Grazia Rossi,2023-11-15 This volume addresses the issue of pragmatic meaning and interpretation in communication

contexts regarding health and does so by combining a series of diverse and complementary approaches which together highlight the relevance of successfully shared understanding to achieve more accessible inclusive and sustainable healthcare systems The volume is divided into five thematic sections 1 Analytical approaches to health communication 2 Intercultural and mediated communication 3 Negotiation and meaning construction 4 Expertise and common ground 5 Uncertainty and evasive answers bringing together a group of top scholars on the much debated issue of shared understanding both at the micro level of dialogues between professionals and patients and the macro level of institutional communication In the variety of its contributions it represents an ambitious attempt at setting pragmatics at the core of healthcare communication research and practice by combining conceptual reflections on core topics in the field of pragmatics among which are speech acts common ground ambiguity implicitness with discourse and linguistic analysis of real world examples exploring various problems in health communication

**Medical Liability and Artificial Intelligence** Rafaella Nogaroli, 2025-07-31 This book offers an in depth examination of the critical intersection between medical practice and artificial intelligence analysing the benefits risks and complex challenges that AI introduces into the doctor patient relationship It provides comprehensive insights into the reconceptualisation of medical duties addressing both their ethical imperatives and their binding legal force With a particular focus on medical malpractice and medico legal duties the book examines the ethical principles underpinning the use of artificial intelligence in medicine and their correlation with legal obligations It further provides a general overview of the regulatory framework governing AI within the European Union drawing comparisons with existing legal concepts under the Brazilian legal system This is the first book worldwide to focus exclusively on the analysis of medical liability within the context of artificial intelligence Originally published in Portuguese it is now presented in an expanded and fully translated English edition Aimed at both academic institutions and legal and healthcare practitioners this research monograph addresses a notable gap in the existing literature It serves as a valuable resource for scholars legal professionals and medical practitioners seeking a comprehensive understanding of the intersection between AI and medical malpractice Through its in depth legal analysis and practical case studies the book offers a focused examination of medical malpractice and civil liability arising from the use of AI systems enhancing its relevance to a wide ranging audience The book encompasses a broad range of topics relating to medical liability in the context of AI systems adopting a practical approach that renders its content applicable across different legal jurisdictions The foundational concepts of Medical Law and artificial intelligence it presents are relevant to multiple national frameworks thereby enhancing its accessibility This adaptability and universal applicability position the work as a valuable resource for international audiences offering insights and guidance that may be effectively applied in diverse legal and healthcare contexts

*Narrative in Health Care* John D Engel, Joseph Zarconi, Lura Pethtel, Sally Missimi, 2017-11-22 Narrative medicine has developed an identity already Clinicians of many disciplines are being summoned to a practice that recognizes patients by receiving their accounts of self Starting from

different positions the four authors have converged in a strong and shared commitment to narrative health care. They conceptualize narrative health care practices within frameworks derived from the social sciences and psychology and to a lesser degree phenomenology and autobiographical theory. They relate the development of narrative medicine to relationship centered care, patient centered care, and complex responsive process of relating, theory positing that narrative medicine can help clinicians to develop the skills required to practice relationship centered care. The book details with exercises, resource texts, and abundant scholarly apparatus how these skills can be developed and strengthened. This work will change health care. Because of its scholarly rigor, its multi-voiced sources, and its highly practical features, lists, activities, key ideas, and key references, primary texts written by health care professionals and patients, this work will be a guide in the field for those who practice medicine or nursing or social work. The book establishes that there is a field to be practised, a need to practise it, and a means to develop the wherewithal to do so.

**Learning from the Student's Perspective** Alison Cook-Sather, Brandon Clarke, Daniel Condon, Kathleen Cushman, Helen Demetriou, Lois Easton, 2015-11-17. Much has been written about how to engage students in their learning, but very little of it has issued from students themselves. Compiled by one of the leading scholars in the field of student voice, this sourcebook draws on the perspectives of secondary students in the United States, England, Canada, and Australia, as well as on the work of teachers, researchers, and teacher educators who have collaborated with a wide variety of students. Highlighting student voices, it features five chapters focused on student perspectives articulated in their own words regarding specific approaches to creating and maintaining a positive classroom environment and designing engaging lessons, and on more general issues of respect and responsibility in the classroom. To support educators in developing strategies for accessing and responding to student voices in their own classrooms, the book provides detailed guidelines created by educational researchers for gathering and acting upon student perspectives. To illustrate how these approaches work in practice, the book includes stories of how pre-service and in-service teachers, school leaders, and teacher educators have made student voices and participation central to their classroom and school practices. And finally, addressing both practical and theoretical questions, the book includes a chapter that outlines action steps for high school teachers, school leaders, and teacher educators, and a chapter that offers a conceptual framework for thinking about and engaging in this work. Bringing together in a single text student perspectives, descriptions of successful efforts to access them in secondary education contexts, concrete advice for practitioners, and a theoretical framework for further exploration, this sourcebook can be used to guide practice and support re-imagining education in secondary schools of all kinds, and the principles can be adapted for other educational contexts.

**Immigrant Medicine E-Book** Patricia Frye Walker, Elizabeth Day Barnett, William Stauffer, James M Jaranson, 2007-10-25. Immigrant Medicine is the first comprehensive guide to caring for immigrant and refugee patient populations. Edited by two of the best known contributors to the growing canon of information about immigrant medicine and written by a geographically diverse collection of experts, this book synthesizes the

most practical and clinically relevant information and presents it in an easy to access format An invaluable resource for front line clinicians and other healthcare professionals public health officials and policy makers Immigrant Medicine is destined to become the benchmark reference in this emerging field Features expert guidance on data collection legal interpretive and social adjustment issues as well as best practices in caring for immigrants to help you confidently manage all aspects of immigrant medicine Includes detailed discussions on major depression post traumatic stress disorder and issues related to torture so you can effectively diagnose and treat common psychiatric issues Covers international and new arrival screening and immunizations offering you invaluable advice Presents a templated diseases disorders section with discussions on tuberculosis hepatitis B and common parasites that helps you easily manage the diseases and syndromes you are likely to encounter Provides boxed features and tables differential diagnoses and treatment algorithms to help you absorb information at a glance
