Sanders, 1998 *Nucleated Villages A Strategy for Rural Development in Northern Uganda* Silver Jubilee Ocitti, 2011-08-01 Detailed exploration of the this methodology and potential for rural development from its ashes after protracted military conflict into a model agricultural economy is the mandate of this book Drawing from examples from developed economies as well as the immerging and developing regions this compelling and comprehensive essay on the reorganization of Uganda sets out to demonstrate the importance of nucleation of large agrarian communities as a means of achieving sustainable rural development in present day Africa The practical ideas presented by the author makes this book an important read for all those committed to rural African development Working with local government structures Ocitti plans what will no doubt become the backbone of the much needed Northern Uganda and indeed Uganda and African s agricultural economical social and cultural reform **Focus on Reading** Esther Geva, Gloria Ramírez, 2016-09-27 Focus on Reading aims to help teachers develop a deep understanding of the multiple skills and factors involved in second language reading development for second or foreign language learners aged 5 18 It equips teachers with practical skills for the effective teaching and assessment of second language reading to students with different learning needs The book features key research studies on reading comprehension considers examples from real classroom practice and provides activities to help teachers relate the content and objectives to their own teaching context Additional online resources at www.oup.com/elt/teacher for Esther Geva is Full Professor in the Department of Applied Psychology and Human Development at the Ontario Institute for Studies in Education University of Toronto Gloria Ram rez is Associate Professor in the Faculty of Human Social and Educational Development at Thompson Rivers University British Columbia **Human Rights, Diversity, and National Identity** Patricia E. Bromley, 2011 Fundamental world changes that simultaneously undermine a nation state s charisma and promote the rise of a supra national system have wide ranging effects upon national states within a modern global society My dissertation empirically examines the effects of social and cultural globalization on systems of mass schooling which are central institutions in every country Globally primary and secondary education initially emerged as the premier tool for nation states to create a unified national citizenry loyal to their country and socialized into a common cultural tradition I examine the extent to which this original nationalizing purpose of schooling is challenged by the increased emphases on universal human rights and diversity in civic education The analyses consist of two sections Hierarchical linear models are used to analyze a unique primary data source of 521 social science textbooks from 74

countries during the period 1970-2008. These findings show a worldwide increase in emphasis on human rights and increases in discussions of diversity in well established liberal democracies. Cross national quantitative analyses are complemented by a qualitative case study of social science curricula in British Columbia BC which examines nation building within a context of strong emphasis on diversity and human rights. The BC study utilizes currently approved high school citizenship education textbooks as well as older textbooks dating back to 1871. It also draws on a selection of historical documents including Ministry of Education reports, curricular frameworks and high school exit exams. Process wise I find the incorporation of human rights and diversity reflects macro level changes in national and global society. Content wise I find four main approaches to reconciling ideas of human rights and diversity with national identity: 1. framing human rights and multiculturalism as part of national identity, 2. using pedagogical approaches that promote multiple perspectives and individual agency, 3. celebrating social and scientific figures and accomplishments as the source of national pride, and 4. drawing on exogenous sources to affirm state legitimacy. This study is one of the first to theorize that civic education worldwide is moving away from a national focus and to provide empirical evidence of this trend. A key implication is that educational systems are being repurposed from their original goal of constructing a unitary national citizenry to a new view emphasizing human diversity and equality in a globally interconnected world. Further, students are increasingly taught that the global civil society and non state actors are important and legitimate agents of social change.

Habit's Pathways Tony Bennett, 2023-08-28. Habit has long preoccupied a wide range of theologians, philosophers, sociologists, psychologists and neuroscientists. In *Habit's Pathways*, Tony Bennett explores the political consequences of the varied ways in which habit's repetitions have been acted on to guide or direct conduct. Bennett considers habit's uses and effects across the monastic regimens of medieval Europe, in plantation slavery and the factory system, through colonial forms of rule and within a range of medicalized pathologies. He brings these episodes in habit's political histories to bear on contemporary debates ranging from its role in relation to the politics of white supremacy to the digital harvesting of habits in practices of algorithmic governance. Throughout, Bennett tracks how habit's repetitions have been articulated differently across divisions of class, race and gender, demonstrating that although habit serves as an apparatus for achieving success, self fulfillment and freedom for the powerful, it has simultaneously served as a means of control over women, racialized peoples and subordinate classes.

Canadian Books in Print 2002, Marian Butler, 2002-02. **Riverside Views** Yves Earhart, 2025-01-30. *Riverside Views* offers a comprehensive exploration of the world's major river systems, weaving together their ecological significance and cultural importance throughout human history. The book expertly navigates through the complex relationships between rivers and civilization, examining how these waterways serve as both vital ecosystems and crucial resources for human development. Through detailed analysis of iconic rivers like the Amazon, Nile, Yangtze, and Mississippi, readers gain insight into how these dynamic systems shape landscapes and support biodiversity. The book's three part structure provides a logical progression

from physical geography to ecosystem dynamics and human interactions Starting with the fundamental aspects of river mechanics including flow patterns and sediment transport it builds toward an understanding of complex riverside ecosystems and their inhabitants The final section bridges the gap between natural sciences and human development exploring how civilizations have historically interacted with rivers and how modern challenges like climate change and urban development impact these vital waterways What sets this work apart is its multidisciplinary approach combining hydrological data ecological surveys and anthropological studies to create a complete picture of river systems The inclusion of case studies detailed maps and data visualizations makes complex concepts accessible to both scientists and general readers By addressing current challenges such as pollution and water rights disputes while offering practical solutions for conservation the book serves as an essential resource for environmental scientists urban planners and anyone interested in the future of our planet s river systems
