Refreshed technical content has been added to the official ISC 2 CISSP CBK to reflect the most current topics in the information security industry today. The result is an exam that most accurately reflects the technical and managerial competence required from an experienced information security professional to effectively design engineer implement and manage an organization's information security program within an ever-changing security landscape. The domain names have been updated as follows: CISSP Domains Effective April 15 2015: Security and Risk Management, Security Risk Compliance, Law Regulations, Business Continuity, Asset Security, Protecting Security of Assets, Security Engineering, Engineering and Management of Security, Communications and Network Security, Designing and Protecting Network Security, Identity and Access Management, Controlling Access and Managing Identity, Security Assessment and Testing, Designing, Performing and Analyzing Security Testing, Security Operations, Foundational Concepts, Investigations, Incident Management, Disaster Recovery, Software Development, Security Understanding, Applying and Enforcing Software Security.
