Some forty contributors, all of whom are experts in their subject, provide a robust overview of their specialities along with extensive further references which act as a starting point for further research. **The Life of St Patrick and His Place in History** John Bagnell Bury, 2019-06-27 A 1905 work considering the life of St Patrick in the context of the diffusion of Christianity across the Roman empire.

**Sources In British Political History, 1900-1951** Chris Cook, Jeffrey Weeks, 1978-10-05 From 1970 to 1977 a major project to uncover source material for students of contemporary British history and politics was undertaken at the British Library of Political and Economic Science. Financed by the Social Science Research Council and under the direction of Dr Chris Cook, this project has attempted a unique and systematic operation to locate and then to make readily available those archives that provide the indispensable source material for the contemporary historian. This volume, the fifth in the series, provides a guide to the papers of propagandists who were influential in British public life. Included in this volume are the papers of such persons as newspaper editors, leading economists, social reformers, socialist thinkers, trade unionists, industrialists, and a variety of theologians and philanthropists. In all, this volume not only completes the findings of the project but opens up the archive sources of a hitherto neglected area of research into contemporary social and political history.

**Space Law Principles and Sustainable Measures** Hamid Jahankhani, Stefan Kendzierskyj, Sina Pournouri, Maria A. Pozza, 2024-09-14 This book helps to bridge the knowledge gap that currently surrounds space technology and its method of exploration and highlights much needed awareness and attention to an increase in Space Law and sustainable measures. The ever-increasing usage of space-based solutions by both public and commercial entities is producing congestion in the radio frequency spectrum as well as orbital slots. The inevitable commercialization of satellite technology will certainly result in a proliferation of privately owned and managed satellite spacecraft in low Earth orbits. Cyber vulnerabilities in the Air Force and the DoD frequently ignore satellite ground systems. Space ground system cyber security assaults and investigations include those involving satellite control, communications, terminal hacking, and GPS spoofing. A continuous cyber security assessment technique is required for space systems to identify, assess, reduce, and address sophisticated cyber threats. Risk-based compliance, regular cybersecurity risk assessments, and a renewed focus on the elimination of system flaws at the time of design are all necessary for space ground and control systems. Due to the absence of a rigid regulatory framework, satellites play a significant part in the production of space debris, which is a source of increasing worry. Such debris, manufactured artificially, contributes greatly to the destruction of the

environment in Earth's orbit There is not a single framework in existence that can appropriately govern contemporary concerns like the security of satellite data and debris in orbit The Department of Defence DoD is now responsible for monitoring all objects in space however it cannot require satellite operators to take precautions against potential collisions

**Infrastructure in Early Medieval Britain** Mateusz Fafinski, 2025-10-01 Early Medieval Britain was more Roman than we think The Roman Empire left vast infrastructural resources on the island These resources lay buried not only in dirt and soil but also in texts laws chronicles charters even churches and landscapes This book uncovers them and shows how they shaped Early Medieval Britain Infrastructures material and symbolic can work in ways that are not immediately obvious and exert an influence long after their creators have gone Infrastructure can also rest dormant and be reactivated with a changed function role and appearance This is not a simple story of continuity and discontinuity It is a story of adaptation and transformation of how the Roman infrastructural past was used and re used and also how it influenced the later societies of Britain
