**Political Marketing on Social and Mobile Media** Melissa M. Smith, 2015-09-10 This book explores how social and mobile media have been used in political campaigns since 2008, examining how social media are already being implemented as well as how these types of messaging platforms might be used in the future. Chapters in this book discuss how social and mobile media are becoming imperative when marketing a candidate's image, distributing messages, fundraising, and getting out the vote. **Data and Goliath** Bruce Schneier, 2015-03-02 Bruce Schneier's amazing book is the best overview of privacy and security ever written Clay Shirky: Your cell phone provider tracks your location and knows who's with you Your online and in-store purchasing patterns are recorded and reveal if you're unemployed, sick or pregnant Your e-mails and texts expose your intimate and casual friends Google knows what you're thinking because it saves your private searches Facebook can determine your sexual orientation without you ever mentioning it The powers that surveil us do more than simply store this information Corporations use surveillance to manipulate not only the news articles and advertisements we each see but also the prices we're offered Governments use surveillance to discriminate, censor, chill free speech and put people in danger worldwide And both sides share this information with each other or even worse, lose it to cybercriminals in huge data breaches Much of this is voluntary: we cooperate with corporate surveillance because it promises us convenience and we submit to government surveillance because it promises us protection The result is a mass surveillance society of our own making But have we given up more than we've gained In Data and Goliath security expert Bruce Schneier offers another path: one that values both security and privacy He brings his bestseller up to date with a new preface covering the latest developments and then shows us exactly what we can do to reform government surveillance programs, shake up surveillance-based business models and protect our individual privacy You'll never look at your phone, your computer, your credit cards or even your car in the same way again
