Runaway Anthony Chaney,2017-08-09 The anthropologist Gregory Bateson has been called a lost giant of twentieth century thought In the years following World War II Bateson was among the group of mathematicians engineers and social scientists who laid the theoretical foundations of the information age In Palo Alto in 1956 he introduced the double bind theory of schizophrenia By the sixties he was in Hawaii studying dolphin communication Bateson s discipline hopping made established experts wary but he found an audience open to his ideas in a generation of rebellious youth To a gathering of counterculturalists and revolutionaries in 1967 London Bateson was the first to warn of a greenhouse effect that could lead

to runaway climate change Blending intellectual biography with an ambitious reappraisal of the 1960s Anthony Chaney uses Bateson's life and work to explore the idea that a postmodern ecological consciousness is the true legacy of the decade Surrounded by voices calling for liberation of all kinds Bateson spoke of limitation and dependence But he also offered an affirming new picture of human beings and their place in the world as ecologies knit together in a fabric of meaning that said Bateson we might as well call Mind **Alexandria 5** David Fidler,2000-04-01 In ancient Egypt the city of Alexandria was a flourishing cultural center where philosophical spiritual and cosmological teachings flowed together to create vital new syntheses Today Alexandria provides a meeting place for everyone who is interested in ancient and modern cosmological speculation and how the humanities may contribute to contemporary life Page 4 of cover [Return to the One](#) Brian Hines,2004 In the Enneads 3rd century mystic philosopher Plotinus synthesized a thousand years of accumulated Greek wisdom with his own profound mystical experiences What is the nature of God Of spirit Of soul In what fashion can God be realized How can the validity of spiritual experiences be tested Return to the One presents Plotinus's compelling answers to such ageless questions in a refreshing modern style Whatever your spiritual beliefs you will find yourself challenged and stimulated by Plotinus's matchless blend of rationality and mysticism [Economic Globalisation as Religious War](#) Michael McKinley,2007-06-28 Using a critical theory approach to analyze the globalization of the world economy this provocative and topical new book presents economic globalization not as a recent development but rather as a familiar process that has occurred throughout history Michael McKinley argues that it is ultimately a self serving arbitrary and destructive imperial project that should be viewed as a religious war **The Case for God** Karen Armstrong,2009-09-22 NATIONAL BESTSELLER A nuanced exploration of the role of religion in our lives drawing on insights of the past to build a faith for our dangerously polarized age from the New York Times bestselling author of The History of God Moving from the Paleolithic age to the present Karen Armstrong details the great lengths to which humankind has gone in order to experience a sacred reality that it called by many names such as God Brahman Nirvana Allah or Dao Focusing especially on Christianity but including Judaism Islam Buddhism Hinduism and Chinese spiritualities Armstrong examines the diminished impulse toward religion in our own time when a significant number of people either want nothing to do with God or question the efficacy of faith Why has God become unbelievable Why is it that atheists and theists alike now think and speak about God in a way that veers so profoundly from the thinking of our ancestors Answering these questions with the same depth of knowledge and profound insight that have marked all her acclaimed books Armstrong makes clear how the changing face of the world has necessarily changed the importance of religion at both the societal and the individual level Yet she cautions us that religion was never supposed to provide answers that lie within the competence of human reason that she says is the role of logos The task of religion is to help us live creatively peacefully and even joyously with realities for which there are no easy explanations She emphasizes too that religion will not work automatically It is she says a practical discipline its insights are

derived not from abstract speculation but from dedicated intellectual endeavor and a compassionate lifestyle that enables us to break out of the prism of selfhood **Freedom Glorious Freedom** John J. McNeill, 2009 In *Freedom Glorious Freedom* acclaimed author John J McNeill shows how lesbian and gay Christians can achieve full spiritual maturity and self acceptance McNeill discusses freedom of conscience and discernment of spirits ancient teachings of the Christian church that have a special urgency for lesbian and gay people who need to free themselves from all the homophobic authorities and deal with God on a direct and personal basis The liberating process of coming out of the closet is seen as a spirit filled effort to achieve the glory of God by becoming fully alive McNeill offers a twelve step spirituality as a spiritual process of liberation from all addictions in order to experience the love of God in its fullness The epilogue expresses in detail a philosophical vision looking both to the past and to the future of how gay liberation fits into the Spirit directed evolution of human history and its role in the ongoing struggle for human liberation For more than thirty five years John J McNeill an ordained priest and psychotherapist has been devoting his life to spreading the good news of God s love for lesbian and gay Christians

Astrology and Western Society from the First World War to Covid-19 William Burns, 2023-10-11 This book gathers contributions on the topic of astrology in the West during the twentieth and twenty first centuries from 1914 2022 It is the first collection exclusively devoted to a period that has been mostly neglected by historians of astrology who have mostly devoted themselves to the ancient medieval and early modern periods Uninterested in vindicating or debunking astrology contributors consider its cultural impact its relation to historical events and the ways in which it has changed in the last century The broad range of subjects on modern Europe and the US include the relation of astrology with indigenous thought interwar Polish astrology and the relation of American astrologers to COVID A bibliography of studies of modern astrology on a global basis is also included This collection is a thoughtful contribution to the history of astrology and the sociology of belief as well as carrying significant implications for twentieth and twenty first century history broadly **'We Hold These Truths to Be Self-Evident...'** Kenneth N. Addison, 2009-05-16 We hold these truths to be self evident An Interdisciplinary Analysis of the Roots of Racism and Slavery in America delves into the philosophical historical socio cultural and political evolution of racism and slavery in America The premise of this work is that racism and slavery in America are the result of an unintentional historical intertwining of various Western philosophical religious cultural social economic and political strands of thought that date back to the Classical Era These strands have become tangled in a Gordian knot which can only be unraveled through the bold application of a variety of multidisciplinary tools By doing so this book is intended help the reader understand how the United States a nation that claims all men are created equal could be responsible for slavery and the intractable threads of racism and inequality that have become woven into its cultural the fabric The Godless Delusion Joe Egan, 2009 In a recent work Richard Dawkins posed an immense challenge to theology by arguing on scientific grounds that the existence of God is so improbable that it can be safely dismissed as a delusion This work responds to the challenge by

examining the arguments put forward by Dawkins and subjecting them to critique in the light of Christian faith The critique probes some of the assumptions underlying scientific endeavours about the nature of reality and it brings to the surface the question of how meaning truth and freedom are properly to be understood The work goes on to present a theological understanding of these realities in the light of Christian beliefs in God in Jesus Christ in creation and in redemption Far from denying the importance of scientific endeavours and discoveries this approach seeks to provide a framework in which they can be meaningfully situated for the betterment of humanity as a whole
