Of Mice Models And Men A Critical Evaluation Of Animal Research:

Of Mice, Models, and Men Andrew N. Rowan, 1984-01-01 Too much emotion and insufficient fact This paradox has long characterized the controversy surrounding animal research *Of Mice Models and Men* is the first exhaustive treatment of all areas empirical and conceptual relevant to the use of animals in research It is also the first study to combine regard for the welfare of laboratory animals with a knowledgeable acceptance of the continuing need for research involving animals The book has another rare quality It is virtually devoid of any of the emotional and exaggerated attacks that have characterized many of the other publications in this area Instead it presents in a manner accessible to both sides all the relevant historical social and scientific information required to form an opinion on the subject The book thus achieves a most difficult goal that of bridging the gap between researchers using animals and animal welfare advocates while pointing out the need for a more active program to promote laboratory animal welfare

Why Animal Experimentation Matters Ellen Frankel Paul, Jeffrey Paul, Animal experimentation has made a crucial contribution to many of the most important advances in modern medicine The development of vaccines for deadly viruses like rabies and yellow fever depended upon animal research and much of our basic knowledge about human health and physiology was discovered through the use of animals as well In spite of these gains animal rights activists have been zealous in communicating to the public and policymakers their view that the use of animals in medical research is morally wrong and should be severely curtailed or eliminated The activists arguments draw upon a range of disciplines and focus on both practical and ethical aspects of animal experimentation Advocates of animal experimentation have been slow to respond to these arguments Given that the worldwide toll of communicable diseases is still immense and that deadly new pathogens may emerge at any time in the future to menace human health failing to defend animal experimentation from the arguments of its opponents has disastrous implications A quick response to an unanticipated threat on the order of the AIDS epidemic is unimaginable absent a vigorous research establishment which in turn is dependent on animal proxies *Why Animal Experimentation Matters* is a first attempt by research scientists and moral philosophers to mount a convincing defense against animal rights enthusiasts Because opponents of animal experimentation come from a variety of intellectual backgrounds this defense is necessarily interdisciplinary as well In this collection of eight essays the authors scrutinize how animal experimentation actually functions in the laboratory the vital role that it plays in palliating and eradicating human and animal diseases and the moral justification for sacrificing animals for the betterment of human life The subjects covered in the essays include the moral status of animals and persons the importance of animals for advancing scientific knowledge the history of animal experimentation and of its detractors differing theoretical approaches of American and European animal experimentation regulations the heavily restrictive legislation promoted by animal rights activists and the threats posed to research and researchers by violent animal rights zealots Contributors include Baruch Brody H Tristram Englehardt Jr R G Frey Kenneth F Kiple and Kriemhild Cone Ornelas Adrian R Morrison Charles S Nicoll

and Sharon M Russell Jerrold Tannenbaum and Stuart M Zola This important anthology will be of interest to scientists philosophers individuals suffering from heritable or communicable diseases relatives of afflicted individuals and policymakers Ellen Frankel Paul is deputy director of the Social Philosophy and Policy Center professor of political science and philosophy at Bowling Green State University and editor in chief of the journal Social Philosophy both are professors of philosophy at Bowling Green State University

Animal Research and Ethical Conflict Mary T. Phillips, Jeri A. Sechzer, 2012-12-06 This volume grew out of a project to conduct a survey of the scientific literature of the United States for items addressing the ethical and humane issues of animal experimentation The original purpose of the survey was to provide background information for the development of a set of guide lines for the use of animals in research then in preparation by The New York Academy of Sciences Ad Hoc Committee on Animal Research We soon realized however that the survey constituted a valuable resource in its own right In this book we present the results of the literature survey along with relevant information about its legislative and historical context We hope that this material will be helpful to biomedical researchers grappling with animal welfare problems as well as to social scientists interested in tracing the evolution of the 20th century phase of the animal research controversy The time span covered by the survey was selected to match the 20 year period between the passage of the first federal Animal Welfare Act in 1966 and the most recent legislation regulating animal research which took effect during 1986 Our analysis examines this transitional period through the pages of the scientific literature During these 2 decades animal research in the United States was transformed Activist animal protection organizations catapulted troublesome ethical questions to national prominence throwing the scientific community into turmoil

Clingerman, 1990 **The Case for Animal Experimentation** Michael Allen Fox, 1986-01-01 Discusses animal rights and the morality of animal experiments suggests ethical guidelines for the use of animals as test subjects and identifies irrational attitudes towards animals *Alternatives to Animal Use in Research, Testing, and Education*, 1986 **Alternatives to Animal Use in Research, Testing, and Education** United States. Congress. Office of Technology Assessment, 1986 **Trends and Changes in Drug Research and Development** S.R. Walker, 2012-12-06 The 20th Anniversary of a Learned Society is a momentous event in its affairs and it is fitting that in the Appendix to the Proceedings of the 20th Anniversary Meeting the history of the Society for Drug Research is outlined The aim of the Society to encourage an interdisciplinary approach and to act as an organisation freed from any specific scientific branch of knowledge was achieved and is exemplified by the publication of these proceedings of the Anniversary

Meeting held at the Pharmaceutical Society of Great Britain In only two other cases have the Society's proceedings been published maintaining the original decision and policy to allow membership to enjoy communications from those who may not have agreed to speak had publication been mandatory The papers presented at the Anniversary Meeting covered a wide range of scientific disciplines and it is fitting that work of such calibre should have been published under the able editorship of Stuart and Bryan Walker They should prove invaluable to those who are interested in Drug Research The Ethics of

Animal Experimentation Donna Yarri, 2005-08-18 The ethical treatment of animals has become an issue of serious moral concern Many people are challenging long held assumptions about animals and raising questions about their status and treatment What is the relationship between humans and animals Do animals have moral standing Do we have direct or indirect duties to animals Does human benefit always outweigh animal suffering The use of animals for experimentation raises all of these questions in a particularly insistent way Donna Yarri gives an overview of the current state of the discussion and presents an argument for significantly restricted animal experimentation Pointing to the similarities between humans and animals she argues that the actual differences are differences of degree rather than kind Animal cognition and animal sentience together are the basis for the claim that experimental animals do have rights Examining arguments in the disciplines of ethology philosophy science and theology Yarri makes a case for placing substantial restrictions on animal experimentation Grounding her examination in Christian theology she formulates a more humane approach to animal experimentation She concludes with a concrete burden benefit analysis that can serve as the foundation for informed decision making The Ethics of Animal Experimentation serves as both a handbook of animal rights theory and a practical guide to navigating the complexities of animal experimentation As animal experimentation features in an increasing number of scientific endeavors it is an ethical issue that requires our immediate attention Yarri's unique contribution forges a path toward an ethical practice of animal experimentation *The Importance of Animal Experimentation for Safety and*

Biomedical Research S. Garattini, D.W. van Bekkum, 2012-12-06 Scientists are coming under increasing pressure from activist groups to stop animal experimentation branded as cruel and unnecessary for improving human health This attitude however stems from an unrealistic evaluation of the situation and distorted information about present scientific knowledge There is no question that most medical progress perhaps all in fact has been attained through knowledge derived initially from experiments in various animal species There is practically no way of replacing animals in these investigations and so called alternative methods are in reality merely complementary Tissue cultures cell microorganisms enzymes membranes mathematical models all are useful for preliminary screening tests and for testing hypotheses but the complexity of a living organism is such that in vivo studies are essential before any test can responsibly be made in man This book presents the proceedings of an international symposium organized in Strasbourg October 24-25 1988 with the aim of assessing present day requirements as regards animal experimentation in research related to major medical and toxicological problems still

awaiting solutions Encyclopedia of Animal Rights and Animal Welfare Marc Bekoff, Carron A. Meaney, 2013-12-16 Human beings responsibility to and for their fellow animals has become an increasingly controversial subject This book provides a provocative overview of the many different perspectives on the issues of animal rights and animal welfare in an easy to use encyclopedic format Original contributions from over 125 well known philosophers biologists and psychologists in this field create a well balanced and multi disciplinary work Users will be able to examine critically the varied angles and arguments and gain a better understanding of the history and development of animal rights and animal protectionist movements around the world Outstanding Reference Source Best Reference Source **Quick Bibliography Series** ,1976 Bibliographies and Literature of Agriculture ,1986 **In the Name of Science** F. Barbara Orlans, 1993-07-08 Few arguments in biomedical experimentation have stirred such heated debate in recent years as those raised by animal research In this comprehensive analysis of the social political and ethical conflicts surrounding the use of animals in scientific experiments Barbara Orlans judges both ends of the spectrum in this debate unconditional approval or rejection of animal experimentation to be untenable Instead of arguing for either view she thoughtfully explores the ground between the extremes and convincingly makes the case for public policy reforms that serve to improve the welfare of laboratory animals without jeopardizing scientific endeavor This book presents controversial issues in a balanced manner based on careful historical analysis and original research Different mechanisms of oversight for animal experiments are compared and those that have worked well are identified This compelling work will be of interest to biomedical scientists ethicists animal welfare advocates and other readers concerned with this critical issue **Reference Materials for Members of Animal Care and Use Committees** D'Anna J.
