Paths To Wellness A Holistic Approach And Guide For Personal Recovery:

Paths to Wellness Robert E. Freeman-Longo, 2001 **Sexual Offender Treatment** Geris Serran, 2005-12-13 The knowledge base on sexual offender treatment has become so extensive that following established paths is no longer the only way to expand understanding and improve the assessment and treatment of clients Written by established and recognised experts *Sexual Offender Treatment* Controversial Issues explores only the most current novel and controversial issues in the field of sexual offender treatment This comprehensive text covers a wide range of issues such as recidivism risk assessment diagnostic problems preparatory programs psychopathy and online sexuality The contributors to this book are speculative and provocative yet base their controversial approaches on evidentiary findings With fresh and alternative perspectives offered in each chapter this volume aims to generate discussions and challenge the reader to reconsider their position on the issues This innovative collection will appeal to all those working with sexual offenders in a range of capacities **Theories of Sexual Offending** Tony Ward, Devon Polaschek, Anthony R. Beech, 2006-02-22 This comprehensive text provides an up to date review and critique of current theorising about sexual offending It presents the key ideas underpinning each theory in a clear and accessible manner Theories are rigorously tested and evaluated and their merits are examined from both a research and a clinical point of view Importantly the emphasis is on providing clear links between theory and practice and the clinical implications of the different theories and perspectives are explicitly discussed In addition a number of new ideas about the aetiology of sexual offending are presented *Theories of Sexual Offending* is one of the few books to draw all of the disparate strands of theorising together and is the only one to clearly link theory to practice It will be a valuable resource for any professional working with sexual offenders such as clinical and forensic psychologists psychiatrists probation officers and social workers It will also be of interest to students of forensic and clinical psychology *Sexual Deviance* Tony Ward, D. Richard Laws, Stephen M Hudson, 2003 Ward Laws and Hudson are among the world s leading authorities in the area of understanding and treating sex offenders They address the biological developmental cultural and learning factors in the genesis and development of sexual deviancy and links those theories to interventions with sex offenders *Sexual Deviance* examines why sex offences are committed and covers the controversies surrounding what to do about it It discusses cutting edge theoretical developments in etiology rehabilitation and practice *Sexual Deviance* is divided into two sections The first covers explanations of sexual deviance including ethical issues and classification systems for sexually deviant disorders The second section addresses responses to sexual deviance including traditional and newer intervention approaches This is an area fraught with controversies both within the clinical community and in the public policy sector and the authors seek to discuss those issues that are particularly controversial *The Handbook of Clinical Intervention with Young People who Sexually Abuse* Gary O'Reilly, William L. Marshall, Alan Carr, Richard C. Beckett, 2004-08 This Handbook provides invaluable reviews of the growing body of empirical and theoretical knowledge in this field and clearly demonstrates how this

knowledge can be used to guide and develop evidence based practice for assessment and treatment *What Else Works?* Jo Brayford, Francis B Cowe, John Deering, 2013-05-13 *What Else Works* has developed out of a growing awareness amongst practitioners that centralized notions of what works and one size fits all approaches to work with offenders and other groups is inevitably limited in its scope and effectiveness The book seeks to dispel the view of probation service users as offenders and socially excluded people as problems to be managed and treated and instead considers more creative alternatives to reduce both re offending and social exclusion These include working separately with women black and minority ethnic groups local community focussed projects in education and nature and conservation programmes The reader is encouraged to think about past and current policy practice and the relationship between practitioners and offenders or other socially excluded people Questions are raised as to whether and how practice could be different and contributors explore the theme of creative and change focussed practice or focus on a particular approach to a practice This book will appeal to students on criminal justice criminology and social work courses professionals operating in these fields as well as the wider audience of professionals and academics who may engage with these service users from a range of policy and practice perspectives
