Nietzsche Emmanuel Salanskis:

Nietzsche Emmanuel Salanskis, 2015 Friedrich Wilhelm Nietzsche 1844 1900 philosophe allemand est connu pour avoir proclamé la mort de Dieu thésorisé la volonté de puissance et enseigné le ternel retour de l'identique Ces formules célèbres ont souvent masqué la nature de l'entreprise que Nietzsche s'est assignée Revisitant toute vérité définitive sa philosophie est une constante expérimentation qui multiplie les perspectives Elle s'organise pourtant à partir d'une unique problématique culturelle qui remet en question le partage entre théorie et pratique il s'agit en mettant profit la connaissance de l'histoire et des sciences de la nature d'élever l'homme tant au sens d'un levage zoologique que d'une élévation de valeur pour en faire un être plus panou et plus puissant qu'il ne l'a été jusqu'présent sous l'emprise des valeurs judéo-chrétiennes Nietzsche propose ainsi une véritable transvaluation de toutes les valeurs qui se veut tout autre chose qu'un retour à la barbarie des origines Après l'analyse des tensions et des ruptures la faveur desquelles Nietzsche devient Nietzsche cet essai présente les concepts qui structurent son projet biológico-culturel L'étude de quelques post-réalistes peut alors montrer pour finir le caractère la fois fécond et dangereux de la réflexion nietzschéenne Celle-ci reste présente dans la pensée philosophique contemporaine en particulier chez les auteurs qui revendiquent une démarche génalogique Page 4 de la couverture **Nietzsche's**

Philosophy of Life Affirmation Michael J. McNeal, 2024-12-23 This anthology broadly examines the interrelated roles of art, science, and experimentation in Nietzsche's philosophical project. It is divided into two parts: the first organized around the theme of experimentally reconceiving our world; the second investigating the aforementioned subjects in Nietzsche's free spirit or middle period works. Together, the essays comprising the book underscore Nietzsche's concern that experimentation with values ultimately provides humankind with a new wherefore or purpose. Wide-ranging in its scope, this volume brings together a diverse group of scholars working in both the analytic and continental traditions to provide original insights into Nietzsche's thought. A unique contribution to the scholarship, it deepens understanding of the relationship between Nietzsche's critiques of art and science, the role this relationship plays in his futuristic thought, and the experimental life-affirming practices that his free spirit project may enable toward the transfiguration of humankind **Knowledge of Life Today** Jean

Gayon, Victor Petit, 2019-04-09 Knowledge of Life Today presents the thoughts of Jean Gayon, a major philosopher of science in France who is recognized across the Atlantic especially for his work in philosophy and the history of life sciences. The book is structured around Gayon's personal answers to questions put forward by Victor Petit. This approach combines scientific rigor and risk-taking in answers that go back to the fundamentals of the subject. As well as the relationship between philosophy and the history of science, Gayon discusses the main questions of the history and philosophy of biology that marked his intellectual journey: Darwin, evolutionary biology, genetics, and molecular biology, human evolution, and various aspects of the relationship between biology and society in contemporary times: racism, eugenics, biotechnology, biomedicine, etc. *Nietzsche on Memory and History* Anthony K. Solidarity Between Species Frederic Keck, 2025-05-06 This book examines how the Covid 19 pandemic can be described as a biopolitical crisis taking into account a fact often overlooked by commentators Covid 19 is a zoonosis a disease transmissible between animal species The Sars Cov2 virus causing this respiratory disease circulated in bats before passing to humans under as yet mysterious conditions and it was transmitted from humans to other species notably mink and deer Building on Michel Foucault s revival of the term biopolitics and related notions disciplinary power pastoral power cynegetic power this book traces a set of public health measures taken over the last two centuries to control epidemics It underlines how the need to conserve virus strains in order to identify and anticipate their mutations has given rise to cryopolitics a set of techniques aimed at suspending the living in order to defer death The book then questions the emancipatory scope of this cryopolitics by examining interspecies solidarity built by the warning signals sent by animals to humans about coming threats be they pandemics natural disasters or climate change By blurring the boundaries between the wild and the domestic resulting from the process of domestication the politics of zoonoses relies on sentinels who preserve the memory of signs from the past to prepare living beings for future threats by involving them in a common ideal
