*Paths to Justice* Hazel Genn, Sarah Beinart, 1999-11 Effective policy making in the administration of justice requires a solid understanding of public behaviour This book presents the results of the most wide ranging survey ever conducted by an independent body or government agency into the experiences of ordinary citizens as they grapple with the kinds of problems that could ultimately end in the civil courts Funded by the Nuffield Foundation the survey identifies how often people experience problems for which there might be a legal solution and how they set about solving them Revealing crucial differences in the approach taken to different kinds of potential legal problems the study describes the factors that influence decisions about whether and where to seek advice about problems and whether and when to go to law In addition to exploring experiences of courts tribunals and ADR processes the study also provides important insights into public confidence in the courts and the judiciary For the first time the study reveals the public s perspective on access to civil justice and makes a significant contribution to debate about how far civil justice reforms coincide with public experience and expectations about resolving justiciable problems Back cover

*Reimagining Justice, Human Rights and Leadership in Africa* Everisto Benyera,2019-08-08 Failed attempts in Africa to develop democratised and instil virtues of a just state and society which promote benevolent leadership and advance political and economic rights and freedoms call for a new imagination By exploring a wide range of issues concerning justice human rights and leadership this book makes two major contributions to the extant literature in each of these areas Firstly as a project in decoloniality it constitutes an epistemic break from mainstream logics and approaches to understanding state society and development in Africa presenting an approach that is filtered through a Euro American lens that reifies the hegemony of a particular spatio temporality In other words it emphasises the importance of situatedness by thinking from rather than about or with Africa And secondly it addresses a fundamental shortcoming in decolonial thought which is often criticised for rejecting western paradigms of thought without providing viable alternatives The issues covered include state failure in Africa the geopolitics of US and NATO military interventions on the continent individual states responses to international law indigenous moral political leadership authentic inclusion of marginalised voices in development practice an endogenous approach to environmental ethics and a spiritualist reflection on the need for Africa to chart her own course to political social and economic redemption By searching for alternative paths to justice human rights and leadership this book represents an effort to actualise the core vision of the African Renaissance to find African solutions for African problems
