and the satisfaction of seeing a task completed is rarely available The emergency program staff must tolerate a considerable amount of stress in the environment Emergency care centers are collection points for an extraordinary volume of human suffering The anxieties and strains asso ciated with persistent urgency of need alarm related to unexpected difficul ties fearfulness about outcome closeness of death and presence of pain pervade the atmosphere

Masculinities, Sexualities and Child Sexual

Abuse Anne Cossins, 2021-08-04 Why is child sexual abuse committed primarily by men and male adolescents unlike other forms of child abuse Is child sex offending rather than being a deviant masculine sexual practice related to normative masculine practices that is practices structured on dynamic and changing relations of power Using a practice based sociological approach the relationship between masculinities sexualities and child sexual abuse is analysed and the power powerlessness theory is developed to explain the predominantly male problem of child sex offending The theory postulates that because the social construction of masculinities involves the construction of dynamic and changing relations of power between men men's lives are characterised by a combination of power and powerlessness The book argues that an offender's experiences of powerlessness as a result of his relationships with other men is the key to understanding child sex offending since sexuality is a key social practice for the alleviation of experiences of powerlessness and for establishing relations of power with other men In particular the theory argues that a man's particular attachment to the link between sexuality and experiences of masculinity and power will be a key factor for determining how he does sex and whom he chooses as a sexual partner In the final chapter the theory is tested through a re analysis of offender interviews
