Chasing the Red Queen

Andrew Dyer,2014 In the race to feed the worlds seven billion

people we are at a standstill Over the past century we have developed increasingly potent and sophisticated pesticides yet in

2014 the average percentage of U S crops lost to agricultural pests was no less than in 1944 To use a metaphor the field of

evolutionary biology borrowed from Alice in Wonderland farmers must run ever faster to stay in the same place i e produce

the same yields With Chasing the Red Queen Andy Dyer offers the first book to apply the Red Queen Hypothesis to

agriculture Dyer examines one of the worlds most pressing problems as a biological case study He presents key concepts

from Darwins principles of natural selection to genetic variation and adaptive phenotypes Understanding the fundamentals of

ecology and biology is the first step to playing the Red Queen and escaping her unwinnable race The books novel frame will

help students researchers and policy makers alike apply that knowledge to the critical task of achieving food security

Climate Resilient Agriculture: Adaptation And Mitigation Strategies Manish Bhan,Vijay Singh Tomar,Kamal Kishore

Agrawal,Sahib Singh Tomar,Sunil Dutta Upadhyaya,2018-09-26 Climate is a vital factor that influences land use crop quality

its productivity as well as all the other of agricultural systems The significant impact of climate change is visible on human

societies and natural ecosystems around the world This impact will be more severe on agriculture if global warming

continues As per estimates of IPCC 2014 the agriculture forestry and other land use contributes 24% of global greenhouse

gas emissions These emissions need to be reduced to avoid the serious impact of climate change using mitigation measures

and adaptation strategies Currently unreliable and seasonal variations in weather have emerged as a serious challenge for

sustainability influencing vegetation biodiversity livestock soil water and other natural resources In the last decade more

occurrence of extreme weather events affected farming community directly in their agricultural growth The matter is of

great concern to country like India which require more produce from rainfed fields and shrinking crop land To understand

the problems occurring due to climate change concerted efforts are required for mitigation and adaptation to reduce the

vulnerability of rainfed agriculture and making it resilient Agricultural output as well as the livelihood of people who depend

on it are particularly vulnerable to climate change and it is important that we assess adaptation mechanisms to reduce these

vulnerabilities These practices should play a vital role to reduce GHG emissions by improving efficiency of farm inputs and

others like agroforestry interventions for green agricultural technologies Similarly adoption of conservation agriculture

suitable cultivars changing sowing dates irrigation scheduling and recycling waste water and solid waste in agriculture are

some of the options for developing climate resilient agriculture The book has been divided into major heads as Climate Change and Indian Agriculture Climate Change Management Strategies in Agriculture Greenhouse Gas Emissions and Indian Agriculture New Technologies in relation to Climate Change and with contribution from major research institutes universities by eminent scientists faculty members the book will fit into the needs of all concerns **Advances in Conservation**

Agriculture A. H. Kassam,2021 With growing scientific concern around the limitations of tillage based agriculture coupled with the sector's need to contribute to being more sustainable the development and adoption of alternative farming techniques has never been more important Conservation Agriculture CA is emerging as a key alternative The foundations of CA are built upon the use of no till techniques and the use of rotations and cover crops to optimise different aspects of soil and crop health and resilience Advances in Conservation Agriculture Volume 3 Adoption and Spread provides an authoritative review from an array of international experts on the adoption of CA principles in different regions around the world The final volume in this collection reviews the effectiveness of CA in differing contexts e g in drier conditions where water conservation is important or in areas with poor soil and refers to the wealth of research and experiential evidence currently available *Crop Production and Global Environmental Issues* Khalid Rehman Hakeem,2015 Agricultural

production has been considered as the key sector for revitalization of the economy and well being of the people in any country For decades due to increasing food demand together with policies encouraging production agricultural science has focused on boosting production through the development of new technologies Agriculture has become increasingly intensive Farmers are becoming capable of producing higher yields using less labor and less land due to many factors including use of fertilizer and pesticides introduction of farm machinery development of hybrid and genetically modified strains and increased knowledge about farm management practices Intensification of agriculture has not however been an unmixed blessing because this success has come at a high environmental cost The damaging effects of intensification of agriculture include water air and soil pollution as well as the loss of wildlife habitats and landscape features As agricultural sustainability means maintaining productivity while protecting the natural resource base there is increasing general recognition of the need to improve environmental performance in agriculture through enhancing the benefits and reducing the harmful environmental effects The book *Crop Production and Global Environmental Issues* is a very timely effort in this direction It discusses the main environmental issues and challenges which affects the crop production and productivity throughout the globe particularly in developing countries The book also provides some solutions to cope up with such challenges **Agricultural**
